## FODEXAZY ZQ05157

# FODEXAZY 5-in-1 DJ Lights with Stand

Model: ZQ05157

Instruction Manual

## 1. INTRODUCTION

Thank you for choosing the FODEXAZY 5-in-1 DJ Lights with Stand. This versatile lighting system combines five different effects to enhance any party or event: a rotating disco ball, colorful LED par light, red & green pattern light, UV black light, and white LED strobe light. This manual provides essential information for safe operation, setup, and maintenance of your new lighting system.

## 2. SAFETY INFORMATION

- **Power Supply:** Ensure the power supply is within the specified AC110V-240V, 50/60Hz range. Exceeding this range may cause product malfunction.
- **Ventilation:** Do not block the cooling fan or any ventilation openings on the device. Ensure adequate airflow to prevent overheating.
- **Water Exposure:** Keep the device away from water, moisture, and high humidity environments.
- **Heat Sources:** Avoid placing the device near heat sources such as radiators, heat registers, stoves, or other heat-producing appliances.
- **Children:** Keep the device out of reach of children.
- **Laser Safety:** Avoid direct eye exposure to the laser beams. Do not stare directly into the light source.
- **Mounting:** Ensure the stand is stable and securely assembled before mounting the light unit.

### 3. PACKAGE CONTENTS

Verify that all items listed below are included in your package:

- 5-in-1 Bracket Effect Light Unit (x1)
- Foldable/Detachable/Retractable Tripod Stand (x1)
- Remote Control (x1)
- Screws (x4)
- Instruction Manual (x1)

### 4. PRODUCT OVERVIEW

The FODEXAZY 5-in-1 DJ Light unit features multiple light sources and control elements:

- **Rotating RGB Balls:** Two dome-shaped LED balls on each end provide rotating, multi-color effects.

- **LED Par Lights:** Central LED lights offer various colorful par light effects (1W\*BLUE, 1W\*RED, 1W\*FULL COLOR, 1W\*GREEN).
- **Red & Green Laser Light:** Projects dynamic red and green laser patterns.
- **UV/White Wash Bar Light:** Integrated lights provide UV (black light) and white LED strobe effects.
- **Control Buttons:** Manual control buttons are located on the unit.
- **Cooling Fan:** Ensures optimal operating temperature.

# PRO DISCO BALL LIGHT

From solo to spectacular—individual RGB color or combined disco modes, as well as a strobe light show.

