PRODUCT FEATURES

- **Durable Construction:** Made from heavy-duty, food-grade stainless steel, designed for long-lasting use.
- **Enhanced Thickness:** Features solid rod bars with a 7MM diameter, thicker than standard 5MM grates, providing increased durability and resistance to deformation.
- **Corrosion and Heat Resistant:** The stainless steel material offers excellent resistance to corrosion and high temperatures, ensuring consistent performance.
- **Easy to Clean:** Smooth surface design facilitates quick and easy cleaning with a grill brush, reducing maintenance time.
- **Improved Grilling Performance:** Designed to provide excellent heat retention and even cooking, contributing to professional sear marks.

INSTALLATION

Installing the Adviace Grill Replacement Parts is a straightforward process. Ensure your grill is cool and disconnected from its fuel source before beginning.

1. **Remove Old Grates:** Carefully lift and remove the existing cooking grates from your grill.
2. **Clean Grill Interior:** It is recommended to clean any debris or residue from the grill's interior, including burner covers and the firebox, before installing new grates.
3. **Place New Grates:** Position the new Adviace grill grates into the designated slots within your grill. Ensure they sit evenly and securely.
4. **Verify Fit:** Gently press down on each grate to confirm it is properly seated and does not wobble.

MAINTENANCE AND CLEANING

The stainless steel construction of these grates simplifies maintenance. Regular cleaning will prolong their lifespan and ensure hygienic cooking.

- **After Each Use:** Clean the grates with a grill brush while they are still warm (but not excessively hot) to remove food residue.
- **Deep Cleaning:** For more thorough cleaning, the grates can be washed with warm soapy water and a non-abrasive sponge. Rinse thoroughly and dry completely before storing or re-installing.
- **Avoid Abrasives:** Do not use harsh abrasive cleaners or steel wool, as these can scratch the stainless steel surface.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Grates wobble after installation.	Grates not fully seated or incorrect model fit.	Ensure grates are pushed down firmly into their supports. Double-check your grill model number against the compatibility list.
Food sticking to grates.	Insufficient preheating or lack of seasoning/oiling.	Always preheat the grill thoroughly. Lightly oil the grates before placing food, especially for the first few uses.
Grates appear discolored.	Normal heat discoloration or food residue.	This is typically normal for stainless steel under high heat. Regular cleaning will remove most food-related discoloration.
