7. TROUBLESHOOTING

If you encounter issues with your EASYTONE X88PRO 13, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No Power / Device Not Turning On	Power adapter not connected or faulty; power outlet issue.	Ensure the power adapter is securely connected to the TV Box and a working power outlet. Try a different outlet.
No Signal on TV Screen	Incorrect HDMI input selected on TV; faulty HDMI cable; TV Box not powered on.	Verify your TV is set to the correct HDMI input. Check HDMI cable connections. Ensure the TV Box is powered on. Try a different HDMI cable.
Remote Control Not Responding	Low or dead batteries; obstruction between remote and TV Box; remote not paired (for some models).	Replace batteries. Ensure no obstructions. Point remote directly at the TV Box. Refer to remote pairing instructions if applicable.
Buffering or Slow Streaming	Weak Wi-Fi signal; slow internet connection; network congestion; too many apps running in background.	Move TV Box closer to router or use Ethernet cable. Check internet speed. Close unused apps. Restart router and TV Box.
Apps Crashing or Not Opening	App compatibility issue; insufficient memory; corrupted app data.	Clear app cache/data (Settings > Apps). Uninstall and reinstall the app. Ensure TV Box firmware is updated via OTA.
