5. MAINTENANCE

Proper maintenance will help preserve the appearance and longevity of your Zinus Evelyn bed frame.

5.1 Cleaning

For general cleaning, wipe the upholstered surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the fabric. Ensure the cloth is only damp, not wet, to prevent moisture damage to the frame components.

5.2 Regular Checks

Periodically check all bolts and connections to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaking.

6. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common solutions:

- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all bolts and screws, especially those connecting the side rails to the headboard and footboard, and the center support legs.

- **Instability:** If the frame feels unstable, ensure all components are correctly assembled according to the instructions. Check that all legs are firmly on the ground and that the center support legs are properly installed.
- **Missing Parts:** If any parts were missing upon delivery, please contact Zinus customer support immediately.
