SAFETY INSTRUCTIONS

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, or injury to persons.

- Read all instructions before using the dishwasher.
- Connect to a properly grounded outlet only.
- Do not touch the heating element during or immediately after use.
- Use only detergents and rinse aids recommended for automatic dishwashers.
- Do not operate the dishwasher if it has a damaged power cord or plug.

SETUP AND INSTALLATION

Proper installation is crucial for the performance and longevity of your dishwasher. It is recommended that installation be performed by a qualified technician.

Unpacking

- Carefully remove all packaging materials.
- Inspect the dishwasher for any shipping damage. Report any damage immediately to your retailer.
- Ensure all accessories are present, including the machine body as listed in the product components.

Placement

The dishwasher should be placed on a level, stable surface. Ensure adequate space for door opening and proper ventilation.

- Dimensions: Approximately 59 cm (Depth) x 60 cm (Width) x 85 cm (Height).
- Ensure proximity to water supply, drainage, and a grounded electrical outlet (240 Volts, 50 Hz).

Connections

- **Water Supply:** Connect the water inlet hose to a cold water tap with a 3/4" thread.
- **Drainage:** Connect the drain hose to a suitable drain pipe or sink trap, ensuring it is properly secured to prevent leaks.
- **Electrical:** Plug the dishwasher into a dedicated, grounded 240V, 50Hz electrical outlet.

OPERATING INSTRUCTIONS

Your Whirlpool dishwasher is designed for efficient and effective dishwashing. Familiarize yourself with its features for optimal performance.

Loading the Dishwasher

Proper loading ensures thorough cleaning and drying. The MaxiSpace tub and flexible baskets offer ample capacity for 15 place settings.

