Connectivity Protocol	Bluetooth
Batteries Required	Yes (4x AA, not included)
Waterproof Level	IP54
ANSI Grade	3

A technical diagram illustrating the precise dimensions of the ELAMOR Smart Lock M12 components and the required door specifications for proper installation, including backset, door edge hole, and door thickness.

## SETUP & INSTALLATION

The ELAMOR Smart Lock M12 is designed for easy installation, typically taking about 15 minutes. Follow these steps carefully.

### Installation Video Guide

An official installation guide video demonstrating the step-by-step process of setting up the ELAMOR M12 Smart Lock, from preparing the door to securing the components.

### Door Preparation

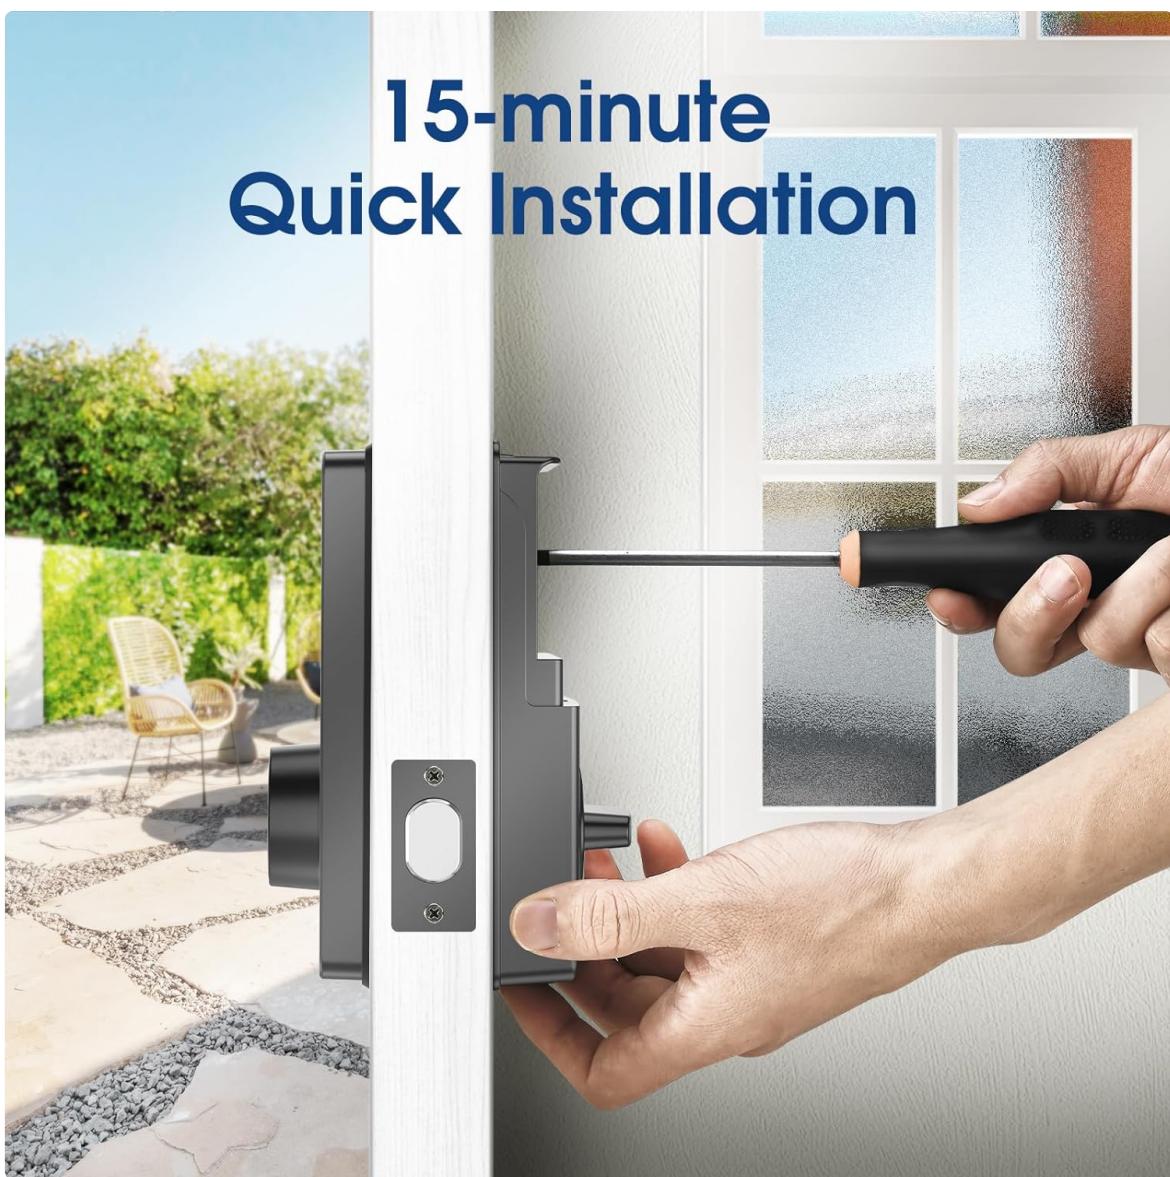

- Ensure your door meets the following specifications:
  - Backset: 2-3/8" or 2-3/4" (60 or 70 mm)
  - Door Edge Hole: 1" (25 mm)
  - Door Thickness: 1-3/8" to 2" (35 mm to 50 mm)

