## igloohome SP3-R

# igloohome Padlock Lite Keyless Fingerprint Padlock User Manual

Model: SP3-R

## INTRODUCTION

This manual provides essential information for the proper setup, operation, and maintenance of your igloohome Padlock Lite. Please read these instructions carefully before using the device to ensure optimal performance and longevity.

## SETUP

### 1. Unboxing and Initial Charge

Upon unboxing, ensure all components are present: the igloohome Padlock Lite and a USB-C to C charging cable. It is recommended to fully charge the padlock before its first use. Connect the provided USB-C cable to the charging port located at the bottom of the padlock and to a compatible power source.

**Water & dust  
resistant.  
IPX6**

Image: Close-up view of the igloohome Padlock Lite in black, highlighting the USB-C charging port and indicating its IPX6 water and dust resistance.

## 2. App Installation and Device Pairing

Download the official igloohome app from your device's app store (iOS or Android). Create an account or log in. Follow the in-app instructions to add your new Padlock Lite. This typically involves selecting 'Add Lock or Device' and allowing the app to search for nearby igloohome devices via Bluetooth. Once detected, select 'Padlock Lite' and proceed with pairing.

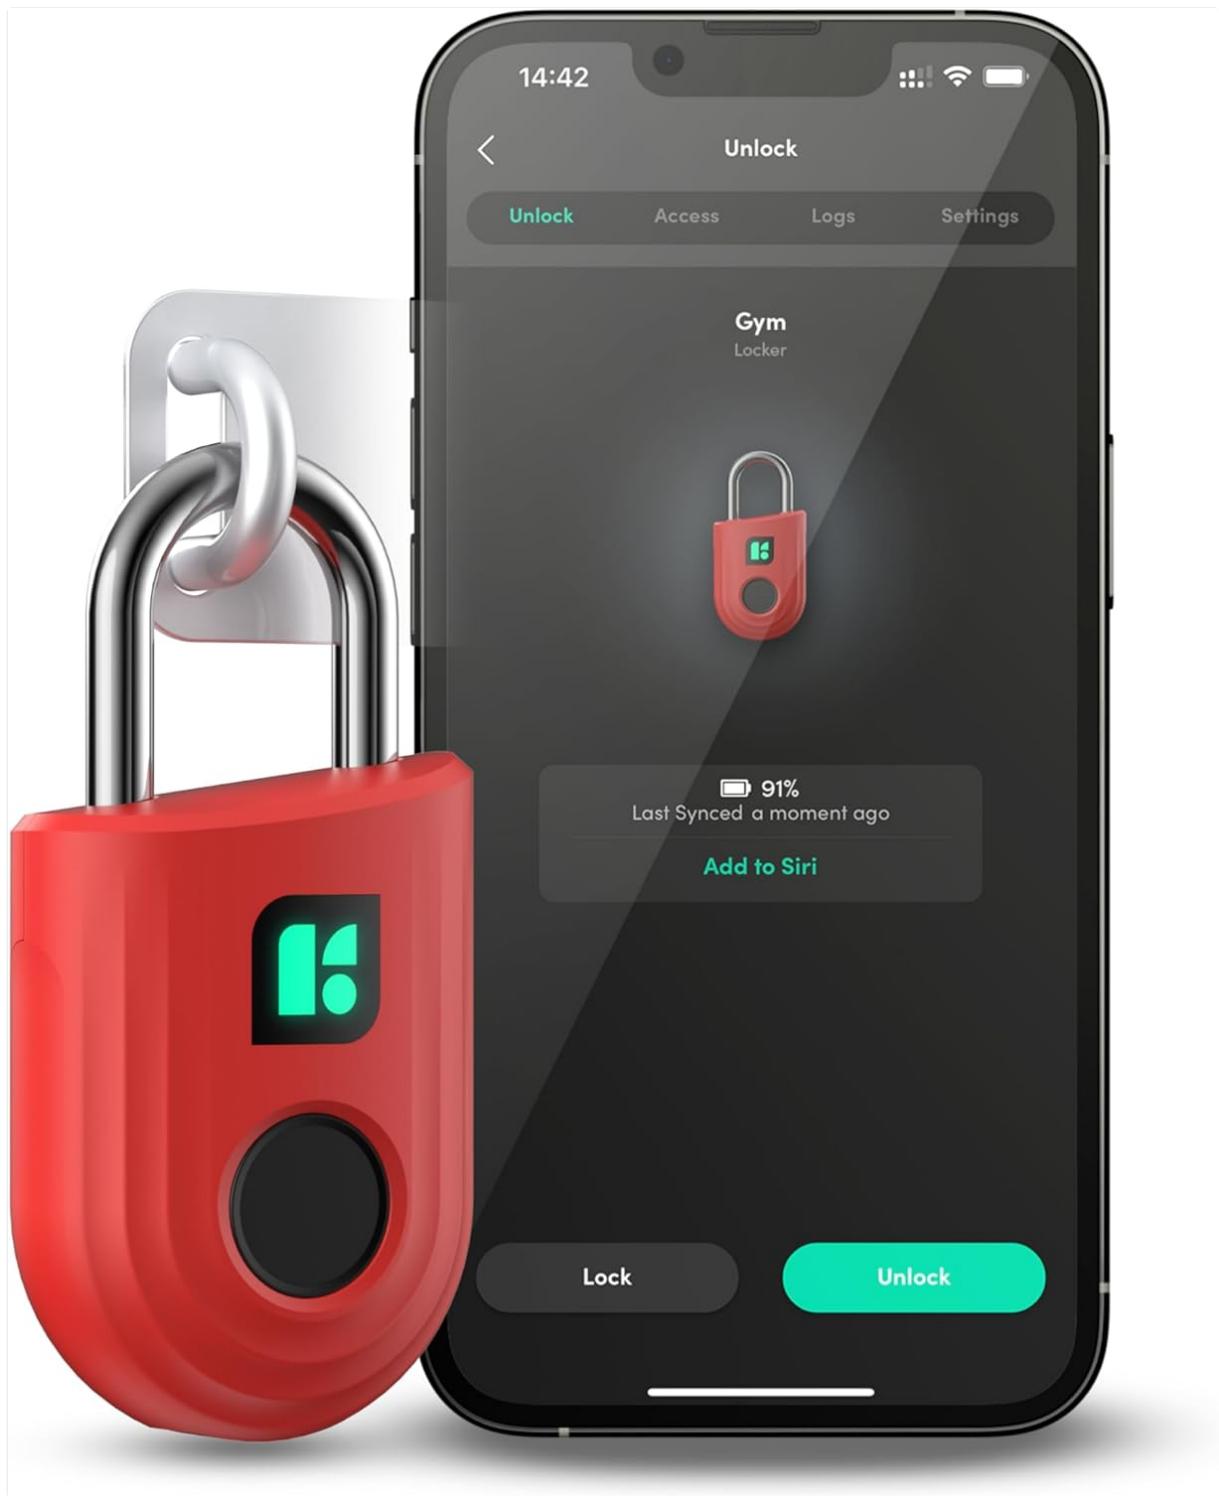

Image: The red igloohome Padlock Lite positioned beside a smartphone showing the igloohome mobile application interface, ready for unlocking.

