PACKAGE CONTENTS

Each HUIZHEN replacement parts kit contains the following items:

- 1 x Main Roller Brush
- 4 x Side Brushes (with screws included)
- 4 x HEPA Filters
- 3 x Microfiber Mop Pads
- 3 x Dust Bags

INSTALLATION AND REPLACEMENT

Regular replacement of vacuum cleaner accessories is crucial for maintaining optimal cleaning efficiency and extending the lifespan of your device. Follow these general guidelines for installation and replacement.

Main Roller Brush Installation

The main roller brush is designed to effectively pick up debris from various floor types. It features sturdy ABS material and soft nylon bristles to prevent floor damage.

HUIZHEN

Main Brush

ABS material

Sturdy and durable.
Non-toxic and odorless.
Environmentally friendly.

Nylon Material

Soft nylon bristles
Better dust cleaning
No damage to floor

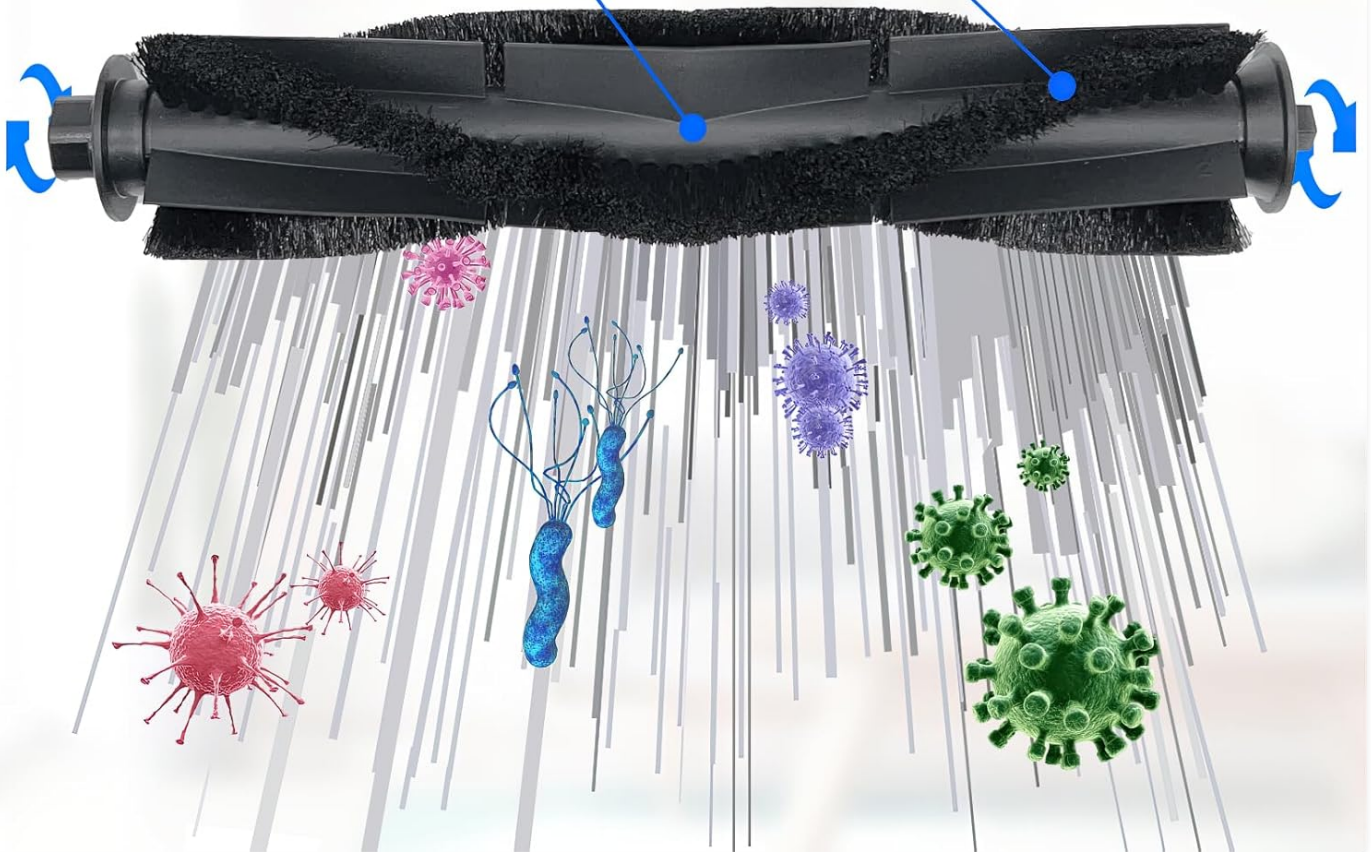

Image: Detailed view of the main roller brush, highlighting its construction from sturdy ABS material and soft nylon bristles for effective cleaning without damaging floors.

