Solbello B0C68442RF

Solbello® Wind-Driven® Beach Shade Instruction Manual

Model: B0C68442RF | Brand: Solbello

1. INTRODUCTION

The Solbello® Wind-Driven® Beach Shade is an innovative solution designed to provide effortless sun protection at the beach. Unlike traditional beach umbrellas, its patented design harnesses the power of the wind to remain stable, eliminating the common issue of umbrellas blowing away. This lightweight and easy-to-set-up shade offers UPF 50+ sun protection and an unobstructed 360-degree view, ensuring a comfortable and worry-free beach experience for 2 to 3 people.

Figure 1: The Solbello® Wind-Driven® Beach Shade providing ample shade for a family on the beach.

2. COMPONENTS

Your Solbello® Beach Shade package includes the following components:

- **Main Shade Fabric:** The primary blue and white fabric canopy providing UPF 50+ sun protection.
- **Main Pole Assembly:** A multi-section pole with an integrated sand auger for secure ground insertion.
- **No-Wind Kit:** An optional accessory for use in very low or shifting wind conditions, ensuring stability.
- **Carrying Bag:** A compact bag designed for easy transport and storage of all components.

3. SETUP INSTRUCTIONS

Setting up your Solbello® Beach Shade is designed to be quick and easy, typically taking less than a minute for a single person. Follow these steps for optimal stability:

1. **Prepare the Pole:** Remove the main pole assembly from the carrying bag. Extend the pole sections and ensure they are securely locked into place. The integrated sand auger is at the bottom.

2. **Anchor the Pole:** Select your desired location on the beach. Firmly twist the main pole into the sand using the handles on the auger until the red line on the pole is no longer visible, indicating sufficient depth for stability.
3. **Attach and Raise the Shade:** Unroll the main shade fabric. Attach the shade fabric to the top section of the main pole. Slide the runner mechanism up the pole until it clicks into place, fully extending the shade canopy.
4. **Optional No-Wind Kit (for very low wind):** If wind conditions are very calm or shifting, locate the two eyelets on the trailing edge of the shade. Attach the bungee cords from the No-Wind Kit to these eyelets. Secure the twisty stakes into the sand at an appropriate distance to create tension and prevent the shade from rotating freely.

4. OPERATING YOUR SOLBELLO® SHADE

The Solbello® Shade is designed to work with the wind, providing continuous shade without the need for constant adjustment. Its unique "Wind-Driven®" design allows the canopy to rotate freely with the wind,

ensuring it remains stable and does not blow away. This also provides unobstructed 360-degree views, allowing you to enjoy your surroundings.

- **Wind Adaptation:** The shade will naturally orient itself with the wind direction. This dynamic movement is normal and ensures the shade remains securely anchored.
- **QuietEdge Technology:** Equipped with proprietary QuietEdge technology, the Solbello® Shade minimizes noise in high winds, enhancing your relaxation.
- **Sun Protection:** The canopy provides UPF 50+ sun protection, effectively blocking harmful UV rays. Position your chairs and belongings within the shaded area for maximum protection.
- **Space Utilization:** The shade is designed to comfortably accommodate 2 to 3 people along with typical beach essentials.

5. MAINTENANCE

To ensure the longevity and optimal performance of your Solbello® Beach Shade, follow these simple maintenance guidelines:

- **Cleaning:** The shade fabric should be **Hand Wash Only**. Use mild soap and water to clean any dirt or sand. Rinse thoroughly and allow to air dry completely before packing away.
- **Storage:** Ensure all components are dry before storing them in the carrying bag to prevent mold or mildew. Store in a cool, dry place away from direct sunlight when not in use.
- **Inspection:** Periodically inspect the pole, fabric, and any accessories for signs of wear or damage. Address any issues promptly to maintain safety and functionality.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Shade is unstable or blows over easily.	Pole not inserted deep enough into the sand.	Ensure the pole is twisted into the sand until the red line is fully covered.
Shade is not providing adequate coverage in low wind.	Insufficient wind to keep the shade fully extended or oriented.	Utilize the included No-Wind Kit. Attach the bungee cords to the eyelets and secure the twisty stakes into the sand to maintain tension and position.
Difficulty extending or collapsing the shade.	Sand or debris in the pole mechanism.	Rinse the pole sections with fresh water and ensure they are clean and dry. Lubricate if necessary.