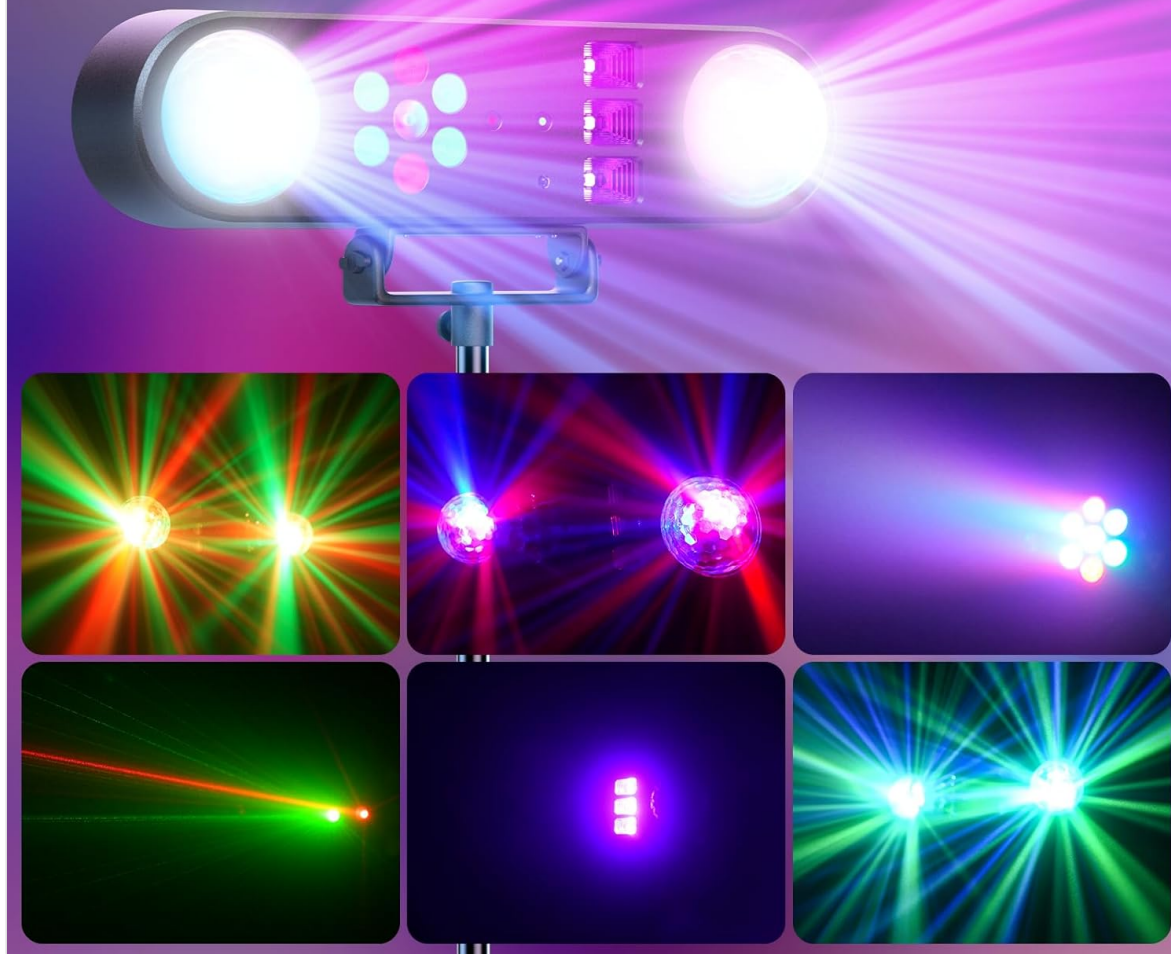

Figure 4.2: Bottom view of the light unit with control buttons and cooling fan.

## 5. SETUP

Follow these steps to assemble and set up your DJ lights:

### 1. Assemble the Tripod Stand:

- Unfold the legs of the tripod stand to create a stable base.
- Adjust the height of the stand by loosening the adjustment knobs, extending the sections, and then tightening the knobs securely.

### 2. Attach the Light Unit to the Stand:

- Locate the mounting bracket on the bottom of the light unit.
- Align the mounting bracket with the top of the tripod stand and secure it using the provided screws. Ensure it is firmly attached.
- Adjust the angle of the light unit by loosening the side screws on the mounting bracket, tilting the unit to your desired position, and then tightening the screws.

3. **Connect to Power:** Plug the power cord into a suitable AC110V-240V, 50/60Hz power outlet. The

internal cooling fan will start operating.

## 6. OPERATING INSTRUCTIONS

Your DJ light system offers three control modes: Auto, Sound Activated, and Remote Control.

### 6.1. Selecting Control Modes

On the back of the light unit, there is a switch to select between 'SOUND', 'AUTO', and 'OFF'.

- **AUTO Mode:** The light unit will cycle through various lighting effects automatically.
- **SOUND Activated Mode:** The lighting effects will change in response to music or sound.
- **OFF:** Turns the unit off.

