Savvies Screen Protector for Philips Essential Airfryer XL HD927X

User Manual

INTRODUCTION

This manual provides detailed instructions for the installation, use, and maintenance of your Savvies SU75 UltraClear Screen Protector, designed specifically for the Philips Essential Airfryer XL HD927X. Please read these instructions carefully before proceeding with installation to ensure optimal results and protection for your device's display.

INSTALLATION GUIDE

Follow these steps for a bubble-free and dust-free application of your screen protector:

- 1. Preparation:** Ensure you are in a dust-free environment, such as a bathroom after a hot shower. Thoroughly clean the display of your Philips Essential Airfryer XL HD927X to remove all dust, fingerprints, and smudges. Use a microfiber cloth for best results.
- 2. Partial Peel:** Carefully peel back about half of the thin cover film (often labeled '1') from the screen protector. Avoid touching the adhesive side.
- 3. Alignment:** Align the exposed adhesive part of the screen protector precisely with the display of your Airfryer. Ensure it is perfectly centered and straight before proceeding.
- 4. Application:** Once aligned, slowly and steadily lower the screen protector onto the display. As you do this, use a credit card or a similar flat, firm object to gently push out any air bubbles from the center outwards. Simultaneously, continue to peel off the remaining cover film from the screen protector.

5. **Final Smoothing:** After the protector is fully applied, use the credit card again to smooth out any remaining small bubbles. Most small bubbles will disappear on their own within 2-3 days.

SMART PROTECTION

Instructions

Anbringungsanleitung

1 Before assembling, locate a dust free area (e.g. bathroom) and carefully remove any dust or dirt from the display.

2 Remove half of the thin cover film of the screen protector and align the screen protector on one side with your screen. Make sure that the screen protector will be centered on the middle of the screen.

3 Cover a credit card with a soft cloth and carefully slide over the screen protector from one side to the other on your screen. Pull off the rest of the cover film at the same time.

4 Brush out any remaining air bubbles with your credit card. Small air bubbles will disappear by themselves within 2-3 days - Done!

3 Streiche die Displayschutzfolie leicht mittels einer, mit weichem Tuch umwickelten, Kreditkarte von einer Seite zur anderen auf das Display. Ziehe dabei gleichzeitig den Rest des Trägermaterial ab.

4 Streiche eventuell vorhandene Lufteinschlüsse mit Hilfe der Kreditkarte seitlich heraus. Kleine Luftblasen verschwinden innerhalb von 2-3 Tagen von selbst - Fertig!

OPERATION WITH SCREEN PROTECTOR

The Savvies SU75 UltraClear Screen Protector is designed to be highly transparent and maintain the

original touch sensitivity of your Philips Essential Airfryer XL HD927X display. Once installed, you should experience no degradation in touch response or display clarity.

- **Clarity:** The film offers 99% clarity, ensuring a clear and genuine presentation of screen content.
- **Touch Sensitivity:** Optimized for touch screens, the protector allows for normal and responsive interaction with your Airfryer's display.

CARE AND MAINTENANCE

To keep your screen protector in optimal condition and ensure continued clarity:

- **Cleaning:** Gently wipe the screen protector with a soft, lint-free cloth. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner.
- **Anti-Fingerprint:** The anti-fingerprint surface helps reduce smudges, making cleaning easier.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners or solvents, as these can damage the protector's surface.

TROUBLESHOOTING

If you encounter issues during or after installation, consider the following:

- **Bubbles:** Small bubbles are common immediately after installation. Most will dissipate naturally within 2-3 days. For larger, persistent bubbles, gently lift the nearest edge of the protector and reapply, pushing the bubble out with a credit card. Ensure the screen is free of dust particles, as these are a common cause of persistent bubbles.
- **Dust Particles:** If dust is trapped under the protector, it will create a visible bubble. Carefully lift the protector near the dust particle using a piece of tape to gently dab and remove the dust, then reapply.
- **Alignment Issues:** If the protector is misaligned, it can be carefully peeled off and repositioned. However, repeated removal and reapplication can reduce adhesive effectiveness and increase the chance of dust.
- **Adhesive Residue:** The special silicone adhesive layer is designed for residue-free removal. If any residue remains, it can usually be wiped away with a soft, damp cloth.

PRODUCT SPECIFICATIONS

Brand	savvies
Compatible Devices	Philips Essential Airfryer XL HD927X
Material	PET, plastic film
Screen Surface Description	Glossy
Clarity	99%
Special Feature	Easy assembly, Anti-Fingerprint, Ultra Clear
