4. SETUP INSTRUCTIONS

Follow these steps to prepare your EVEAGE Q7 pressure washer for use.

4.1 Charging the Battery

Before first use, fully charge the battery. Connect the charger to the battery and plug it into a standard power outlet. The indicator light on the charger will show the charging status. Ensure the battery is fully charged for optimal performance and runtime.

4.2 Assembling the Pressure Washer

1. Attach the extension rod to the main pressure washer gun by twisting it securely.
2. Insert the charged battery into the battery slot on the handle of the pressure washer until it clicks into place.
3. Connect the water pipe to the inlet on the pressure washer gun. Ensure a tight connection to prevent leaks.
4. Attach the water filter to the other end of the water pipe. This filter helps prolong the service life of the machine by preventing dirt and sand from entering.

MULTI-SCENE APPLICATION

4.3 Connecting to a Water Source

The EVEAGE Q7 offers flexible water source options:

- **Bucket/Container:** Place the end of the water pipe with the filter into a bucket or container filled with water. The pressure washer will draw water from this source.
- **Faucet Connection:** Use the universal faucet adapter to connect the water pipe directly to a garden hose or outdoor faucet.

5. OPERATING INSTRUCTIONS

Learn how to effectively use your EVEAGE Q7 pressure washer for various cleaning tasks.

5.1 Powering On/Off

Press the power button on the handle to turn the unit on. The display will show the current battery level. Press the button again to turn it off.

5.2 Adjusting Pressure Modes

The EVEAGE Q7 features three pressure modes to suit different cleaning needs. Press the mode button on the display to cycle through the options:

3 PRESSURE MODES

- **0° (Direct Injection):** For concentrated, powerful cleaning on stubborn dirt.
- **20° (High Pressure Spray):** A balanced spray for general cleaning tasks.
- **45° (Wide Spray):** For broader coverage and rinsing.

5.4 Using the Foam Pot

Attach the foam pot to the pressure washer gun for applying soap or detergent. Fill the pot with your desired cleaning solution, then attach it and operate the washer. The foam pot helps create a rich lather for effective cleaning.

5.5 Multi-Scene Application

The EVEAGE Q7 is versatile for various cleaning scenarios:

Water Filter

The water inlet is equipped with a filter device to prolong the service life

No filtering

Dirt, sand get into the damaged machine

- **Car Washing:** Effectively clean cars, bicycles, and motorcycles.
- **Home Cleaning:** Clean garden floors, walls, windows, and outdoor furniture.
- **Gardening:** Can be used to water flowers or clean garden tools.
- **Food Cleaning:** Gentle enough for cleaning certain food items (use appropriate pressure mode).

6. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your pressure washer.

- **Clean the Water Filter:** Periodically remove and clean the water filter to prevent blockages and ensure proper water flow. Rinse it under running water to remove any debris.
- **Drain Water:** After each use, disconnect the water supply and run the pressure washer briefly to drain any remaining water from the pump and hose. This prevents freezing damage in cold weather.
- **Battery Care:** Store the battery in a cool, dry place. Do not store a fully discharged battery for extended periods.

Recharge it periodically if not in use.

- **Clean the Unit:** Wipe down the exterior of the pressure washer with a damp cloth. Do not use harsh chemicals.
- **Storage:** Store the pressure washer and all accessories in the provided storage case in a dry, protected area.

7. TROUBLESHOOTING

If you encounter issues with your EVEAGE Q7 pressure washer, refer to the following common problems and solutions.

Problem	Possible Cause	Solution
Unit does not turn on	Battery not charged or improperly inserted	Ensure battery is fully charged and correctly inserted.
Low water pressure	• Clogged water filter • Insufficient water supply • Air in the pump	• Clean the water filter. • Ensure adequate water source (e.g., full bucket, open faucet). • Run the unit without the nozzle attached until a steady stream of water emerges to purge air.
Water leaks from connections	Loose connections or worn O-rings	Tighten all connections. Check and replace O-rings if damaged.
Motor runs but no water sprays	• No water supply • Clogged nozzle	• Check water source. • Clean the nozzle opening.
