2. SETUP GUIDE

2.1 Initial Charging

Before installation, ensure the doorbell camera is fully charged using the provided Type-C USB cable. A full charge typically provides up to 6 months of battery life, depending on usage.

2.2 App Download and Account Creation

1. Download the WUUK app from your device's app store (iOS or Android).
2. Open the app and follow the on-screen instructions to create a new account or log in to an existing one.

2.3 Homebase Setup

The Homebase acts as the central hub for your WUUK devices and stores recordings locally.

- **Power On:** Connect the Homebase to a power outlet using the provided adapter.
- **Network Connection:** Connect the Homebase to your router via the Ethernet cable for a stable wired connection, or follow the app instructions to connect it wirelessly to your 2.4/5 GHz WiFi network.

No Monthly Fee

2.4 Doorbell Camera Pairing

1. In the WUUK app, select 'Add Device' and choose the doorbell camera.
2. Follow the app's instructions to pair the doorbell with the Homebase. This typically involves pressing a sync button on both devices.

2.5 Installation Options

The doorbell camera offers flexible installation methods:

- **Wireless (Battery Powered):** Mount the doorbell using the provided screw pack or adhesive tape. Ensure the

location has good WiFi signal strength.

- **Wired:** Connect the doorbell to your existing doorbell wiring (8~24VAC) for continuous power and charging. This eliminates the need for manual battery recharging.

3. OPERATING INSTRUCTIONS

3.1 Using the WUUK App

The WUUK app is your primary interface for managing the doorbell camera system.

- **Live View:** Access real-time video feed from your doorbell camera.

- **Event Log:** Review recorded motion events and doorbell rings.
- **Settings:** Adjust camera sensitivity, detection zones, notification preferences, and other device settings.

3.2 Motion Detection

The doorbell camera features advanced motion detection capabilities:

- **Radar and PIR Sensors:** Distinguish between near and distant objects for accurate detection.
- **Human Detection:** Intelligent algorithms identify human shapes, reducing false alerts from pets or vehicles.
- **Customizable Detection Zones:** Define specific areas within the camera's view to monitor, ignoring irrelevant activity.

Smart Motion Detection

3.5 Smart Home Integration

The WUUK Doorbell Camera is compatible with:

- Amazon Alexa
- Google Home
- IFTTT

Follow the respective app instructions to link your WUUK account for voice control and smart home routines.

4. MAINTENANCE

4.1 Battery Charging

If your doorbell is battery-powered, monitor the battery level in the WUUK app. When low, remove the doorbell from its mount and charge it using the Type-C USB cable. For wired installations, the battery charges automatically.

Energy Saving & Durable

4.2 Cleaning the Camera Lens

Periodically clean the camera lens with a soft, dry cloth to ensure optimal video clarity. Avoid abrasive cleaners.

4.3 Firmware Updates

The WUUUK app will notify you of available firmware updates. It is recommended to install these updates to ensure your system has the latest features and security enhancements.

5. TROUBLESHOOTING

5.1 Connectivity Issues

- **No Connection:** Ensure the Homebase is powered on and connected to your network (either via Ethernet or WiFi). Check your router's internet connection.
- **Weak WiFi Signal:** If the doorbell camera is far from the Homebase or router, consider repositioning the Homebase or using a WiFi extender. The system supports 2.4/5 GHz WiFi.
- **Reboot Devices:** Try rebooting your router, Homebase, and doorbell camera (if battery-powered, remove and reinsert the battery) to resolve temporary glitches.

Stable WiFi Connection

5.2 Motion Detection Inaccuracies

- **Too Many Alerts:** Adjust the motion sensitivity settings in the app. Utilize human detection and customize detection zones to focus on relevant areas and reduce false alarms.
- **Missed Events:** Increase motion sensitivity. Ensure the camera's view is clear and not obstructed.

5.3 Night Vision Performance

If night vision appears dim or unclear, ensure there are no reflective surfaces close to the camera that could interfere with the infrared illumination.