1. Turn off and unplug the robot vacuum.
2. Flip the vacuum over to access the brush compartment.
3. Remove the brush guard or cover, typically by unlatching clips or unscrewing.
4. Lift out the old main roller brush.
5. Insert the new main roller brush, ensuring it clicks into place.
6. Replace the brush guard/cover and secure it.

Side Brush Installation

Side brushes sweep debris from edges and corners into the vacuum's path. These brushes are made with soft nylon bristles and

durable ABS material, and come with screws for secure attachment.

HUIZHEN

Side Brush

Soft Nylon Bristles
No damage to floor

Tighten the screws
Does not fall off

Durable ABS Material
Sturdy and Durable

1. Turn off and unplug the robot vacuum.
2. Flip the vacuum over.
3. Locate the side brushes. They are usually held by a single screw.
4. Unscrew and remove the old side brush.
5. Align the new side brush with the post and secure it with the provided screw.

HEPA Filter Replacement

HEPA filters are crucial for trapping fine dust, pollen, mold, bacteria, and other airborne particles as small as 0.3 microns, ensuring cleaner air output.

HUIZHEN

Hepa Filter

The Hepa Filter theoretically removes at least **99.97%** of dust, pollen, mold, bacteria, and any airborne particles as small as **0.3** microns.

Image: Illustration of a HEPA filter, demonstrating its filtration capability for microscopic particles like dust, pollen, mold, and bacteria.

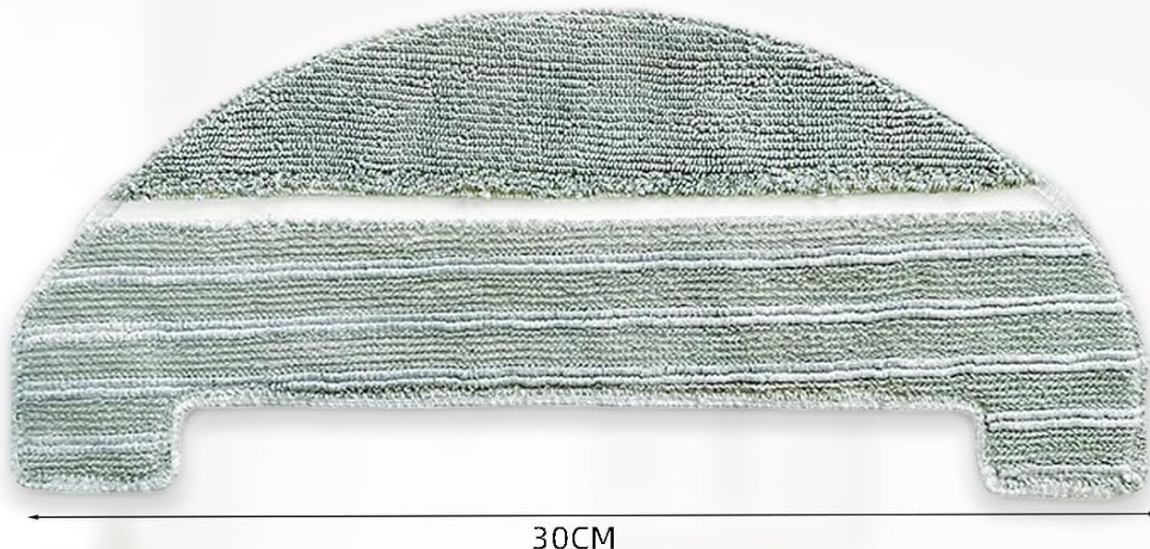

1. Open the dustbin compartment on your robot vacuum.
2. Remove the dustbin.
3. Locate the filter within the dustbin.
4. Remove the old HEPA filter by pulling it out.
5. Insert the new HEPA filter firmly into its slot.
6. Reinstall the dustbin into the vacuum.