## 6.2. Remote Control Functions

The included remote control provides comprehensive control over the light unit's functions:

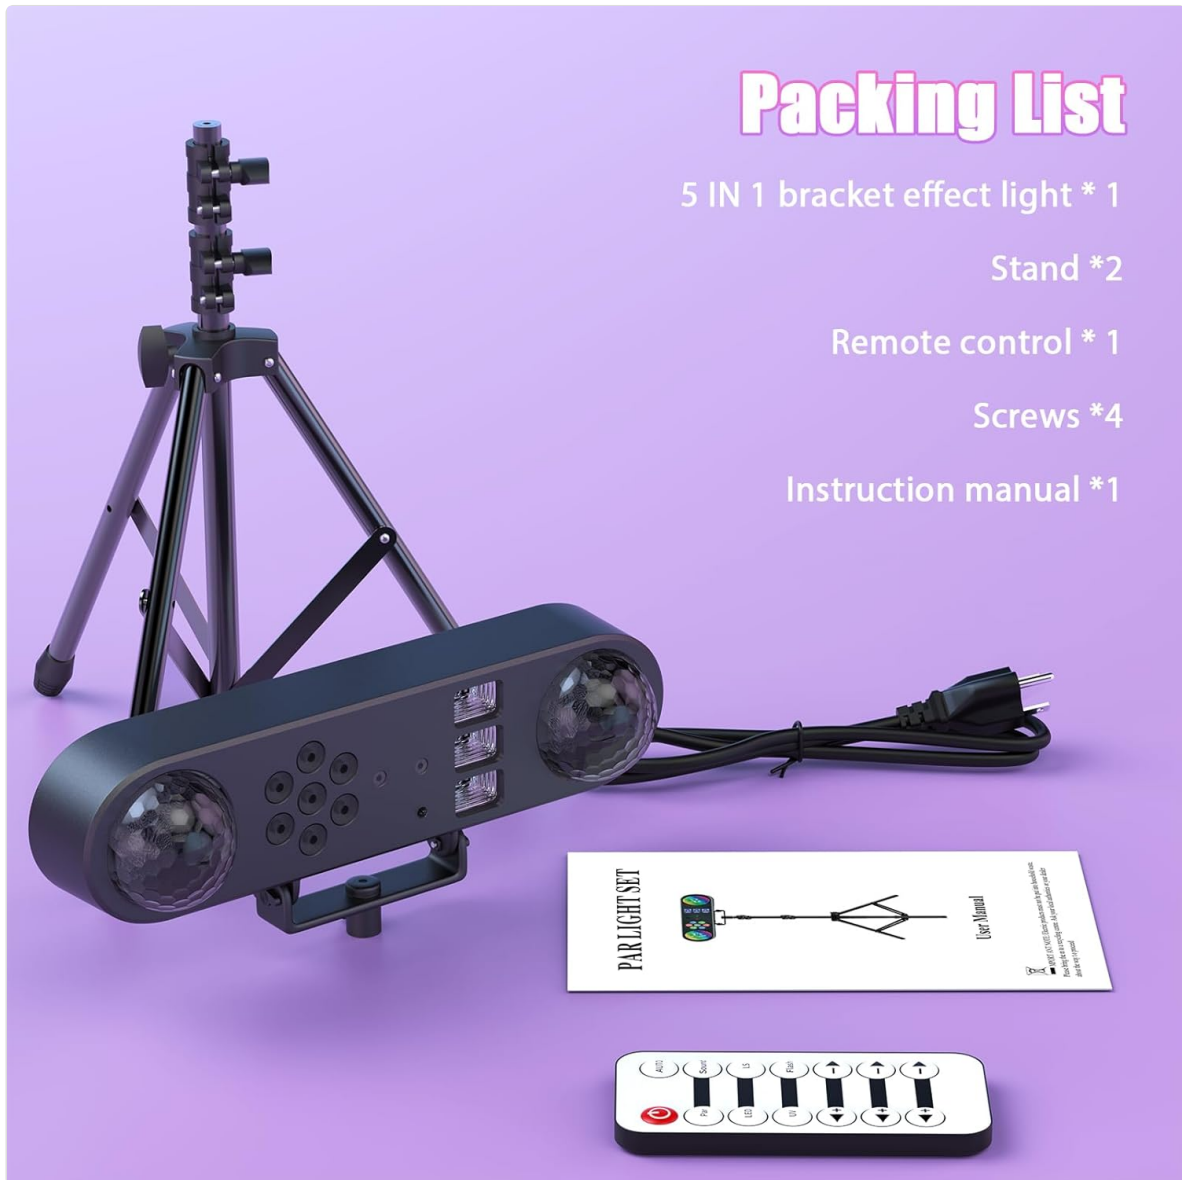

Figure 6.1: Remote control layout and functions.

