oneisall LM5

oneisall Dog Hair Vacuum & Dog Grooming Kit Instruction Manual

Model: LM5

Introduction

Thank you for choosing the oneisall Dog Hair Vacuum & Grooming Kit. This versatile system is designed to make pet grooming and home cleaning more efficient and mess-free. It effectively collects 99% of pet hair directly into a vacuum canister, reducing shedding around your home. This manual provides essential information for the proper setup, operation, and maintenance of your new grooming kit.

Product Components

Your oneisall Dog Hair Vacuum & Grooming Kit includes the following components:

- Main Vacuum Unit with 1.5L Dust Box
- Flexible Hose
- Grooming Brush (Slicker Brush)
- De-shedding Tool
- Nozzle Head (Crevice Tool)
- Cleaning Brush (for clothes/surfaces)

- Power Adapter
- Spare Filter

Setup Instructions

Follow these steps to set up your oneisall Dog Hair Vacuum & Grooming Kit:

1. **Unpack Components:** Carefully remove all components from the packaging.
2. **Connect Hose:** Insert one end of the flexible hose firmly into the suction port on the main vacuum unit. Ensure it clicks securely into place.
3. **Attach Grooming Tool:** Select the desired grooming tool (e.g., grooming brush or de-shedding tool) and attach it to the other end of the flexible hose. Press firmly until it locks.
4. **Connect Power:** Plug the power adapter into the main vacuum unit and then into a standard electrical outlet.
5. **Power On:** Press the power button on the main unit to turn on the device. You can select from three adjustable suction levels.

Operating Instructions

The oneisall grooming kit offers various functions for comprehensive pet care and home cleaning.

Pet Grooming and De-shedding

Use the grooming brush or de-shedding tool for regular pet grooming. The vacuum suction collects loose hair directly, preventing it from spreading around your home. Start with the lowest suction setting to acclimate your pet, especially if they are sensitive to noise. The device operates at a low noise level (around 60dB) to minimize pet anxiety.

Image: A woman gently grooming a golden retriever with the oneisall vacuum, emphasizing the low noise design that helps reduce pet nervousness, with a graphic showing comparative noise levels.

The grooming brush features safe metal points designed to effectively remove loose hair and undercoat without harming your pet's skin. For thick-coated pets, the de-shedding tool is particularly effective.

Image: A detailed view of the grooming brush head, highlighting its super suction capability and safe metal points designed for effective and gentle hair removal.

Household Cleaning

The nozzle head (crevice tool) and cleaning brush are ideal for picking up pet hair from carpets, sofas, floors, and other surfaces. The powerful suction ensures thorough cleaning.

Suction Levels

The device features 3 adjustable suction levels:

- **Gear 1 (Quiet):** Ideal for sensitive pets or cats, providing gentle suction.
- **Gear 2 (Comfortable):** Suitable for most dogs, offering balanced suction and noise.
- **Gear 3 (Powerful):** For effective de-shedding and household cleaning, providing maximum suction.

Maintenance

Regular cleaning and maintenance will ensure the longevity and optimal performance of your oneisall grooming kit.

Emptying the Dust Box

The transparent 1.5L dust box allows you to monitor the hair level. To empty:

1. Ensure the unit is powered off and unplugged.
2. Detach the dust box from the main unit.
3. Open the dust box and dispose of the collected pet hair.
4. Reattach the dust box securely to the main unit.

Cleaning the Filter

The washable filter should be cleaned regularly to maintain suction power. A spare filter is included for convenience.

1. Remove the filter from the dust box.
2. Rinse the filter under running water until clean.
3. **Important:** Allow the filter to air dry completely before reinstallation. Do not use the unit with a wet filter.

Image: A series of images demonstrating the easy disassembly of the dust box, the process of emptying collected pet hair, and the simple method of washing the filter under water. A note advises to dry the filter thoroughly before reinstallation.

Troubleshooting

If you encounter any issues with your oneisall grooming kit, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No power	Not plugged in; power outlet issue; power button not pressed.	Ensure power adapter is securely plugged into unit and outlet. Try a different outlet. Press the power button.
Weak suction	Dust box full; filter clogged; hose/attachment blocked.	Empty dust box. Clean or replace filter. Check hose and attachments for blockages.
Attachments not staying on	Not securely attached; worn connection.	Ensure attachments are pushed firmly onto the hose until they click. If worn, contact customer support.
Unusual noise	Blockage in hose/unit; foreign object.	Turn off and unplug the unit. Check for and remove any foreign objects or blockages in the hose or main unit.