### Step-by-Step Installation

#### Step 1: Install the Latch Bolt

Twist the latch to adjust the bolt length if necessary, ensuring the latch bolt is retracted. Insert the latch bolt into the door, making sure the T-shaped hole is in the bottom position.

# 15-minute Quick Installation

A close-up image showing a hand inserting the deadbolt latch into the pre-drilled hole on the door edge, a crucial first step in the smart lock installation process.

## Step 2: Install the Exterior Assembly

Route the cable through the door. Feed the tail of the exterior assembly through the T-shaped hole and the stud through the latch. Ensure the key is pulled out when installing and gently push the keypad onto the door.

## Step 3: Install the Mounting Plate

Take off the mounting plate from the interior assembly. Secure the mounting plate to the door using the provided 1-5/32" (33mm) screws.

## Step 4: Install the Interior Assembly

Ensure a tight cable connection between the exterior and interior assemblies. Feed the tail of the exterior assembly into the T-shaped hole of the interior assembly. Carefully align and attach the interior assembly to the mounting plate.

## Step 5: Install Batteries

Open the battery cover on the interior assembly. Insert 4 AA batteries, ensuring correct polarity. Close the battery cover.

## Step 6: Test Operation

After installation, test the lock/unlock process. Press the lock key on the keypad; the latch bolt should

extend. To unlock, use the default user code (e.g., 123456) or a physical key.

## OPERATING INSTRUCTIONS

### Unlocking Methods

#### Fingerprint Unlock

Place your registered finger on the fingerprint sensor. The lock will unlock if the fingerprint is recognized.

# Your Finger is Your Key

An illustration showing a finger being placed on the fingerprint sensor of the ELAMOR Smart Lock M12, highlighting the quick identification and unlock times.

## Touchscreen Keypad Unlock

Enter your valid passcode on the touchscreen keypad, then press the unlock key.

## Physical Key Unlock

Insert the physical key into the keyhole and turn to unlock.

## Bluetooth App Control

Download and install the "Smart Life" app. Pair your lock with the app via Bluetooth. Use the app to remotely lock/unlock, manage users, and view access logs.

# Full Control in APP

A video showcasing the various functionalities of the ELAMOR M12 Bluetooth Smart Lock, including different unlocking methods and app control features.

## Automatic Locking

The lock features an automatic locking function. You can set the auto-lock delay time through the Smart Life App. If the door is left open or unlocked, it will automatically lock after the set time.

# Reliable & Auto Lock

An image illustrating the automatic locking feature of the ELAMOR Smart Lock M12, showing the deadbolt extending automatically to secure the door.

## MAINTENANCE

### Battery Replacement

When the battery is low, the lock will provide a low battery alarm. Replace all four AA batteries promptly to ensure continuous operation. In case of complete battery exhaustion, use the emergency charging port (USB-A) to temporarily power the lock.

# Perfect Fit Your Door

An image highlighting the long-lasting battery life (10 months standby) and the emergency USB-A charging port of the ELAMOR Smart Lock M12, along with its IP54 waterproof rating and low battery alarm feature.

## Cleaning

Clean the touchscreen and fingerprint sensor regularly with a soft, dry cloth to ensure optimal performance. Avoid using abrasive cleaners or solvents.

## Weather Resistance

The ELAMOR Smart Lock M12 has an IP54 waterproof rating, providing reliable protection against water damage. However, avoid direct exposure to heavy rain or prolonged submersion.

## TROUBLESHOOTING

Issue	Possible Cause	Solution
Lock not responding	Low batteries	Replace batteries or use emergency charging.

Fingerprint not recognized	Dirty sensor/finger, unregistered fingerprint	Clean sensor/finger, re-register fingerprint.
Keypad not responding	Incorrect code, temporary lockout	Enter correct code, wait for lockout period to end.
Auto-lock not working	Feature disabled, incorrect settings	Enable auto-lock in Smart Life App, adjust delay time.
App connectivity issues	Bluetooth off, lock out of range, app glitch	Ensure Bluetooth is on, move closer to lock, restart app.
Latch bolt not extending/retracting fully	Misalignment, obstruction	Check alignment of lock components, remove any obstructions.
