Claesydorn HEPA-P10

Claesydorn HEPA Filter Instruction Manual

Model: HEPA-P10

1. Introduction

Thank you for choosing the Claesydorn HEPA Filter. This filter is designed to provide superior air filtration for your cordless vacuum cleaner, capturing fine dust particles and allergens to improve air quality. This manual provides essential information for the proper installation, maintenance, and troubleshooting of your new HEPA filter.

2. Safety Information

- Always ensure the vacuum cleaner is turned off and unplugged (if applicable) before attempting to install or replace the filter.
- Do not wash the HEPA filter with water unless explicitly stated in your vacuum cleaner's manual. Washing can damage the filter material and reduce its effectiveness.
- Keep the filter away from open flames or high heat sources.
- Dispose of old filters responsibly according to local regulations.

3. Package Contents

- 1 x Claesydorn HEPA Filter (Model: HEPA-P10)

4. Setup and Installation

Follow these steps to install your new Claesydorn HEPA filter:

1. Locate the filter compartment on your cordless vacuum cleaner. Refer to your vacuum cleaner's user manual for the exact location.
2. Open the filter compartment. This may involve twisting a cover or pressing a release button.
3. Remove the old filter. If the old filter is dirty, handle it carefully to avoid spreading dust.
4. Insert the new Claesydorn HEPA filter into the compartment. Ensure it is seated correctly and securely. The

filter is circular with a black frame and white pleated material.

This image shows the Claesydorn HEPA filter, a circular component designed for cordless vacuum cleaners. It features a robust black plastic frame surrounding a pleated white filter material, which is essential for trapping fine particles.

5. Close the filter compartment, ensuring it is latched or twisted into place securely.
6. Your vacuum cleaner is now ready for use with the new HEPA filter.

5. Operating Instructions

The Claesydorn HEPA filter operates passively within your vacuum cleaner. Once installed, it works automatically to filter the air as the vacuum cleaner is used. No specific operational steps are required for the filter itself beyond proper installation.

6. Maintenance

Regular maintenance of your HEPA filter is crucial for optimal vacuum performance and air quality. The frequency of cleaning or replacement depends on usage and environment.

Cleaning the Filter:

- It is recommended to tap the filter gently over a trash can to dislodge accumulated dust and debris.
- Use a soft brush or a dry cloth to carefully wipe away any remaining surface dust.
- **Do not wash this HEPA filter with water** unless your specific vacuum cleaner model's manual explicitly states that its HEPA filter is washable. Washing can damage the filter media and reduce its filtration efficiency.

Filter Replacement:

HEPA filters have a limited lifespan. For best performance, it is recommended to replace your Claesydorn HEPA filter every 3 to 6 months, or more frequently if you notice a decrease in suction power or if the filter appears heavily soiled.

7. Troubleshooting

If you experience issues related to your vacuum cleaner's performance after installing the new filter, consider the

following:

- **Reduced Suction Power:** Ensure the filter is installed correctly and securely. A loose or improperly seated filter can lead to air leaks and reduced suction. If the filter is old or heavily clogged, replace it.
- **Unusual Noises:** Check that the filter is not obstructing any moving parts within the vacuum cleaner. Reinstall the filter to ensure proper fit.
- **Dust Escaping:** If dust is escaping from the vacuum cleaner, verify that the filter compartment is fully closed and sealed. The filter itself might be damaged or improperly installed.

If problems persist, consult your vacuum cleaner's specific user manual or contact the vacuum cleaner manufacturer's support.

8. Specifications

Feature	Detail
Brand	Claesydorn
Model Number	HEPA-P10
Color	White
Product Dimensions	43.18 x 17.78 x 27.94 cm
Item Weight	18 grams
Special Feature	HEPA filtration
Included Components	HEPA Filter
Number of Items	1

9. Warranty and Support

This Claesydorn HEPA filter is a replacement part. For warranty information regarding your vacuum cleaner or specific details about replacement parts, please refer to the documentation provided with your vacuum cleaner or contact the manufacturer of your vacuum cleaner directly. Claesydorn provides quality replacement parts designed to meet or exceed original specifications.