### 3. Fingerprint Registration

After successful pairing, navigate to the 'Access' section within the app to register fingerprints. Select 'Add Fingerprint' and follow the on-screen prompts to place your finger on the padlock's sensor multiple times from different angles. Ensure your finger is clean and dry for optimal registration. Up to 10 fingerprints can be registered.

# Unlock with your fingerprint.

Image: A human finger is shown interacting with the circular fingerprint sensor on the red igloohome Padlock Lite, demonstrating the biometric access method.

## OPERATING INSTRUCTIONS

### 1. Unlocking with Fingerprint

To unlock the padlock using a registered fingerprint, simply place your registered finger firmly on the fingerprint sensor. The padlock will emit an audible click and the LED indicator will turn green, signifying successful unlocking. The shackle will then release.

### 2. Unlocking with Mobile App

Open the igloohome app on your smartphone. Ensure Bluetooth is enabled and your phone is within range of the padlock. Select your Padlock Lite from the list of devices. Tap the 'Unlock' button on the app screen. The padlock will unlock, and the app will confirm the action.

### 3. Automatic Locking

The igloohome Padlock Lite features automatic locking. Once the shackle is fastened back into the padlock body, it will automatically lock itself without requiring manual intervention.

#### 4. Managing Access (Bluetooth Keys)

The igloohome app allows you to grant and revoke access to others. From the 'Access' tab, you can create Bluetooth Keys for guests, allowing them to unlock the padlock using their own igloohome app. You can set specific durations or permanent access for these keys. You can also add or remove additional fingerprints for other users.

