7. Maintenance

Regular maintenance ensures optimal performance and extends the life of your steam cleaner.

1. **Empty Water Tank:** After each use, allow the unit to cool completely. Carefully open the water tank cap and drain any remaining water.
2. **Clean Accessories:** Wash removable accessories with warm, soapy water and rinse thoroughly. Allow them to dry completely before storing.
3. **Wipe Down Unit:** Wipe the exterior of the steam cleaner with a damp cloth. Do not use abrasive cleaners.
4. **Descaling (Optional):** If you notice reduced steam output or mineral buildup, descaling may be necessary. Consult the manufacturer for recommended descaling procedures or solutions.
5. **Storage:** Store the steam cleaner and its accessories in a cool, dry place, away from direct sunlight and extreme temperatures.

8. Troubleshooting

If you encounter issues with your steam cleaner, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No steam or low steam output	Water tank empty; Unit not heated sufficiently; Mineral buildup; Nozzle clogged.	Refill water tank; Allow 10 seconds for heating; Descale unit; Clean nozzle.
Water leaking from nozzle	Unit not fully heated; Condensation.	Allow unit to heat completely before use; This is normal during initial steam production.
Power indicator light not on	Unit not plugged in; Power switch off; Power outage.	Check power connection; Turn power switch on; Check household circuit breaker.

If the problem persists after trying these solutions, please contact customer support.
