PAWPRO 1 Collier

PAWPRO Dog Training Collar User Manual

Model: 1 Collier

Introduction

The PAWPRO Dog Training Collar is designed to assist dog owners in training their pets effectively and humanely. This collar offers three distinct modes: Beep, Vibration, and Boost Vibration, providing a range of options for communication with your dog. Developed in compliance with the new 2024 Animal Welfare Law, this device ensures safe training without the use of electric shock. With an exceptional range of up to 3000 meters, it allows for flexible training in various environments.

This manual provides comprehensive instructions on how to set up, operate, and maintain your PAWPRO training collar, ensuring optimal performance and the well-being of your dog.

Safety Information and Legal Compliance

Your PAWPRO training collar is designed with your dog's safety and well-being as the top priority. It operates exclusively with sound and vibration modes, completely **without electric shock**. This design adheres to the new 2024 Animal Welfare Law, which prohibits the use of electric shock collars.

- Always ensure the collar is fitted correctly to prevent discomfort or skin irritation.
- Do not leave the collar on your dog for more than 12 consecutive hours.
- Regularly check your dog's neck for any signs of irritation or pressure sores.
- Use the training modes responsibly and in conjunction with positive reinforcement training methods.

Image: A detailed view of the collar's contact points, demonstrating the inclusion of both short and long contactors for different coat lengths. It also visually explains the importance of proper fit to prevent skin irritation, showing a correct fit versus an irritated area.

Package Contents

Upon opening your PAWPRO training collar package, please verify that all components are present and in good condition:

- 1 x PAWPRO Remote Control Transmitter
- 1 x PAWPRO Dog Collar Receiver
- 1 x Adjustable Nylon Collar Strap
- 1 x USB Charging Cable (2-in-1 for remote and collar)
- 1 x Set of Short Contact Points
- 1 x Set of Long Contact Points
- 1 x User Manual (in French, but this document serves as the English guide)

Product Overview

Remote Control Transmitter

The remote control features an intuitive layout for easy operation. It includes buttons for each training mode (Beep, Vibration, Boost Vibration), a display for mode and intensity levels, and channel selection for training multiple dogs.

Collar Receiver

The collar receiver is compact, lightweight, and designed for comfort. It is waterproof (IPX7 rated) and features contact points that deliver the vibration signals. An LED indicator shows battery status and operational mode.

Setup

1. Charging the Devices

Before first use, fully charge both the remote control and the collar receiver. Use the provided USB charging cable. The collar charges in approximately 2 hours and offers up to 15 days of autonomy.

- Connect the charging cable to the charging ports on both the remote and the collar.
- Plug the USB end into a standard USB power adapter (not included) or a computer USB port.
- The indicator lights will show charging status and turn off or change color when fully charged.

Image: The PAWPRO collar receiver shown partially submerged in water, demonstrating its IPX7 waterproof capability. Accompanying text highlights its quick 2-hour charging time and extended 15-day battery autonomy.

2. Pairing the Collar and Remote

The collar and remote are usually pre-paired from the factory. If re-pairing is needed or if you are adding a second collar:

1. Ensure both devices are turned off.
2. Turn on the remote control.
3. Press and hold the power button on the collar receiver until the indicator light flashes rapidly.
4. Within 10 seconds, press any mode button (Beep, Vibration, or Boost Vibration) on the remote.
5. The collar's indicator light will stop flashing and remain solid, indicating successful pairing.

3. Fitting the Collar

Proper fit is essential for the collar's effectiveness and your dog's comfort. The PAWPRO collar is adjustable and suitable for dogs weighing from 3kg to 60kg.

- Choose the appropriate contact points (short for short-haired dogs, long for long-haired dogs) and screw them onto the receiver.
- Place the collar around your dog's neck, ensuring the receiver is positioned centrally on the underside of the neck.
- Adjust the strap so that it is snug but not too tight. You should be able to fit one or two fingers comfortably between the collar and your dog's neck.
- Trim any excess strap length if necessary.

