Viconor B0C696JYCL

Viconor Red Light Therapy Device User Manual

Model: B0C696JYCL

Introduction

This manual provides comprehensive instructions for the safe and effective use of your Viconor Red Light Therapy Device. Designed for both facial and body applications, this device utilizes a combination of 660nm red light and 850nm near-infrared light to support skin health, alleviate muscle and joint discomfort, and promote overall well-being. Please read this manual thoroughly before first use and retain it for future reference.

Safety Information

Important Safeguards:

- Not for use by people with heart disease or pacemakers.
- Not for use by pregnant women.
- Not for use by people with bleeding skin conditions.
- Consult a healthcare professional before use if you have any pre-existing medical conditions or are taking medications.
- Do not look directly into the light source. Protective eyewear is recommended.
- Keep out of reach of children.
- Do not use the device in wet environments or near water.
- Unplug the device when not in use and before cleaning.

Product Features

- **Dual Wavelength Technology:** Combines 660nm (red light) and 850nm (near-infrared light) for comprehensive therapy.
- **Curved Design:** The innovative curved structure allows the red light to focus effectively on the treatment area, enhancing light concentration and therapeutic effect.
- **Versatile Application:** Suitable for both facial skin care and body pain relief, targeting muscles and joints.
- **Portable and Lightweight:** Compact design allows for easy placement on countertops or hanging, enabling use anywhere in your home or office.

- **Adjustable Holder Stand:** The included stand allows for vertical or horizontal positioning and angle adjustment for optimal treatment.

Setup

1. **Unpack:** Carefully remove the Viconor Red Light Therapy Device and all accessories from the packaging.
2. **Positioning:** Place the device on a stable, flat surface using the included desktop stand, or hang it using the integrated hook. Ensure the device is positioned to allow the light to reach the desired treatment area comfortably.
3. **Connect Power:** Insert the power cord into the device's power input port, then plug the other end into a standard electrical outlet.
4. **Adjust Angle:** Utilize the adjustable holder stand to set the optimal angle for your therapy session. The panel can be placed vertically or horizontally.

Operating Instructions

1. **Power On:** Press the power button on the device or remote control (if included) to turn on the red light therapy.
2. **Treatment Distance:** Position the device approximately 6-12 inches (15-30 cm) from the skin for optimal light

penetration.

3. **Session Duration:** For best results, use the device for 15-30 minutes per session.
4. **Frequency:** Use daily or as recommended by a healthcare professional. Consistent use is key for noticeable improvements in skin condition and pain relief.
5. **Target Areas:**
    - **For Face:** Position the device to cover the entire face. The curved design helps focus the light.
    - **For Body:** Direct the light to areas experiencing inflammation, soreness, or requiring improved circulation, such as the back, shoulders, joints, or muscles.
6. **Power Off:** After your session, press the power button to turn off the device and unplug it from the power outlet.

Image: Various individuals applying red light therapy to different body parts, including feet, shoulders, back, and arms, demonstrating full body light therapy applications.

Maintenance

- **Cleaning:** Ensure the device is unplugged before cleaning. Wipe the surface of the device with a soft, dry cloth. Do not use abrasive cleaners or immerse the device in water.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and moisture. Keep it in its original packaging or a protective case when not in use to prevent damage.
- **Inspection:** Periodically inspect the power cord and the device for any signs of damage. If any damage is found, discontinue use and contact customer support.

Troubleshooting

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Device does not turn on.	Power cord not properly connected; no power from outlet.	Ensure power cord is securely plugged into both the device and a working electrical outlet. Test the outlet with another appliance.
Lights are dim or flickering.	Low power supply; device malfunction.	Ensure the power source is stable. If the problem persists, contact customer support.
Device feels hot during use.	Normal operation; prolonged use.	A slight warmth is normal. If it becomes excessively hot, discontinue use immediately and allow it to cool down. Ensure proper ventilation around the device.
