## 5. SETUP (ASSEMBLY)

The ANCTOR King Size Bed Frame is designed for straightforward assembly. All necessary tools and hardware are included in the single package. It is recommended to assemble the bed frame with two people for optimal ease and safety.

### 5.1 Unpacking and Preparation

1. Carefully open the single box and remove all components. Verify that all parts listed in the installation manual are present.
2. Lay out all parts on a clean, soft surface (like a rug or blanket) to prevent scratches.
3. Familiarize yourself with the hardware and identify each piece according to the manual.

## 5.2 Assembly Steps

Refer to the detailed step-by-step instructions provided in the included Installation Manual. Key steps generally include:

1. Assemble the headboard and footboard sections.
2. Connect the side rails to the headboard and footboard.
3. Install the central support beam and support legs.
4. Place and secure the metal slats onto the frame. Ensure the anti-slip strips on the slats are facing upwards to prevent mattress movement.
5. Attach the power outlet unit to the designated area on the headboard.

**Important:** Do not fully tighten all bolts until all components are loosely assembled. This allows for easier alignment. Once all parts are in place, go back and securely tighten all bolts.

## 6. OPERATING THE STORAGE HEADBOARD

The ANCTOR bed frame features a multi-functional headboard designed for convenience and organization.

### 6.1 Storage Shelf

The headboard includes a built-in shelf, approximately 4.5 inches wide and 4.5 inches high, perfect for storing small personal items such as glasses, mobile phones, tablets, books, or a small alarm clock. This eliminates the need for traditional nightstands, especially in compact spaces.

### 6.2 Integrated Power Outlets and USB Ports

The headboard is equipped with a power strip featuring 2 standard 110V/12A AC outlets and 2 USB ports (5V/2A). A 6.5-foot power cord is provided to connect the unit to a wall outlet. This allows for convenient charging of your electronic devices directly from your bed.

**Note: The integrated power outlet is not a GFCI (Ground Fault Circuit Interrupter) plug. Exercise caution to prevent liquid spills near the outlets.**

## 7. MAINTENANCE

To ensure the longevity and appearance of your ANCTOR bed frame, follow these maintenance guidelines:

- **Cleaning:** Wipe down the metal and laminated wood surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners. For the upholstered headboard, use a fabric cleaner suitable for the material, spot cleaning as needed.
- **Tightening Hardware:** Periodically (every 3-6 months) check all bolts and screws to ensure they remain tight. Loose hardware can lead to instability and noise.
- **Weight Distribution:** Avoid concentrating heavy loads on one area of the bed frame. Distribute weight evenly across the mattress.
- **Under-Bed Storage:** The 10.6-inch clearance provides ample space for storage. Utilize storage bins or boxes to keep items organized and prevent dust accumulation under the bed.

## 8. TROUBLESHOOTING

If you encounter any issues with your ANCTOR bed frame, refer to the following common solutions:

- **Noise/Squeaking:**
  - Ensure all bolts and screws are securely tightened. Loose connections are the most common cause of noise.
  - Check that the metal slats are properly seated and not rubbing against the frame.
- **Instability/Wobbling:**
  - Re-check all connections and tighten any loose hardware.
  - Verify that the bed frame is on a flat, level surface. Adjust leg levelers if applicable.
- **Mattress Sliding:**
  - The bed frame's slats are designed with anti-slip strips. Ensure these strips are facing upwards.
  - Verify that your mattress size (King: 76 x 80 inches) is compatible with the bed frame to minimize gaps.
- **Power Outlets Not Working:**
  - Ensure the power cord is securely plugged into both the headboard unit and a functioning wall outlet.
  - Check the circuit breaker in your home if other outlets are also not working.
