4. Assembly Instructions

Each nanoblock Chiikawa figure comes with its own specific, detailed instruction sheet. Follow these general guidelines for a successful building experience:

1. **Preparation:** Open one character set at a time. Lay out the blocks on a clean, flat surface. It is helpful to sort blocks by color and size before you begin.
2. **Follow Instructions:** Refer to the included step-by-step diagrams for each character. Pay close attention to the orientation and placement of each block.
3. **Precision:** nanoblocks are very small. Use tweezers (not included) if you find it difficult to place blocks with your fingers. Ensure blocks are firmly pressed together to secure connections.
4. **Layer by Layer:** Most nanoblock models are built layer by layer from the base upwards. Complete each layer before moving to the next.
5. **Check Your Work:** Periodically compare your progress with the instruction diagrams to catch any errors early.

5. Operating Instructions (Handling)

Once assembled, your nanoblock figures are delicate models. Handle them with care to prevent disassembly.

- **Display:** Place your finished figures on a stable, flat surface where they are unlikely to be knocked over.
- **Movement:** When moving a figure, support it from the base to maintain its structural integrity. Avoid picking it up by small, protruding parts.
- **Disassembly:** If you wish to disassemble a figure, do so gently, reversing the assembly steps. This can be useful for storing blocks or rebuilding.

6. Maintenance and Care

Proper care will ensure your nanoblock figures remain in excellent condition.

- **Cleaning:** To remove dust, use a soft brush (like a clean makeup brush or a soft-bristled toothbrush) or a can of compressed air. Avoid using water or harsh cleaning agents, as these can damage the blocks or printed details.
- **Storage:** If disassembling for storage, keep blocks in a sealed container to prevent loss and protect them from dust

and moisture.

- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause colors to fade over time. Display figures in a shaded area.

7. Troubleshooting

Here are solutions to common issues you might encounter:

- **Missing Blocks:** Carefully check the packaging and your building area. If blocks are genuinely missing from a new, unopened set, refer to the 'Warranty and Support' section for assistance.
- **Difficulty Connecting Blocks:** Ensure blocks are correctly aligned. Apply gentle, even pressure. If a block is particularly stubborn, try wiggling it slightly while pressing.
- **Figure is Unstable:** Double-check all connections, especially the base layers. Ensure all blocks are fully pressed down and correctly interlocked according to the instructions.
- **Instructions are Unclear:** Review the diagrams carefully. Sometimes rotating the instruction sheet or the model can help clarify the next step. Online communities or official nanoblock resources may also offer visual guides.
