Introduction

The HEAD Men's Revolt Pro 4.0 PB Pickleball Shoes are engineered for players who demand durability and performance on the court. Designed for aggressive baseliners, these shoes provide reliable support and stability during intense play. The innovative HEAD T-KORE 360° performance technologies are integrated into both the sole and upper, delivering core strength, enhanced stability, abrasion resistance, and torsional support.

Key Features

- **Upper Construction:** Features strong and durable mesh for breathability and support, an engineered PU molded chassis for structural integrity, an internal TPU heel counter for secure fit, and integrated lacing straps.
- **Midsole Design:** Incorporates a higher heel-to-toe drop for optimal court positioning, a triple-density midsole for varied cushioning, and a 3D anti-torsion midfoot shank to prevent twisting.
- **Outsole Technology:** Equipped with a hybrid outsole profile suitable for multiple court surfaces. It includes special durability zones for hardcourt use and open tread zones designed for superior grip on other surfaces, all made from a super durable rubber compound.

Usage Guidelines

These shoes are specifically designed for pickleball and other racquet sports, offering the necessary support and traction for dynamic court movements. Ensure laces are securely tied to maximize ankle support and prevent slippage during play. While designed for durability, regular inspection for wear and tear is recommended to maintain optimal performance and safety.

Care and Maintenance

- **Cleaning:** To clean, gently wipe the shoes with a damp cloth and mild soap. Avoid harsh chemicals or abrasive cleaners that may damage the materials.
- **Drying:** Allow shoes to air dry naturally at room temperature. Do not expose them to direct heat sources like radiators or direct sunlight, as this can cause material degradation.
- **Storage:** Store shoes in a cool, dry place away from direct sunlight when not in use.
- **Inspection:** Periodically check the outsole for excessive wear, especially in high-impact areas, to ensure continued grip and support.
