## 2. SETUP

### 2.1 Unpacking

Carefully remove the kitchen scale from its packaging. Ensure all components, including the scale unit and USB charging cable, are present. Remove any protective films from the stainless steel platform and LCD

display.

## 2.2 Power Supply

The Ultrean K125H scale offers dual power options:

- **Built-in Lithium Battery:** The scale features a rechargeable lithium battery. Connect the included USB cable to the scale's charging port and a compatible USB power source (e.g., wall adapter, computer USB port) to charge. A red indicator light will typically show during charging.
- **AAA Batteries:** For alternative power, the scale can also operate on two AAA batteries (included). Open the battery compartment on the underside of the scale and insert the batteries, ensuring correct polarity.

## 3. OPERATING INSTRUCTIONS

---

### 3.1 Turning On/Off

- **To Turn On:** Press the **Z/T ON/OFF** button. The LCD display will light up and show '0' when ready.
- **To Turn Off:** Press and hold the **Z/T ON/OFF** button for a few seconds. The scale will also automatically shut off after 120 seconds of inactivity to conserve power.

### 3.2 Unit Conversion

The scale supports six units of measurement. To switch between units (g, kg, lb, oz, ml, milk), press the **UNIT** button repeatedly until your desired unit is displayed.

### 3.3 Tare Function

The Tare function allows you to weigh multiple ingredients in the same container without recalculating. It subtracts the weight of the container or previously added ingredients.

1. Place an empty container on the scale.
2. Press the **Z/T ON/OFF** button. The display will reset to '0'.
3. Add your first ingredient. The display will show its weight.
4. To add another ingredient, press the **Z/T ON/OFF** button again to reset the display to '0', then add the next ingredient. Repeat as needed.

## 3.4 Weighing Items

Place the item(s) directly onto the stainless steel platform or in a container (using the Tare function). The weight will be displayed on the LCD screen.

# Precise Measurements

Our kitchen scale provides accurate measurements, allowing for precise portion control and recipe accuracy.

## 5. TROUBLESHOOTING

---

- **Scale does not turn on:** Check if the batteries are correctly installed or if the rechargeable battery needs charging.
- **Inaccurate readings:** Ensure the scale is placed on a flat, stable surface. Avoid placing it near strong electromagnetic fields. Recalibrate by turning it off and on, then pressing the Tare button before weighing.
- **Auto-off too fast:** The scale is designed to turn off after 120 seconds of inactivity. This is a power-saving feature.
- **'EEEE' displayed:** The scale is overloaded. Remove items immediately.
