SETUP AND ASSEMBLY

Before assembly, ensure all parts are present and undamaged. It is recommended to assemble the bed frame on a soft, clean surface to prevent scratches. Two people are recommended for assembly.

Included Components:

- Headboard
- Footboard
- Side Rails
- Slatted Bed Base
- Support Legs
- Assembly Hardware (screws, bolts, Allen key)

Assembly Steps:

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Refer to the parts list in your physical manual to identify each piece.
2. **Attach Side Rails to Headboard and Footboard:** Connect the side rails to the headboard and footboard using the provided hardware. Ensure all connections are secure.

5. **Tighten All Connections:** Once assembled, double-check and tighten all screws and bolts. Do not overtighten.

OPERATION AND USAGE

The Yaheetech Vintage Metal Bed Frame is designed for use with a compatible mattress of 140 x 200 cm. The robust slatted base eliminates the need for a box spring.

Mattress Placement:

- Carefully place your 140 x 200 cm mattress directly onto the assembled slatted bed base.
- The appropriate insertion depth ensures the mattress remains securely in place and does not slide.

Under-Bed Storage:

The bed frame offers approximately 32.5 cm of clearance from the floor, providing ample space for under-bed storage solutions such as baskets or containers.

MAINTENANCE

Regular maintenance will help prolong the life and appearance of your bed frame.

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the powder coating.
- **Tightening:** Periodically check all screws and bolts and tighten them if necessary to maintain stability and prevent squeaking.
- **Floor Protection:** The bed frame is equipped with protective foot caps to prevent scratches on your floor. Ensure these caps remain in place.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

Problem	Possible Cause	Solution
Squeaking Noises	Loose connections or friction between metal parts.	Tighten all screws and bolts. Apply a small amount of lubricant (e.g., silicone spray) to connection points if necessary.
Bed Frame Feels Unstable	Incomplete assembly or loose fasteners.	Review assembly steps and ensure all components are correctly installed and all fasteners are securely tightened.
Mattress Slides	Incorrect mattress size or insufficient friction.	Ensure your mattress is the correct size (140 x 200 cm). If sliding persists, consider using a non-slip mattress pad.