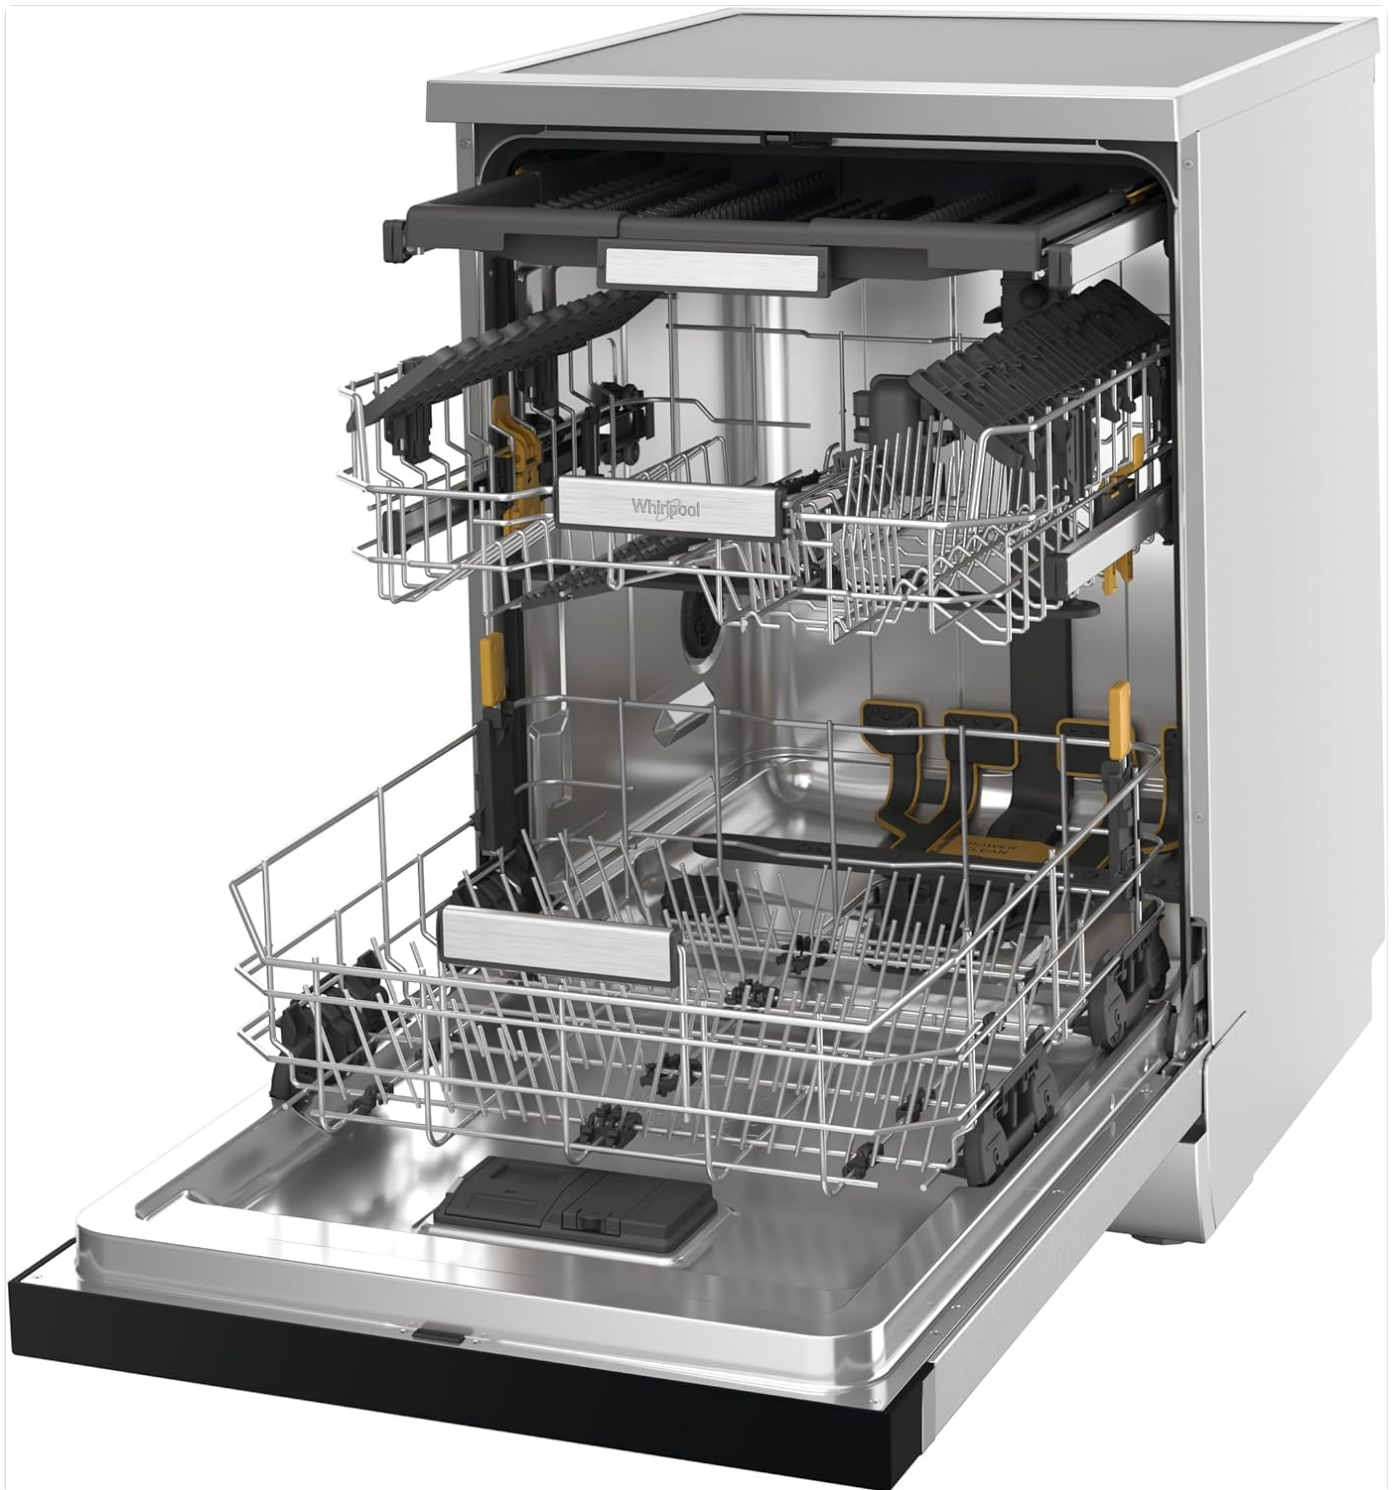

Figure 2: Interior view of the dishwasher with racks extended. This image highlights the spacious MaxiSpace tub and the adjustable racks, including the third flexible basket for cutlery and utensils.

