NEBO Redline 6K / Slyde King 2K Bundle

NEBO Redline 6K & Slyde King 2K Flashlight Bundle User Manual

Model: Redline 6K / Slyde King 2K

Product Overview

This manual provides comprehensive instructions for the NEBO Redline 6K 6000-Lumen Rechargeable LED Flashlight and the NEBO Slyde King 2K 2000-Lumen Rechargeable LED Flashlight with Work Light. This bundle offers versatile and powerful lighting solutions suitable for a wide range of applications, including everyday carry, camping, hunting, hiking, tactical use, and professional trades.

Included Components

- NEBO Redline 6K Flashlight
- NEBO Slyde King 2K Flashlight
- Micro-USB to USB Charging Cable (for Redline 6K)
- Detachable Lanyard (for Redline 6K)
- Rechargeable Batteries (pre-installed)

This image displays both the NEBO Redline 6K flashlight (left) and the NEBO Slyde King 2K flashlight (right), highlighting the two primary

components of this bundle.

Setup

Initial Charging

Before first use, it is essential to fully charge both flashlights to ensure optimal performance and battery longevity.

Redline 6K Charging Procedure:

1. Locate the micro-USB charging port on the side of the Redline 6K flashlight.
2. Connect the included micro-USB to USB charging cable to the flashlight and a compatible USB power source (e.g., wall adapter, computer USB port).
3. The power button will illuminate to indicate charging status. A full charge can take between 5 to 20 hours, depending on the output of the USB power source.

This image illustrates the micro-USB charging port on the NEBO Redline 6K flashlight, demonstrating how to connect the charging cable for recharging the device.

Slyde King 2K Charging Procedure:

The Slyde King 2K also features a rechargeable design. Refer to the specific charging instructions provided with the Slyde King 2K, which typically involves revealing a hidden charging port by sliding or twisting a section of the flashlight body.

Attaching Lanyard (Redline 6K)

Thread the detachable lanyard through the designated loop located at the tail end of the Redline 6K flashlight. This provides a secure and convenient way to carry the flashlight.

Operating Instructions

NEBO Redline 6K Flashlight

Power and Mode Selection:

- Press the front-positioned power button once to turn the flashlight ON.
- While the light is ON, press the power button repeatedly to cycle through the available light modes.
- Press and hold the power button to turn the flashlight OFF.

Light Modes and Output:

Mode	Lumens	Runtime	Beam Distance
High	6000	2 hours	219 meters
Medium	1200	5 hours	98 meters
Low	60	50 hours	69 meters
Strobe	6000	3 hours	219 meters

This image demonstrates the powerful and wide illumination provided by the NEBO Redline 6K flashlight, capable of lighting up a significant area.

4X Adjustable Zoom:

To adjust the beam from a wide floodlight to a focused spot beam, simply twist the head of the Redline 6K flashlight.

Power Bank Function:

The Redline 6K can function as a portable power bank to charge other USB-powered devices. Connect your device to the USB-A output port on the flashlight using a compatible cable.

NEBO Slyde King 2K Flashlight

Flashlight Operation:

- Press the power button to activate the 2000-lumen LED flashlight.
- Cycle through various modes, including dimmable options, by pressing the button repeatedly.
- The flashlight features 4x zoom, which can be adjusted by twisting the head.

This image shows the NEBO Slyde King 2K flashlight in action, demonstrating its 2000-lumen output and how it can be used for detailed illumination.

Work Light (COB) Operation:

- Slide the body of the Slyde King 2K to reveal the integrated 500-lumen C•O•B work light.
- The work light also offers dimmable modes and programmable memory for convenience.

Magnetic Base:

The Slyde King 2K is equipped with a powerful magnetic base, allowing for hands-free lighting by securely attaching the flashlight to metallic surfaces.

This image highlights the strong magnetic base of the NEBO Slyde King 2K, allowing for hands-free operation by attaching it to metallic surfaces.

Programmable Memory:

The Slyde King 2K features programmable memory, which means the light will turn on in the last used mode, enhancing user convenience.

Maintenance

Cleaning:

To clean the flashlight bodies, use a soft, damp cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish or internal components.

Battery Care:

- Recharge the flashlights regularly to maintain optimal battery health and performance, even if they are not frequently used.

- Avoid fully depleting the battery before recharging, as this can reduce its overall lifespan.
- When storing the flashlights for extended periods, ensure they are kept in a cool, dry place.

Water Resistance:

Both flashlights are rated IP67, indicating they are waterproof up to 1 meter for 30 minutes. To maintain this rating, ensure all charging ports and seals are properly closed and secured before exposing the flashlights to water.

Troubleshooting

Flashlight Not Turning On:

- Ensure the battery is fully charged. Connect the flashlight to a power source and observe the charging indicator.
- If the battery is removable, verify that it is correctly inserted with the proper polarity.
- Inspect battery contacts for any visible corrosion or debris and clean if necessary.

Dim Light Output:

- Recharge the battery. Dim output is a common indicator of a low battery level.
- Ensure the flashlight lens is clean and free of smudges, dirt, or debris.

Charging Issues:

- Try using a different USB cable and a different USB power adapter to rule out faulty accessories.
- Check the charging port for any lint, dust, or debris that might obstruct the connection and carefully clean if found.

Water Ingress:

If water accidentally enters the flashlight, immediately turn it off. If possible, remove the battery and allow the flashlight to dry completely in a well-ventilated area before attempting to use it again. If issues persist after drying, contact customer support.

Specifications

NEBO Redline 6K Flashlight:

- **Light Output:** Up to 6000 Lumens
- **Light Modes:** High, Medium, Low, Strobe
- **Zoom:** 4X Adjustable
- **Material:** Aircraft-grade Anodized Aluminum
- **Water Resistance:** IP67 (Waterproof up to 1 meter for 30 minutes)
- **Power Source:** Rechargeable Battery (Micro-USB to USB)
- **Additional Features:** Power Bank Function, Closed-loop Temperature Control

NEBO Slyde King 2K Flashlight:

- **Flashlight Output:** Up to 2000 Lumens
- **Work Light Output:** 500 Lumens (C•O•B)
- **Zoom:** 4X Adjustable
- **Material:** Aircraft-grade Anodized Aluminum
- **Water Resistance:** IP67 (Waterproof up to 1 meter for 30 minutes)

- **Power Source:** Rechargeable Battery
- **Additional Features:** Dimmable Modes, Programmable Memory, Magnetic Base, Ergonomic Rubberized Grip
