Armitron 20/4604NVSBN

Armitron Men's Genuine Crystal Accented Leather Strap Watch

Model: 20/4604NVSBN

INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, and maintenance of your Armitron Men's Genuine Crystal Accented Leather Strap Watch. Designed for durability and style, this timepiece features a scratch-resistant mineral crystal lens and reliable Japanese quartz movement. Please read this manual thoroughly to ensure proper use and longevity of your watch.

PRODUCT OVERVIEW

Front View: Displays the rectangular silver-tone case, blue dial with four genuine crystal accents at the 12, 3, 6, and 9 o'clock positions, and the brown leather strap.

Side View: Illustrates the slim profile of the watch case and the position of the crown for time adjustment.

Back View: Shows the underside of the watch and the buckle closure mechanism of the leather strap.

Packaging: The watch is presented in a sturdy Armitron branded box, designed to protect the timepiece during transport and storage.

Color Variants: The image displays two versions of the watch, highlighting the Silver/Brown/Navy Blue model alongside a Black/Black variant, showcasing the design consistency across different color options.

SETUP

Setting the Time

1. **Pull out the Crown:** Gently pull the crown (the small knob on the side of the watch case) outwards until you feel a click. This will stop the second hand.
2. **Adjust the Time:** Rotate the crown clockwise or counter-clockwise to move the hour and minute hands to the correct time.
3. **Push in the Crown:** Once the time is set, push the crown back into its original position. The second hand will resume movement.

Wearing the Watch

- Unfasten the buckle on the leather strap.
- Place the watch on your wrist and insert the strap through the buckle.
- Adjust the strap length to a comfortable fit using the available holes and secure the buckle. Ensure the watch is snug but not too tight, allowing for proper circulation.

OPERATING THE WATCH

Your Armitron watch is powered by a reliable Japanese quartz movement, ensuring accurate timekeeping. No daily

winding is required. The watch is designed for straightforward operation.

Water Resistance

This watch is water resistant to 165 feet (50 meters). This means it is suitable for short periods of recreational swimming, but not for diving or snorkeling. Avoid operating the crown or pushers while the watch is wet to prevent water ingress.

Official Product Video: This video provides a 360-degree view of the Armitron Men's Crystal Accented Leather Strap Watch, showcasing its design and features from various angles.

MAINTENANCE

- Cleaning:** Wipe the watch case and crystal with a soft, dry cloth. For the leather strap, use a slightly damp cloth and allow it to air dry completely. Avoid using harsh chemicals or abrasive materials.
- Storage:** When not in use, store your watch in a cool, dry place, away from direct sunlight and extreme temperatures. The original packaging can be used for storage.
- Battery Replacement:** The quartz movement is powered by a battery. When the watch stops or the second hand begins to skip, it indicates a low battery. Battery replacement should be performed by a qualified watch technician to ensure water resistance is maintained.
- Leather Strap Care:** Avoid prolonged exposure of the leather strap to water, sweat, and direct sunlight, as this can cause discoloration or damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch is not running.	Battery is depleted or crown is pulled out.	Push the crown fully in. If it still doesn't run, the battery may need replacement by a professional.
Time is inaccurate.	Time was not set correctly or watch was exposed to strong magnetic fields.	Reset the time as per "Setting the Time" instructions. Keep the watch away from strong magnets.
Moisture under the crystal.	Exposure to excessive humidity or water ingress.	Immediately take the watch to a qualified watch technician for inspection and repair to prevent internal damage.
Leather strap shows wear.	Normal wear and tear, or exposure to harsh conditions.	Clean and condition the strap regularly. If severely worn, consider replacing the strap.

SPECIFICATIONS

Feature	Detail