- **Lower Basket:** Ideal for large items like plates (up to 32 cm), bowls, pots, and pans.
- **Upper Basket:** Suitable for glasses, cups, and smaller plates (up to 19 cm).
- **Third Flexible Basket:** Designed for cutlery and small utensils. Its sliding modules allow for taller items in the middle basket.
- Avoid overcrowding to allow water and detergent to reach all surfaces.
- Scrape off large food particles before loading.

Adding Detergent and Rinse Aid

- Fill the detergent dispenser according to the soil level and water hardness.
- Refill the rinse aid dispenser when the indicator light illuminates. Rinse aid helps with drying and prevents spots.

Selecting a Program

The dishwasher features a push-button control panel with an LED display. Select the appropriate wash program based on the type and soil level of your dishes.

- **6th SENSO Technology:** This intelligent feature automatically detects the load size and soil level, adjusting the cycle and program settings to optimize resource consumption.
- **PowerClean Pro:** For heavily soiled items, this feature uses powerful water jets to remove stubborn dirt and food residues without pre-washing.
- **SaniWash:** A cycle option for enhanced hygiene.
- Refer to the control panel for specific program indicators and options.

Starting and Ending a Cycle

- Close the dishwasher door firmly.
- Press the Start button to begin the selected program.
- A useful beep indicates the end of the wash cycle.
- **NaturalDry:** At the end of the cycle, the dishwasher door automatically opens to allow natural airflow for improved drying performance.

MAINTENANCE AND CARE

Regular maintenance ensures your dishwasher operates efficiently and extends its lifespan.

Cleaning the Filters

- The filter system should be cleaned regularly to prevent blockages and ensure optimal washing results.
- Twist and remove the cylindrical filter.
- Rinse all filter components under running water. Use a brush if necessary to remove stubborn food particles.
- Reassemble the filters and place them back into the dishwasher, ensuring they are securely locked.

Cleaning the Interior and Exterior

- Wipe the exterior stainless steel surface with a soft, damp cloth and a mild detergent. Avoid abrasive cleaners.
- For the interior, run a dishwasher cleaning cycle periodically using a specialized dishwasher cleaner.

Salt Dispenser

If your water supply is hard, you may need to add dishwasher salt to the dedicated dispenser to prevent limescale buildup and improve washing performance. The salt indicator light will illuminate when a refill is needed.

TROUBLESHOOTING

Before contacting customer service, refer to the following table for common issues and their solutions.

Problem	Possible Cause	Solution
Dishwasher does not start	Door not closed properly; Power cord not plugged in; Fuse blown/circuit breaker tripped.	Ensure door is latched; Check power connection; Reset circuit breaker.

Problem	Possible Cause	Solution
Dishes are not clean	Improper loading; Insufficient detergent; Clogged spray arms/filters; Incorrect program selected.	Reload dishes correctly; Add more detergent; Clean spray arms and filters; Select a more intensive program (e.g., PowerClean Pro).
Dishes are not dry	No rinse aid; NaturalDry feature not activated; Dishes removed too soon.	Refill rinse aid dispenser; Ensure NaturalDry is functioning; Allow dishes to cool before unloading.
Unpleasant odor	Food residue in filters or drain; Infrequent cleaning.	Clean filters thoroughly; Run a dishwasher cleaning cycle.
Salt indicator light remains on (as per a review)	Sensor issue; Incorrect salt type; Salt dispenser cap not sealed.	Ensure correct dishwasher salt is used; Check dispenser cap; If issue persists, contact service.
