6. CARE AND MAINTENANCE

To maintain the appearance and longevity of your SMIBUY bamboo cabinet, follow these care instructions:

- **Cleaning:** Wipe the cabinet surfaces with a soft, damp cloth. Avoid using abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Moisture:** While bamboo is naturally resistant to moisture, prolonged exposure to excessive humidity or standing water should be avoided. Promptly wipe away any spills.
- **Inspection:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- **Sunlight:** Avoid placing the cabinet in direct sunlight for extended periods, as this may cause fading or discoloration over time.

7. TROUBLESHOOTING

If you encounter any issues with your cabinet, refer to the following common solutions:

Problem	Possible Cause	Solution
Cabinet is wobbly after assembly.	Screws are not fully tightened.	Ensure all screws are tightened securely.
Doors do not align or close properly.	Hinges are not correctly installed or adjusted.	Verify hinge installation. Adjust hinges if necessary to align doors.
Cabinet feels insecure on the wall.	Incorrect wall anchors or improper installation.	Ensure appropriate wall anchors are used for your wall type and that the mounting screws are precisely placed and fully engaged with the cabinet's brackets. Consider using sturdier anchors if needed.
Missing or defective parts.	Manufacturing or packaging error.	Contact SMIBUY customer support immediately for assistance.
