

## syvio P1

# syvio Pet Clipper Grooming Kit and Vacuum P1 User Manual

## 1. INTRODUCTION

This manual provides instructions for the safe and effective use of your syvio Pet Clipper Grooming Kit and Vacuum P1. Please read all instructions carefully before operating the device and retain this manual for future reference. This product is designed for grooming pets and collecting pet hair.

## 2. SAFETY INSTRUCTIONS

- Always ensure the device is unplugged before cleaning or performing maintenance.
- Do not operate the device with a damaged cord or plug. Contact customer support for assistance.
- Keep the device away from water and do not immerse it in liquids.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Supervise children to ensure they do not play with the appliance.
- Use only attachments and accessories recommended by the manufacturer.
- Do not use the device on wet pets or in wet environments.
- Ensure the dust cup is properly installed before operation.
- Avoid contact with moving parts during operation.

## 3. PACKAGE CONTENTS

Verify that all items listed below are included in your package:

- Vacuum Host Unit
- Deshedding Brush
- Slicker Comb

- Electric Clipper
- 2 Double-sided Clipping Guards (3mm/6mm, 9mm/12mm)
- Cleaning Tool (Nozzle and Brush)
- Hose
- Power Adapter
- User Manual

## 5. SETUP

1. **Unpacking:** Carefully remove all components from the packaging.
2. **Hose Connection:** Connect one end of the hose to the suction port on the main vacuum unit. Ensure it clicks securely into place.
3. **Attachment Connection:** Select the desired grooming tool (e.g., deshedding brush, slicker comb, or clipper) and attach it to the other end of the hose. Ensure a snug fit.
4. **Power Connection:** Plug the power adapter into the main vacuum unit and then into a suitable electrical outlet.
5. **Clipper Charging:** The electric clipper has an internal rechargeable battery. Before first use, ensure the clipper is fully charged. Connect the clipper to its charging cable (not included with the main unit, typically a standard USB-C or similar cable) and plug it into a power source. The power display on the clipper will indicate charging status.

## 6. OPERATING INSTRUCTIONS

### 6.1 General Operation

1. **Power On:** Press the power button on the main vacuum unit to turn it on.
2. **Adjust Suction:** The vacuum unit typically has multiple suction levels. Start with the lowest setting to allow your pet to acclimate to the sound and sensation. Gradually increase suction as needed and as your pet becomes comfortable. The device operates at a low noise level, generally below 60 dB, to minimize pet anxiety.
3. **Power Off:** Press the power button again to turn off the unit when finished.