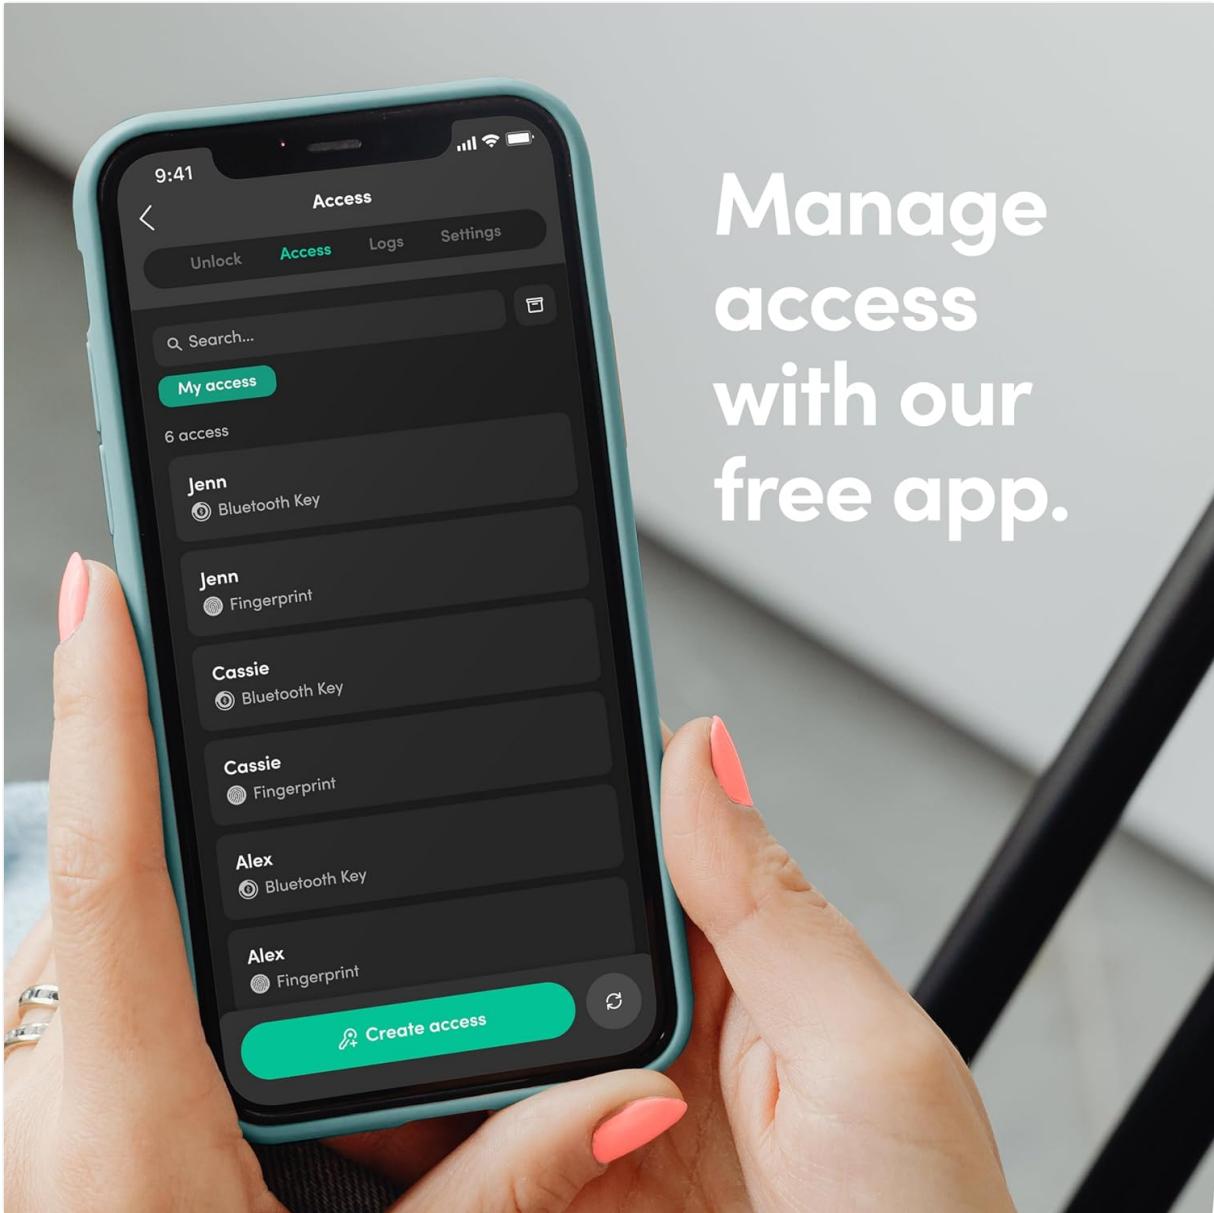

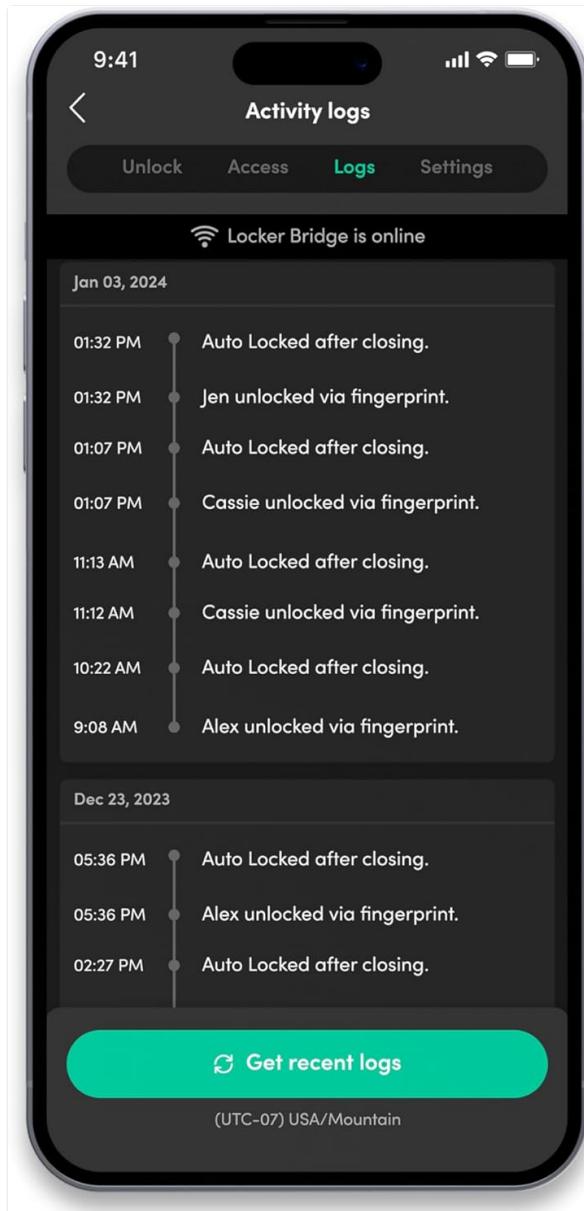

Image: A user's hands are shown holding a smartphone, which displays the igloohome app's 'Access' screen, listing various users and their access types (Bluetooth Key, Fingerprint).

#### 5. Activity Logs

The igloohome app maintains a detailed activity log, recording all unlock and lock events, including the method used (fingerprint, app) and the timestamp. This feature provides a comprehensive history of padlock usage. Access the 'Logs' tab in the app to view this information.

# Know who, know when with activity logs.

Image: A smartphone screen shows the igloohome app's 'Activity logs' interface, detailing various lock and unlock events with timestamps and methods.

## 6. Apple Watch Integration

For added convenience, the igloohome Padlock Lite supports integration with Apple Watch via Siri Shortcuts. This allows for quick unlocking using your Apple Watch, which can be particularly useful when your hands are occupied or wet.

# Wearable Access with Apple Watch.

## MAINTENANCE

### 1. Charging the Padlock

The Padlock Lite is equipped with a rechargeable Lithium-Ion battery. To charge, connect the provided USB-C cable to the charging port. A full charge typically provides up to 6 months of battery life. The LED indicator will show charging status.

### 2. Low Battery Alerts and Emergency Jumpstart

The igloohome app will provide low battery alerts. In case the battery is completely drained, the padlock can be instantly jumpstarted using a Type-C cable connected to any 5V 0.5A power source (e.g., smartphone, power bank, laptop). This allows temporary power to unlock the device and then fully recharge it.

