2. Selecting Tones and Rhythms

The keyboard features 200 different tones (instrument sounds) and 200 rhythms (backing tracks). Use the dedicated buttons or numeric keypad on the control panel to select your desired tone or rhythm. The LED display will show the current selection.

3. Teaching Function

Engage the teaching function to assist with learning songs. Refer to the on-screen prompts on the LED display and the specific instructions for the teaching modes (e.g., One-Key, Follow, Ensemble).

4. Record and Playback

The record function allows you to capture your performances. Press the **RECORD** button to start recording, play your piece, and then press **PLAY** to listen back. This feature is useful for reviewing your progress and layering sounds.

5. Auxiliary Input (AUX IN)

Connect an external audio device (e.g., smartphone, MP3 player) to the **AUX IN** jack on the rear panel using a 3.5mm

audio cable. This allows you to play along with your favorite songs through the keyboard's speakers.

6. USB and MIDI Connectivity

The keyboard supports USB and MIDI connectivity. Use the **USB** port to connect to a computer for MIDI data transfer, allowing the keyboard to function as a MIDI controller with compatible software. The **MIDI** port provides traditional MIDI IN/OUT capabilities.

MAINTENANCE

1. Cleaning

To clean the keyboard and accessories, use a soft, dry cloth. For stubborn marks, a slightly damp cloth with mild soap can be used, followed by a dry cloth. Avoid using abrasive cleaners, solvents, or excessive moisture, as these can damage the finish and internal components.

2. Storage

When not in use, store the keyboard kit in a cool, dry place away from direct sunlight, extreme temperatures, and high humidity. If storing for an extended period, remove any batteries to prevent leakage.

3. Battery Replacement

If using batteries, replace them when the keyboard's performance degrades or it fails to power on. Refer to the battery compartment for the correct battery type and polarity. Always use new batteries of the same type and replace all batteries at once.

TROUBLESHOOTING

Problem	Possible Cause	Solution

No sound from speakers	Volume too low, headphones connected, internal speaker issue.	Increase volume. Disconnect headphones. Check if a tone is selected.
Keys not responding	Keyboard mode issue, internal fault.	Restart the keyboard. Ensure no specific mode (e.g., teaching mode) is preventing normal play.
