APPLICATION INSTRUCTIONS

Follow these guidelines for optimal results and plant health. A 2 lb bag covers approximately 50 sq ft.

For Containers & Flower Pots:

- **How Much:** Mix 2 tablespoons of dry flower fertilizer per 1 gallon of soil medium volume or 1 cup per 1 cubic ft of soil.
- **How To:** Mix nutrients into soil medium before planting.

Better lawn & garden care *made easy!*

Smart solutions for a thriving
yard and garden—simple,
effective, and packed with
the power of nature.

Image: A person applying the granular plant food to a potted plant.

For Established Flower Pots:

- **How Much:** Sprinkle 1 tablespoon of nutrients for every 4-inch pot diameter.
- **How To:** Water in after sprinkling nutrients on soil surface to begin feeding.
- **How Often:** Repeat every 6 weeks.

For Established Outside Flowers & Plants:

- **How Much:** Work dry plant food into the top 4 inches of soil, using 1 cup per 25 square feet.
- **How Often:** Garden beds may be fertilized to optimize growth once every 4-6 weeks during growing season.