Mop Pad Attachment

Microfiber mop pads are designed for wet cleaning, made from fine, quality fabrics with excellent sewing for effective mopping.

HUIZHEN

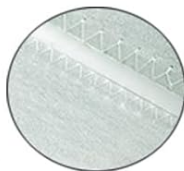

Mop Pad

**Excellent
sewing**

Image: Close-up of a microfiber mop pad, highlighting its fine fiber construction, quality fabrics, and excellent sewing for durability and cleaning performance.

1. Locate the mop pad attachment area on the underside of your vacuum.
2. Attach the new microfiber mop pad, typically using a hook-and-loop fastener or by sliding it into a designated slot.
3. Ensure the pad is securely attached before operating the vacuum in mopping mode.

Dust Bag Replacement

Dust bags are essential for collecting dust, dirt, fur, and pollen, ensuring efficient self-emptying functionality.

HUIZHEN

Dust Bag

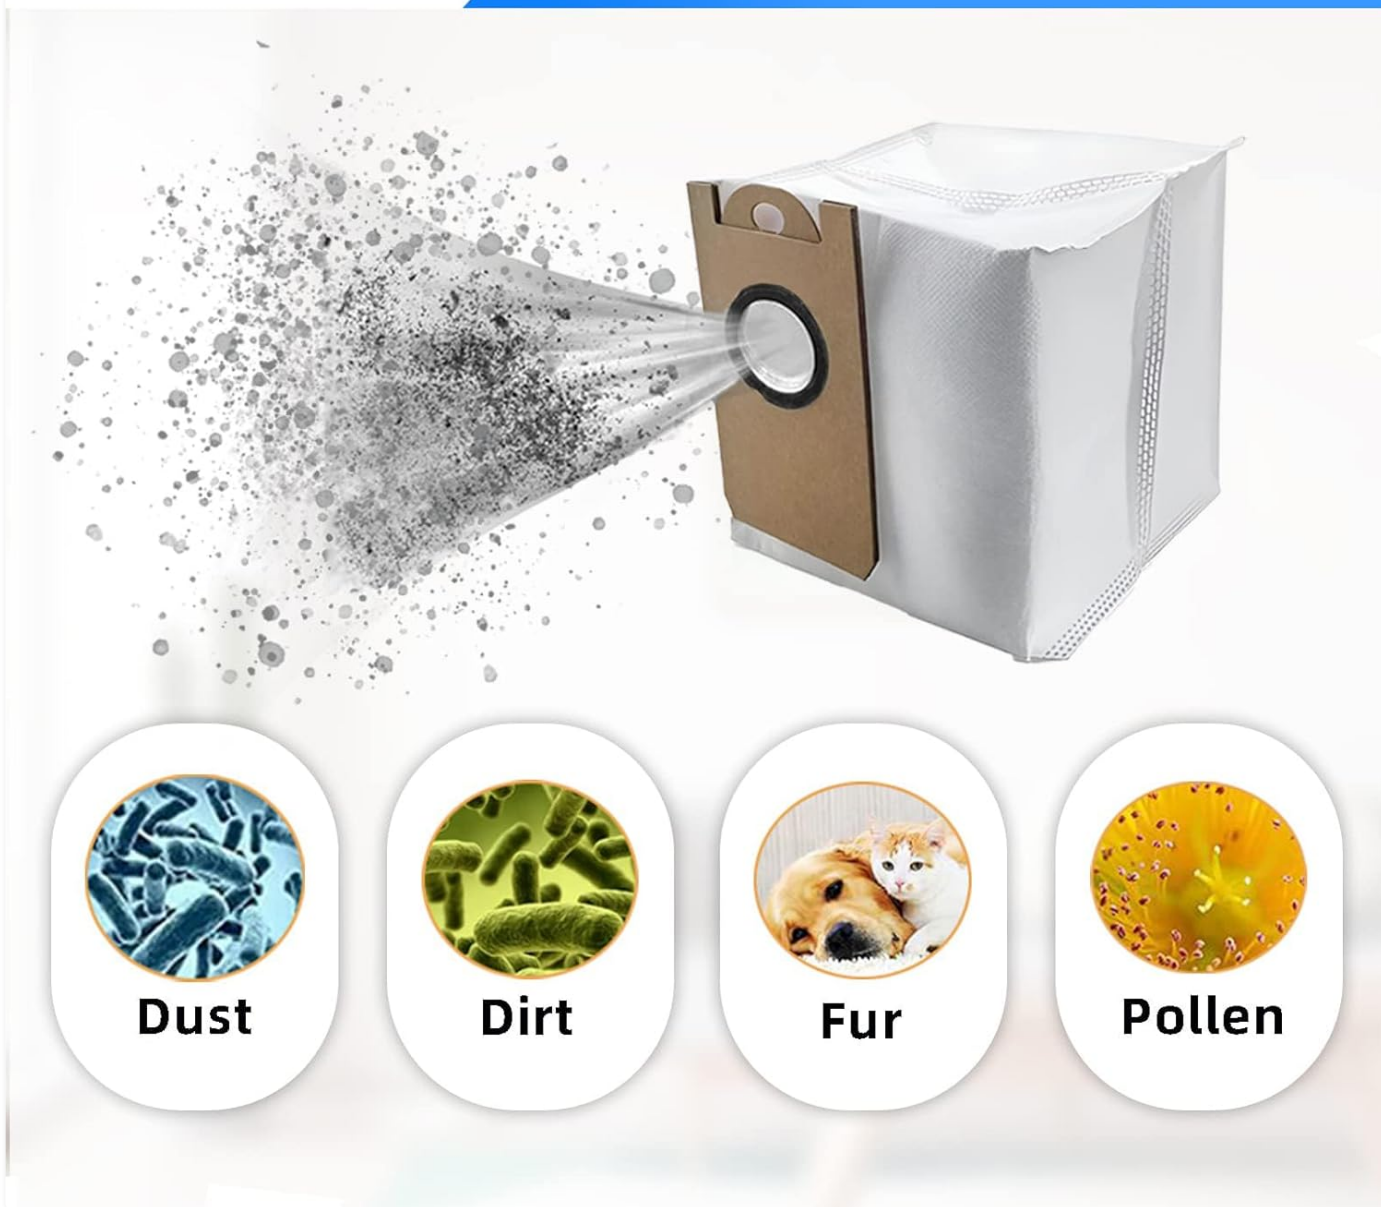

Image: Diagram illustrating the function of a dust bag, showing it collecting dust, dirt, pet fur, and pollen particles.

1. Open the dustbin or self-emptying station compartment.
2. Carefully remove the full dust bag, ensuring the opening is sealed to prevent dust leakage.
3. Insert a new dust bag into the compartment, making sure it is properly seated.
4. Close the compartment securely.

MAINTENANCE AND CARE

To ensure your iHome AutoVac robot vacuum maintains optimal performance, regular maintenance and timely replacement of accessories are recommended.