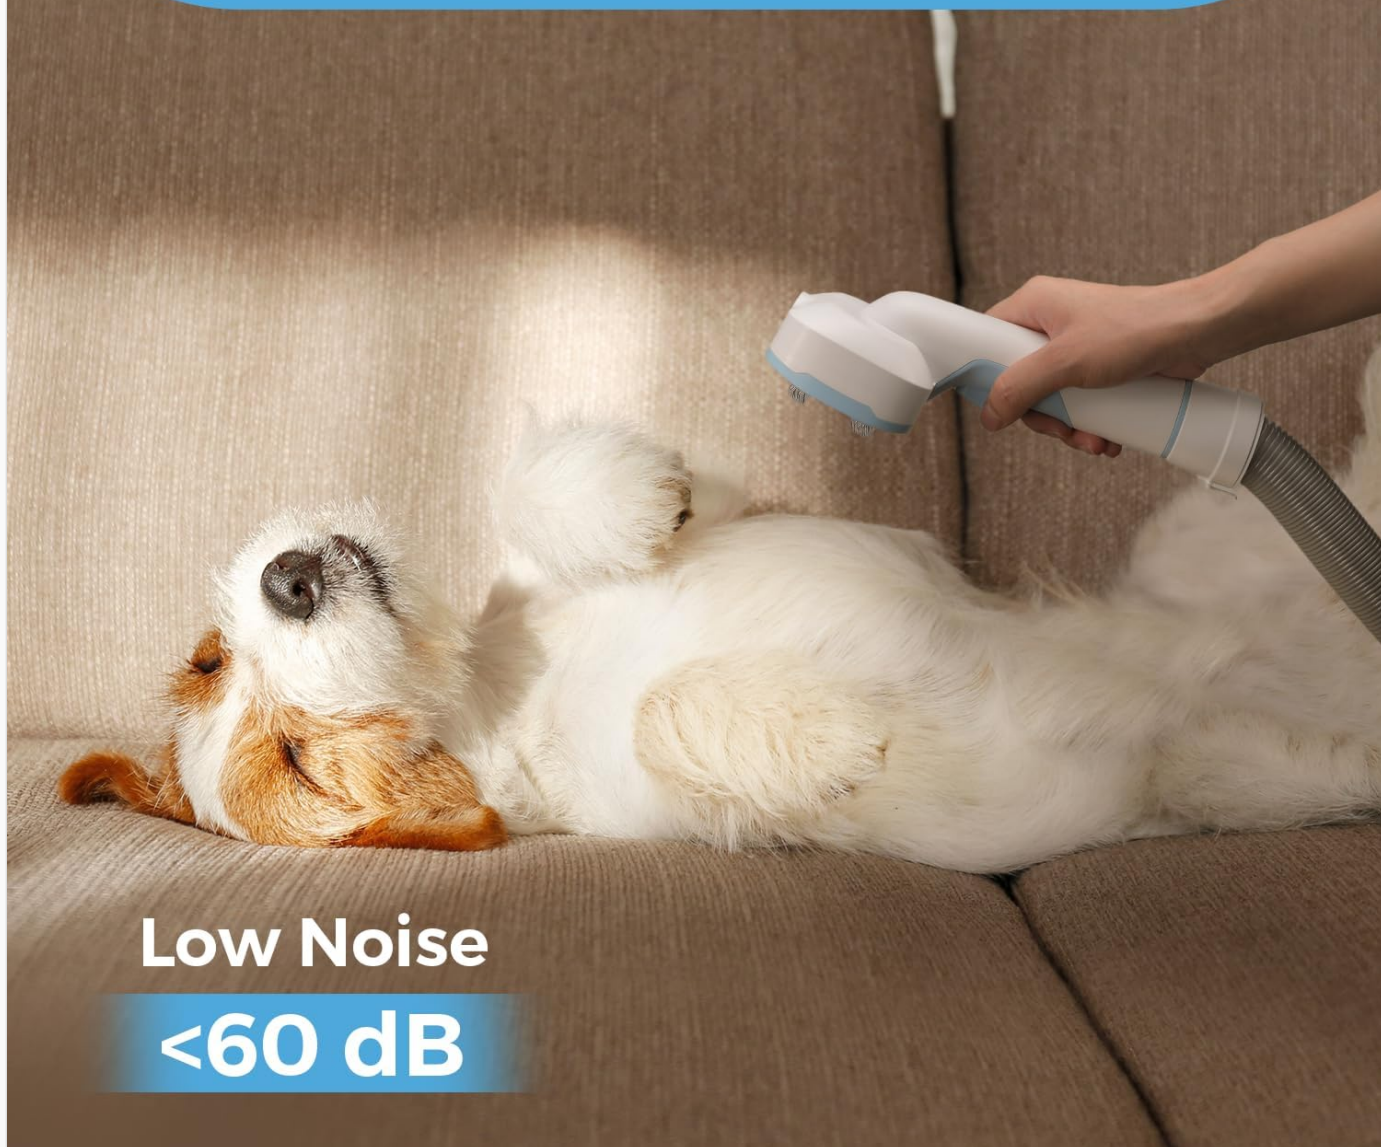

Figure 6.1: Device operating with low noise level.

## 6.2 Using the Electric Clipper

1. **Attach Guard:** Select the desired clipping guard (3mm, 6mm, 9mm, or 12mm) and securely attach it to the clipper blade.
2. **Power On Clipper:** Press the power button on the clipper. The power display will show the battery level.
3. **Grooming:** Gently guide the clipper through your pet's fur in the direction of hair growth. Ensure the vacuum is running to collect trimmed hair.
4. **Standalone Use:** The clipper can be used independently without the vacuum hose for touch-ups or if your pet is sensitive to the vacuum sound.

## 6.3 Using the Deshedding Brush and Slicker Comb

1. **Attach Tool:** Connect either the deshedding brush or the slicker comb to the vacuum hose.
2. **Brushing:** Gently brush your pet's coat. The vacuum will simultaneously collect loose hair, reducing shedding

around your home.

3. **Self-Cleaning Feature:** For the deshedding brush, press the button on the back to retract the bristles and release collected hair into the vacuum.

## 6.4 Using the Cleaning Tools

The nozzle and brush attachments can be used to vacuum pet hair from furniture, carpets, and other surfaces.

## 7. MAINTENANCE

### 7.1 Emptying the Dust Cup

1. Ensure the vacuum unit is turned off and unplugged.
2. Detach the dust cup from the main unit.
3. Open the dust cup and empty collected hair and debris into a trash receptacle.
4. Close the dust cup securely and reattach it to the main unit.

### 7.2 Cleaning Filters

1. With the dust cup detached, remove the internal filters (HEPA filter and sponge filter).

2. Tap the filters gently to remove loose dust. For thorough cleaning, rinse the filters under running water.
3. Allow filters to air dry completely for at least 24 hours before reinserting them into the dust cup. Do not use the vacuum with wet filters.

### 7.3 Cleaning Clipper Blades

1. Ensure the clipper is turned off.
2. Use the small cleaning brush (if included) to remove any hair trapped between the clipper blades.
3. Periodically apply a small amount of clipper oil (not included) to the blades to maintain performance and longevity.

### 7.4 Storage

Store the device and its accessories in a clean, dry place, away from direct sunlight and extreme temperatures.

## 8. TROUBLESHOOTING

| Problem                              | Possible Cause                                                                   | Solution                                                                                       |
|--------------------------------------|----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| Low suction power                    | Dust cup full; filters clogged; hose/attachment blocked.                         | Empty dust cup; clean/dry filters; check hose and attachments for blockages.                   |
| Clipper not turning on/charging      | Battery depleted; charging cable not connected properly; faulty battery/clipper. | Ensure clipper is charged; check charging cable connection; contact support if issue persists. |
| Unusual noise from vacuum            | Blockage in hose/unit; motor issue.                                              | Check for and remove any blockages; contact support if noise continues.                        |
| Hair not being collected effectively | Low suction setting; attachment not sealed properly; dust cup full.              | Increase suction level; ensure attachment is securely fitted; empty dust cup.                  |