- **Power (Red Button):** Turns the unit ON/OFF.
- **AUTO:** Activates automatic cycling of effects.
- **SOUND:** Activates sound-responsive effects.
- **PAR:** Controls the LED par light effects.
- **LED:** Controls the LED dyeing effects.
- **LS (Laser):** Controls the red & green laser light effects.
- **UV:** Activates the UV (black light) effect.
- **FLASH:** Activates the white LED strobe light effect.
- **MOTOR +/-:** Adjusts the speed of the rotating disco balls.
- **SPEED +/-:** Adjusts the overall speed of the light patterns.
- **SEN +/- (Sensitivity):** Adjusts the sensitivity of the sound activated mode.

Your browser does not support the video tag. This video demonstrates the use of the remote control to change light modes and effects.

### 6.3. Light Effects Overview

Figure 6.2: Examples of the 5-in-1 light effects.

- **Rotating Disco Ball:** Creates dynamic, room-filling light beams in various colors.
- **Colorful Par Light:** Projects solid colors or color-changing washes.
- **Red & Green Pattern Light:** Generates intricate laser patterns.
- **UV Light:** Produces a black light effect, making white and fluorescent objects glow.
- **White LED Strobe Light:** Creates a flashing white light effect.

## 7. MAINTENANCE

To ensure the longevity and optimal performance of your DJ lights, follow these maintenance guidelines:

- **Cleaning:** Regularly wipe the exterior of the unit with a soft, dry cloth. Do not use harsh chemicals

or abrasive cleaners.

- **Lens Cleaning:** Gently clean the light lenses with a soft, lint-free cloth to maintain clear light projection.
- **Storage:** When not in use, store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically check the power cord and connections for any signs of damage. Do not use the device if any damage is found.

## 8. TROUBLESHOOTING

If you encounter any issues with your FODEXAZY DJ Lights, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No power/lights	Power cord not connected; power outlet faulty; unit switch in 'OFF' position.	Ensure power cord is securely plugged in. Test the outlet with another device. Set the unit switch to 'SOUND' or 'AUTO'.
Remote control not working	Remote battery depleted; remote not pointed at sensor; obstruction between remote and unit.	Replace remote battery. Point the remote directly at the light unit's sensor. Remove any obstructions.
Sound activated mode not responsive	Sound sensitivity too low; no sound input; unit switch not in 'SOUND' mode.	Increase sound sensitivity using the remote (SEN +/-). Ensure music or sound is playing near the unit. Set the unit switch to 'SOUND'.
Lights appear dim or distorted	Lenses are dirty; unit is too far from projection surface.	Clean the light lenses. Move the unit closer to the projection surface.

If the problem persists after trying these solutions, please contact customer support.

## 9. SPECIFICATIONS

- **Brand:** FODEXAZY
- **Model Number:** ZQ05157
- **Product Dimensions:** 7.3"L x 4.3"W x 67.7"H (with stand fully extended)
- **Item Weight:** 4.89 pounds
- **Power Source:** Corded Electric
- **Voltage:** AC110V-240V, 50/60Hz
- **Wattage:** 30 Watts
- **Light Source Type:** RGB (Red, Green, Blue)

- **Number of Light Sources:** 5 (Disco Ball, LED Par, Laser, UV, Strobe)
- **Mounting Type:** Tripod
- **Material:** Metal or Metal Alloy
- **Finish Type:** Powder Coated