Operating Instructions

The PAWPRO training collar offers three distinct modes to assist in your dog's training:

1. Beep Mode (8 Levels)

This mode emits an audible tone from the collar. It is ideal for initial training, recall, or as a warning before applying a

vibration. The intensity of the beep can be adjusted.

- Press the **Beep button** on the remote to activate.
- Adjust the beep intensity using the level adjustment buttons on the remote.

2. Vibration Mode (16 Levels)

The collar vibrates, providing a tactile cue to your dog. This mode is effective for gaining attention, correcting unwanted behaviors, or reinforcing commands. There are 16 adjustable intensity levels.

- Press the **Vibration button** on the remote to activate.
- Adjust the vibration intensity using the level adjustment buttons on the remote.

3. Boost Vibration Mode (16 Levels)

This is an enhanced vibration mode, providing a stronger tactile stimulus. It is designed for urgent situations or for dogs that require a more pronounced cue. Like the standard vibration, it has 16 adjustable intensity levels.

- Press the **Boost Vibration button** on the remote to activate.
- Adjust the boost vibration intensity using the level adjustment buttons on the remote.

Training Tips

- **Start with Low Levels:** Always begin with the lowest effective intensity level for each mode and gradually increase if necessary.
- **Consistency is Key:** Use the collar consistently for specific commands or behaviors.
- **Positive Reinforcement:** Pair collar cues with verbal commands and reward desired behaviors with praise or treats.
- **Short Training Sessions:** Keep training sessions brief and positive to maintain your dog's engagement.
- **Exceptional Range:** The 3000m range allows for training in open spaces, ensuring control even at considerable distances.

Image: A dynamic shot of a dog running freely in an open outdoor environment, while a person holds the PAWPRO remote control. This image illustrates the collar's exceptional 3000-meter range, enabling effective training and control even at long distances.

Training Multiple Dogs

The PAWPRO remote control features a dual-channel system, allowing you to train two dogs simultaneously with a single remote. Switch between channels using the designated button on the remote.

Maintenance

- **Cleaning:** Regularly clean the collar strap and receiver with a damp cloth. Ensure the contact points are free of dirt or debris.
- **Battery Care:** To prolong battery life, avoid fully discharging the devices frequently. Recharge regularly, especially if storing for extended periods.
- **Water Resistance:** The collar receiver is IPX7 waterproof, meaning it can withstand submersion in water up to 1 meter for 30 minutes. However, always ensure the charging port cover is securely closed before exposing it to water. The remote control is not waterproof and should be kept dry.

- **Storage:** Store the collar and remote in a dry, cool place when not in use.

Troubleshooting

Problem	Possible Cause	Solution
Collar not responding to remote.	Low battery on either device; devices not paired; out of range.	Charge both devices; re-pair the collar and remote; ensure you are within the 3000m range.
Collar not vibrating effectively.	Collar too loose; contact points not making proper contact; incorrect contact point length.	Adjust collar for a snug fit; ensure contact points are clean; use longer contact points for long-haired dogs.
Short battery life.	Frequent use of high intensity modes; aging battery.	Reduce intensity levels if possible; ensure full charge cycles; contact support if battery life significantly degrades.
Skin irritation on dog's neck.	Collar worn for too long; collar too tight; allergic reaction.	Remove collar for several hours daily; loosen collar slightly; consult a veterinarian if irritation persists.

Specifications

Model: 1 Collier

Brand: PAWPRO

Range: Up to 3000 meters (XXL Range)

Training Modes: Beep (8 levels), Vibration (16 levels), Boost Vibration (16 levels)

Waterproof Rating (Collar): IPX7 (submersible up to 1 meter for 30 minutes)

Battery Life (Collar): Up to 15 days (depending on usage)

Charging Time (Collar): Approximately 2 hours

Compatibility: Dogs of all sizes, from 3kg to 60kg

Material: Polyester (collar strap)

Color: Black and Green

Dimensions (Package): 17.1 x 14.4 x 4.4 cm; 340 grams
