## Knirps US.050

# Knirps US.050 Ultra Light Pocket Size Manual Rain Umbrella

INSTRUCTION MANUAL

## Introduction

The Knirps US.050 Ultra Light Pocket Size Manual Rain Umbrella is engineered for exceptional portability and durability, offering reliable protection from rain and wind. Its compact and lightweight design makes it an ideal companion for daily use and travel, fitting easily into bags and pockets.

## Setup

Your Knirps US.050 umbrella comes with a matching protective case. To prepare for first use, carefully remove the umbrella from its case.

## Operating the Umbrella (Manual Open & Close)

The US.050 features a manual open and close mechanism for straightforward operation.

### To Open:

Gently shake the umbrella to loosen the canopy. Push the runner up the shaft until it locks into place, fully extending the canopy.

### To Close:

Press the release button on the runner and pull the runner down the shaft until the canopy is fully collapsed. Fold the canopy neatly and secure it with the strap, then place it back into its protective case.

Video: This video demonstrates the general operation and features of Knirps umbrellas, including opening and closing mechanisms. Note: This video provides a general overview of Knirps umbrellas and may not specifically feature the US.050 model's manual operation.

## Maintenance

Proper care ensures the longevity of your Knirps US.050 umbrella.

- After each use, fully open the umbrella and allow it to air dry completely. This prevents mildew and preserves the fabric's water-resistant properties.
- Once dry, neatly fold the canopy and secure it with the attached strap before returning it to its protective case. Avoid folding it too tightly.
- To clean, use a soft cloth moistened with plain water. Do not use cleaning products, as they may damage the waterproof coating.
- Store the umbrella in a cool, dry place when not in use.

## Troubleshooting

The US.050 is designed to withstand wind speeds up to 100 km/h. In strong winds, if the canopy inverts, it can typically be restored to its original shape by closing and reopening the umbrella. This is a safety mechanism to prevent damage to the frame.

If the umbrella mechanism feels stiff, ensure the canopy is not tangled before attempting to open or close it.

## Specifications

| | |
|---|---|
| **Weight** | 115 Grams (4.06 oz) |
| **Closed Length** | 21 cm (8.3 in) |

## Support

For further assistance, repair services, or inquiries regarding your Knirps US.050 umbrella, please visit the official Knirps website or contact their customer support. Knirps is dedicated to providing high-quality, long-lasting products and reliable service.

## Additional Features

The Knirps US.050 is renowned for its ultra-light and compact design, making it an essential accessory for any weather condition.

Image: A person placing the compact Knirps US.050 umbrella into a small handbag, demonstrating its portability.

Weighing just 115 grams and folding down to a mere 21 cm, its ultra-flat shape allows it to fit effortlessly into pockets, purses, or backpacks, ensuring you are always prepared.
