Alipis Adjustable Suction Cup Shower Head Holder User Manual

Model: F1648KT43WBX21331U

INTRODUCTION

Thank you for choosing the Alipis Adjustable Suction Cup Shower Head Holder. This product is designed to provide a convenient and flexible solution for holding your handheld shower head without the need for drilling or permanent installation. Its strong suction cup mechanism allows for easy repositioning and secure attachment to smooth, non-porous surfaces.

This manual provides detailed instructions for installation, operation, maintenance, and troubleshooting to ensure optimal performance and longevity of your shower head holder.

SAFETY INFORMATION

- Ensure the installation surface is clean, dry, and smooth before attaching the suction cup. Rough, textured, or porous surfaces are not suitable.
- Do not install on painted walls, wallpaper, or surfaces that may be damaged by strong suction.
- Verify the holder is securely attached before placing the shower head.
- Do not overload the holder with excessive weight. It is designed for standard handheld shower heads.
- Keep out of reach of children to prevent accidental detachment or misuse.

PACKAGE CONTENTS

Please check the package to ensure all components are present:

- 2 x Alipis Adjustable Suction Cup Shower Head Holders

SETUP AND INSTALLATION

The Alipis shower head holder features a drill-free, self-priming suction cup installation. Follow these steps for a secure attachment:

1. **Prepare the Surface:** Choose a smooth, flat, and non-porous surface such as ceramic tile, glass, smooth wood, or smooth metal. Thoroughly clean the chosen area with a non-abrasive cleaner and dry it completely. Ensure there is no dust, soap scum, or moisture.

MATERIAL: STAINLESS STEEL
Not easy to rust

FAST AND CONVENIENT
For fixing shower heads in bathrooms

2. **Position the Holder:** Press the suction cup firmly against the prepared surface at the desired height and location.

Image: An Alipis shower head holder securely installed on a tiled shower wall, holding a handheld shower head.

3. **Engage the Suction:** While pressing, push down the lever or rotate the base (depending on the specific design of your holder) to create a strong vacuum seal. You should feel a firm resistance, indicating the suction cup is engaged.

Image: Detailed view emphasizing the premium material and fine craftsmanship of the shower head holder.

4. **Test Security:** Gently pull on the holder to ensure it is firmly attached and does not slide or detach. If it moves, re-clean the surface and reapply.
5. **Adjust Angle (if applicable):** The holder features an adjustable joint. Loosen the knob, adjust the angle of the shower head bracket to your preference, and then tighten the knob to secure the position.

OPERATING INSTRUCTIONS

Once installed, the Alipis shower head holder is simple to operate:

- **Placing the Shower Head:** Insert the handheld shower head into the holder's cradle. Ensure it sits securely.
- **Adjusting Height/Position:** To relocate the holder, simply release the suction by lifting the lever or rotating the base in the opposite direction. Re-clean the new desired surface and reapply as per the installation steps. This allows for easy adjustment of shower head height for different users or purposes.
- **Adjusting Angle:** Loosen the adjustable knob on the holder, pivot the shower head to the desired angle, and then tighten the knob to lock it in place.

MAINTENANCE

Regular maintenance will help preserve the appearance and functionality of your shower head holder:

- **Cleaning:** Wipe the holder and suction cup with a soft, damp cloth. For stubborn stains, use a mild soap solution. Avoid abrasive cleaners or harsh chemicals, as they can damage the finish and the suction cup material.
- **Suction Cup Care:** Periodically (e.g., monthly or if suction weakens), remove the holder, clean both the suction cup and the wall surface thoroughly, and reapply. This helps maintain optimal suction power.
- **Inspection:** Regularly inspect the holder for any signs of wear or damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Holder does not stick or falls off.	Surface is not clean, dry, or smooth enough; air trapped under suction cup; suction cup is dirty or damaged.	◦ Ensure surface is thoroughly cleaned and dried. ◦ Reapply the holder, pressing firmly and engaging the suction mechanism completely to remove all air. ◦ Clean the suction cup with warm water and mild soap, then dry completely. ◦ Ensure the surface is non-porous (e.g., ceramic tile, glass, smooth metal).
Shower head slips in the holder.	Holder opening is too wide for the shower head; holder is not angled correctly.	◦ Ensure your shower head's diameter is compatible with the holder. ◦ Adjust the angle of the holder to provide a more secure grip on the shower head.

SPECIFICATIONS

Feature	Detail
Model Number	F1648KT43WBX21331U
Brand	Alipis
Material	Stainless Steel
Color	Silver
Dimensions (L x W x H)	2.76 x 1.57 x 2.36 inches (7 x 4 x 6 cm)
Item Weight	4.2 ounces (per holder)
