2. Step 2: Install Center Support Beam

Attach the center support beam to the designated brackets on the headboard and footboard. This beam provides crucial central stability for the slat system.

3. Step 3: Place Wooden Slats

Lay the wooden slats across the side rails, ensuring they are evenly spaced and secured according to the instructions. Some slats may have pre-drilled holes for screws to prevent shifting. Attach any required support legs to the slats or center beam.

4. Step 4: Final Tightening

Once all components are in place, go back and securely tighten all bolts and screws using the provided Allen wrench. Avoid overtightening.

5. Step 5: Mattress Placement

Place your mattress directly onto the assembled slat system. A 10-inch mattress thickness is recommended for optimal appearance and comfort.

CARE AND MAINTENANCE

- **Cleaning:** For the upholstered headboard, spot clean with a dry cloth. For the wood frame, wipe with a soft, damp cloth. Avoid using abrasive cleaners.
- **Sunlight Exposure:** Avoid direct sunlight exposure to prevent fading of the upholstery and wood finish.
- **Regular Checks:** Periodically check all hardware connections (bolts, screws) and re-tighten if they have loosened over time.
- **Moving the Bed:** When moving the bed frame, lift it rather than dragging it to prevent damage to the legs and frame structure.
