- LCD Screen:** Displays recording status, time, file name, and battery level.
- REC Button:** Short press to start recording.
- Play/Pause Button:** To play or pause recordings.
- Stop Button:** To stop recording or playback.
- Volume Buttons (VOL+/VOL-):** Adjust playback volume.
- Menu Button:** Access device settings.
- Power Button:** Turn the device on/off.

- **USB-C Port:** For charging and data transfer.
- **Headphone Jack (3.5mm):** For audio output.
- **Microphone:** Built-in high-sensitivity omnidirectional microphone.

SETUP

1. Charging the Device

Before first use, fully charge the voice recorder. Connect the supplied USB-C cable to the device and a power source (e.g., computer USB port or a USB wall adapter). The battery indicator on the LCD screen will show charging status.

Charging & File Transfer

- 1 Android/iphone file transfer using OTG adapter (not in the package)
- 2 Transfer files/download music/delete files using our configured USB connection to the computer

Image: Connecting the recorder for charging and data transfer.

2. Initial Power On

Press and hold the **Power** button for a few seconds until the LCD screen lights up. The device will boot up and display the main interface.

OPERATING INSTRUCTIONS

1. One-Button Recording

To start recording, simply short press the **REC** button. The device will begin recording immediately. To stop and save the recording, press the **STOP** button.

2. AVR (Voice Activated Recording)

The AVR function allows the recorder to automatically start recording when sound is detected and pause when silence occurs, saving storage space. To activate AVR:

1. Navigate to the settings menu using the **Menu** button.
2. Select 'AVR Mode' or 'Voice Activated Recording'.
3. Choose your desired sensitivity level.
4. Exit the menu. The device will now record only when sound is present.

AVR Voice Activation Recording

Activate recording after detecting sound, when the sound stops recording will also stop

Automatic recording data splitting and saving

3. Playback

To play a recorded file:

1. From the main screen, use the navigation buttons to select the desired recording.
2. Press the **Play/Pause** button to start playback.
3. Adjust the volume using the **VOL+** and **VOL-** buttons.

4. Press the **Stop** button to end playback.

4. File Management and Transfer

You can easily transfer recorded files to your computer or smartphone.

Transfer to Computer:

Connect the recorder to your computer using the provided USB-C cable. The device will appear as a removable disk. You can then drag and drop files to and from the recorder.

Fast File Transfer

Connect the supplied type-c cable to your computer, a removable disk will pop up, then you can easily transfer your files over it

Image: Fast file transfer from the recorder to a computer.

Transfer to Smartphone (OTG):

Using an OTG adapter (not included), you can connect the recorder directly to your Android or iPhone for file transfer.

5. Password Protection

To protect your recordings, you can set a password for the device:

1. Go to the settings menu.

2. Select 'Password Setting'.
3. Follow the on-screen prompts to set your desired password.

6. MP3 Player Function

The device can also function as an MP3 player. Transfer MP3 or WAV music files to the recorder's memory. Connect headphones to the 3.5mm jack for private listening or use the built-in speaker.

Image: Using the recorder as an MP3 player with headphones.

7. Timed Auto Recording

Set a specific time for the recorder to start and stop recording automatically. This feature is useful for scheduled events.

1. Access the settings menu.
2. Find 'Timed Recording' or 'Auto Record'.
3. Set the start time, end time, and frequency (e.g., once, daily).

8. A-B Repeat

During playback, you can mark a starting point (A) and an ending point (B) to repeatedly play a specific segment of an audio file. This is useful for language learning or transcribing.

1. During playback, press the 'A-B' button once to set point A.
2. Press the 'A-B' button again to set point B. The segment between A and B will loop.
3. Press 'A-B' a third time to exit repeat mode.

9. Noise Cancellation

The recorder features a high-sensitivity omnidirectional microphone and advanced noise cancellation technology to ensure clear audio capture even in noisy environments. This feature is typically active by default or can be adjusted in the settings.

Directional Microphone

With 360° of 2 high-performance directional microphones and noise-canceling UPC, compact body, high-quality recording

3072kbps

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the device. Avoid liquid cleaners or abrasive materials.
- **Storage:** Store the recorder in a cool, dry place away from direct sunlight, extreme temperatures, and humidity.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge it regularly, even if not in use for

extended periods.

- **Avoid Impact:** Do not drop or subject the device to strong impacts, as this may damage internal components.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Device does not turn on.	Low battery; device frozen.	Charge the device for at least 30 minutes. If still unresponsive, try a hard reset (refer to manual for specific reset instructions if available, otherwise hold power button for 10-15 seconds).
Poor recording quality.	Microphone obstructed; too far from sound source; high background noise; incorrect settings.	Ensure microphone is clear. Place device closer to the sound source. Check noise cancellation settings. Record in a quieter environment.
Cannot transfer files to computer.	Faulty USB cable; incorrect connection; driver issue.	Try a different USB-C cable. Ensure the cable is securely connected to both the device and the computer. Try a different USB port on your computer. Restart both devices.
Recordings are not saving.	Memory full; device malfunction.	Check available memory space and delete unnecessary files. If the issue persists, contact customer support.

SPECIFICATIONS
