- **Storage:** Store the vase in a dry place, away from direct sunlight or extreme temperatures, to prevent discoloration or material degradation.

## 7. TROUBLESHOOTING

---

### Common Issues:

- **Pieces do not connect firmly:** Ensure that the blocks are correctly aligned before applying pressure. Sometimes, a slight adjustment in angle can help. Refer to the instruction manual for specific connection points.
- **Vase feels unstable:** Double-check that all base layers are securely interlocked. If necessary,

carefully disassemble the lower sections and reassemble them, ensuring each connection is firm.