### 3. Water and Dust Resistance

The Padlock Lite is IPX6 water and dust resistant, designed to withstand splashes and jets of water. While it can endure various weather conditions, it is not intended for prolonged submersion.

# Water & dust resistant. IPX6

Image: Close-up view of the igloohome Padlock Lite in black, highlighting the USB-C charging port and indicating its IPX6 water and dust resistance.

## TROUBLESHOOTING

- Fingerprint Not Recognized:** Ensure your finger is clean and dry. Try re-registering the fingerprint if the issue persists.
- App Connectivity Issues:** Verify Bluetooth is enabled on your smartphone and the padlock is within range. Restart the app or your phone if necessary.
- Padlock Not Responding:** Check the battery level in the app. If the battery is low or drained, perform an emergency jumpstart using a USB-C cable.
- Security Lockout:** If multiple incorrect access attempts are made, the padlock may enter a security lockout state. Wait for the lockout period to expire or use the app to reset.

For further assistance, please refer to the official igloohome support channels or the comprehensive user manual available on their website.

## SPECIFICATIONS

Feature	Detail
Water & dust resistance	IPX6

Model	SP3-R (Padlock Lite)
Dimensions (L x W x H)	3 x 2.2 x 1.5 inches (76.2 x 55.9 x 38.1 mm)
Weight	1.6 ounces (45.36 grams)
Material	Alloy Steel, Aluminum
Lock Type	Biometric, Padlock
Special Features	Fingerprint, Rechargeable, Water Resistant (IPX6)
Battery	1 Lithium Ion battery (included), up to 6 months life
Charging Port	USB-C
Connectivity	Bluetooth
Controller Type	Amazon Alexa, Android, iOS
