1. INTRODUCTION

Thank you for choosing the Afloia Dog Nail Grinder LM1. This device is designed to provide a safe and efficient way to trim your pet's nails, featuring a vacuum suction function to minimize mess. Please read this manual thoroughly before first use to ensure proper operation and maintenance.

2. IMPORTANT SAFETY INFORMATION

- **Read all instructions:** Before operating the device, familiarize yourself with all instructions and warnings.
- **Keep out of reach of children:** This product is not a toy. Store it in a secure location away from children.
- **Pet supervision:** Always supervise your pet during nail grinding. Do not leave the device unattended with pets.
- **Avoid water:** The device is not water-resistant. Do not immerse it in water or use it in wet conditions.
- **Proper use:** Use the device only for its intended purpose of grinding pet nails.
- **Inspect before use:** Before each use, inspect the grinding head and device for any damage. Do not use if damaged.
- **Avoid over-grinding:** Do not grind too much of the nail at once, as this can cause pain or injury to your pet. Grind in short intervals.
- **Charging:** Use only the provided charging cable. Do not attempt to charge with incompatible chargers.

3. PACKAGE CONTENTS

Upon unpacking, please ensure all items are present and in good condition:

- Afloia Dog Nail Grinder LM1
- USB Charging Cable
- User Manual
- (Possibly basic accessories, depending on package)

4. PRODUCT OVERVIEW

Familiarize yourself with the components of your Afloia Dog Nail Grinder LM1:

1. **Grinding Head:** The rotating abrasive surface for nail trimming.
2. **Protective Cap:** Covers the grinding head, often with different sized openings for various nail sizes.
3. **Power Button/Speed Control:** Turns the device on/off and adjusts grinding speed.
4. **Vacuum Suction Port:** Collects nail dust during operation.
5. **Charging Port:** For connecting the USB charging cable.
6. **Indicator Light:** Shows charging status or power level.

Image 1: Afloia Dog Nail Grinder LM1. This image displays the main unit of the nail grinder, highlighting its compact design and the grinding head with its protective cap.

5. CHARGING THE DEVICE

Before first use, fully charge the nail grinder. A full charge typically takes 2-3 hours.

1. Connect the small end of the USB charging cable to the charging port on the grinder.
2. Connect the larger end of the USB cable to a compatible USB power adapter (not included) or a computer's USB port.
3. The indicator light will illuminate (e.g., red) during charging and change color (e.g., green or turn off) when fully charged.
4. Disconnect the charger once fully charged.

6. SETUP AND PREPARATION

Proper preparation ensures a smooth and stress-free grooming experience for your pet.

1. **Acclimate your pet:** Allow your pet to sniff and investigate the grinder while it's off. Turn it on briefly to let them get used to the sound and vibration. Reward calm behavior.
2. **Choose the right opening:** Select the appropriate opening on the protective cap based on your pet's nail size. For larger nails, you might use the entire grinding head without the cap.
3. **Ensure a firm grip:** Hold your pet's paw firmly but gently, isolating the nail you intend to grind.

7. OPERATING INSTRUCTIONS

Follow these steps for safe and effective nail grinding:

1. **Turn on the grinder:** Press the power button. If there are multiple speeds, select a lower speed initially, increasing as your pet tolerates it.
2. **Grind the nail:** Gently place your pet's nail into the chosen opening of the protective cap or against the grinding head. Apply light pressure.
3. **Short intervals:** Grind for only 3-5 seconds at a time, then remove the nail to prevent overheating and to check your progress.
4. **Check the quick:** Be mindful of the "quick" (the pink part of the nail containing blood vessels and nerves). Avoid grinding into it. If you accidentally hit the quick, apply styptic powder to stop bleeding.
5. **Shape the nail:** Grind the nail from the bottom up, then from the sides, to achieve a smooth, rounded edge.
6. **Repeat for all nails:** Continue this process for all nails, taking breaks if your pet becomes stressed.
7. **Turn off:** Once finished, turn off the grinder and reward your pet.

Tip: The integrated vacuum suction will collect most of the nail dust, keeping your grooming area cleaner.

8. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the life of your grinder.

1. **Turn off and unplug:** Always ensure the device is turned off and unplugged before cleaning.
2. **Clean the grinding head:** Use a soft brush (often included) to gently brush away any nail dust from the grinding head.

- 3. **Empty the dust collection chamber:** If your model has a removable dust collection chamber, empty it after each use.
- 4. **Wipe the body:** Use a dry or slightly damp cloth to wipe the body of the grinder. Do not use harsh chemicals or abrasive cleaners.
- 5. **Storage:** Store the grinder in a dry, cool place, away from direct sunlight and moisture.

9. TROUBLESHOOTING

Problem	Possible Cause	Solution
Grinder does not turn on.	Battery is low or depleted.	Charge the device fully.
Grinding head slows down or stops.	Excessive pressure applied; battery low; grinding head clogged.	Apply lighter pressure; charge the device; clean the grinding head.
Vacuum suction is weak.	Dust collection chamber is full or clogged.	Empty and clean the dust collection chamber.
Device gets hot during use.	Prolonged continuous use.	Allow the device to cool down between grinding sessions. Grind in short intervals.

10. SPECIFICATIONS

- **Model:** LM1
- **Brand:** Afloia
- **Material:** Plastic
- **Item Weight:** 0.04 Kilograms
- **Water Resistance Level:** Not Water Resistant
- **Recommended Uses:** Pet Grooming
- **Included Components:** Nail grinder, USB charging cable, user manual (possibly basic accessories)
