BesLowe KN-B01

BesLowe 48FT S14 Solar String Lights User Manual

Model: KN-B01

PRODUCT OVERVIEW

The BesLowe 48FT S14 Solar String Lights are designed to illuminate your outdoor spaces with ease and efficiency. Featuring solar power and USB recharging capabilities, these lights offer versatile installation options and customizable lighting modes via a remote control. They are built to withstand various weather conditions, making them ideal for patios, backyards, pergolas, and more.

Key Features

- **Upgraded Solar String Lights with Remote:** Effortlessly control on/off, brightness, and lighting modes. Includes a timing function for convenience.
- **Solar-powered & USB Rechargeable:** Large-capacity solar panel for up to 8 hours of light. 180° adjustable panel for optimal sun exposure. USB rechargeable for cloudy days (cable not included).
- **Dimming Function & More Lighting Modes:** Dimmable from 25% to 100% with four levels. Choose from steady on, breath (speed adjustable), and flash (speed adjustable) modes.
- **Weather-resistant & Shatterproof:** Strong rubber strands, fully-sealed sockets, and durable plastic bulbs ensure safety and resilience in all weather.
- **Easy Installation:** 48FT length with 16 S14 bulbs (one spare), spaced 3FT apart. Can be hung with screws, hooks, or cords. Solar panel can be fixed with screws or staked into the ground.

WHAT'S IN THE BOX

- 15+1 S14 LED Bulbs
- 1 Solar Panel
- 1 Remote Control
- Mounting Hardware (screws, ground stake)

SETUP AND INSTALLATION

The BesLowe S14 Solar String Lights offer flexible installation options to suit your outdoor space.

Solar Panel Placement

The solar panel is crucial for charging the lights. Ensure it is placed in an area that receives direct sunlight for 8-12 hours daily for optimal performance. The panel is 180° adjustable to maximize sun exposure.

Solar Powered & USB Rechargeable

Outdoor

Solar-powered
No outdoor outlet needed

Indoor

USB Port Available
Recharge the light on rainy days

Solar Panel and USB Charging: The solar panel charges the lights during the day. It also features a USB-C port for alternative charging on cloudy days. Ensure the panel is positioned to receive maximum sunlight.

Flexible Solar Panel Installation: The solar panel can be securely staked into the ground using the provided stake or mounted to a wall or wooden structure with screws. Choose the method that best suits your outdoor setup for optimal sun exposure.

String Light Installation

The 48-foot string lights come with 16 S14 bulbs (one spare) spaced 3 feet apart. Each bulb socket has a small loop for easy hanging.

Versatile Hanging Options: You can hang the lights using screws, hooks, or by threading a cord through the integrated loops on each bulb socket. Ensure the solar panel is connected and the power button on the back of the solar panel is pressed to "ON" before first use.

Official Product Video: This video demonstrates the unboxing, setup, and various features of the BesLowe Solar String Lights, including how to connect the solar panel and use the remote control. It provides a comprehensive visual guide for installation and operation.

OPERATING INSTRUCTIONS

Powering On/Off and Automatic Operation

Before initial use, ensure the power button on the back of the solar panel is pressed to the "ON" position. The lights will automatically turn on at dusk and turn off at dawn, provided the solar panel has received sufficient sunlight during the day.

Remote Control Functions

The included remote control provides full command over your string lights.

- **ON/OFF:** Press to manually turn the lights on or off.

- **Brightness Adjustment:** Select from 25%, 50%, 75%, or 100% brightness levels.
- **Lighting Modes:** Choose from:
 - **Steady On:** Lights remain continuously lit.
 - **Breath:** Lights gently fade in and out (speed adjustable).
 - **Flash:** Lights blink (speed adjustable).
- **Timer:** Set the lights to automatically turn off after 6 hours (6H) or 8 hours (8H).

25%-100% Dimmable

Easily Dim the light with Remote Control

(The control range is from 32ft to 96ft)

Dimming Function: Use the remote to adjust the brightness from 25% to 100% to create the desired ambiance.

Multiple Lighting Modes: The remote allows you to switch between Steady On, Breath (with adjustable speed), and Flash (with adjustable speed) modes for various occasions.

MAINTENANCE

The BesLowe S14 Solar String Lights are designed for durability and minimal maintenance.

Weather Resistance and Durability

These lights feature strong rubber strands and fully-sealed sockets, ensuring they perform well in all weather conditions, including sun, rain, storms, and snow. The bulbs are crafted from lightweight yet durable plastic, making them shatterproof and safer than traditional glass bulbs.

Shatterproof

High-quality Plastic Bulbs

Shatterproof

Weatherproof

Withstand All Extreme Weather

Sunproof

Waterproof

Stormproof

Snowproof

Built for All Weather: The lights are designed to be shatterproof and weather-resistant, capable of withstanding various outdoor elements. This ensures long-lasting performance and safety.

Bulb Replacement

The string lights come with one spare S14 bulb for easy replacement if needed. To replace a bulb, simply unscrew the old bulb and screw in the new one. Ensure the power is off before handling bulbs.

TROUBLESHOOTING

- **Lights not turning on at night:**
 - Ensure the solar panel is clean and free from dirt or debris.
 - Verify the solar panel is receiving adequate direct sunlight (8-12 hours) during the day.
 - Check that the power button on the back of the solar panel is in the "ON" position.
 - If it's been cloudy or rainy, use the USB-C charging feature to fully charge the panel.
- **Lights are dim or not lasting long:**

- The solar panel may not be receiving enough direct sunlight. Adjust its position.
 - The battery may not be fully charged. Allow more charging time or use the USB-C charging feature.
 - Ensure no external light sources (e.g., streetlights, porch lights) are interfering with the solar panel's sensor, causing it to think it's daytime.
- **Remote control not working:**
 - Ensure the remote control has working batteries (requires 2-AAA, not included).
 - Point the remote directly at the solar panel's receiver.
 - Ensure there are no obstructions between the remote and the solar panel.
 - **Individual bulbs not lighting up:**
 - Check if the bulb is securely screwed into its socket.
 - Replace the faulty bulb with the spare bulb provided.

SPECIFICATIONS

Feature	Detail
Model Number	KN-B01
Length	48FT
