OPERATING INSTRUCTIONS

Programming the Keys and Knob:

The Dilwe 3-Key Mini Keypad is fully programmable. To customize the functions of the keys and the knob, you will need to use dedicated programming software. This software allows you to assign standard Windows keyboard functions, complex shortcut key combinations, and specific actions to each input.

- **Key Functions:** Each of the three keys can be programmed to perform any standard keyboard function (e.g., A, B, C, Ctrl, Shift, Alt) or a sequence of keys (macros).
- **Knob Functions:** The rotary knob can be programmed for three distinct actions:
 - **Clockwise Rotation:** Assign an action (e.g., volume up, scroll up).
 - **Counter-clockwise Rotation:** Assign an action (e.g., volume down, scroll down).
 - **Press:** Assign an action when the knob is pressed (e.g., mute, play/pause).

Software for Programming: The specific programming software is typically provided by the manufacturer or can be found on their official support website. A common method to find this software is to search online for "Macro Keyboard Tutorial - Download software and program tutorial" which may lead to resources for similar devices. Please refer to the manufacturer's website or included documentation for the exact software download and programming guide.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the keypad. For stubborn dirt, a slightly damp cloth with mild soap can be used, ensuring no liquid enters the device.
- **Avoid Liquids:** Do not expose the keypad to water or other liquids.
- **Storage:** Store the keypad in a cool, dry place away from direct sunlight and extreme temperatures.
- **Cable Care:** Handle the USB cable gently. Avoid bending or twisting it excessively to prevent damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Keypad not recognized by computer	Loose cable connection, faulty USB port, driver issue.	◦ Ensure the USB cable is securely connected to both the keypad and the computer. ◦ Try a different USB port on your computer. ◦ Try connecting the keypad to another computer to rule out a computer-specific issue. ◦ Restart your computer.
Keys or knob not performing assigned functions	Incorrect programming, software not running, software conflict.	◦ Verify the programming settings using the dedicated software. ◦ Ensure the programming software is running in the background if required for custom functions. ◦ Check for updates to the programming software. ◦ Temporarily disable other macro software to check for conflicts.
Keypad is unresponsive	Power issue, software crash.	◦ Disconnect and reconnect the USB cable. ◦ Restart your computer. ◦ If possible, try a different USB cable.