- **Replacement Frequency:** It is recommended to replace all accessories every three months, or more frequently depending on usage and environment (e.g., homes with pets or high traffic).
- **Side Brush Recovery:** If side brushes appear bent or curled due to shipping or storage, soak them in warm water for a few minutes. This will help them recover their original shape and will not affect their quality or performance.

- **Cleaning:** Regularly clean the main roller brush, side brushes, and mop pads to remove tangled hair and debris. Tap out dust from HEPA filters between replacements.

TROUBLESHOOTING

This section addresses common issues related to the replacement parts.

Problem	Solution
Side brushes are bent or curled.	Soak the side brushes in warm water for a few minutes to help them recover their original shape. This will not affect their quality or performance.
Vacuum cleaning efficiency has decreased.	Ensure all replacement parts (main brush, side brushes, HEPA filter, mop pads, dust bag) are installed correctly. Consider replacing parts if they are older than three months or show significant wear.
Dust bag fills up quickly.	This may indicate a high amount of debris in your environment. Ensure the dust bag is properly installed and consider more frequent replacement if necessary.

SPECIFICATIONS

Feature	Detail
Brand	HUIZHEN
Compatible Models	iHome AutoVac Nova (iHRV6-BLK), iHome AutoVac Halo (iHRV7-SLV)
Material	Sturdy ABS materials + HEPA Filter + Microfiber Mop Pads + 4 layers of effective filter bags
Number of Pieces	15 (1 Main Roller Brush, 4 Side Brushes, 4 Hepa Filters, 3 Microfiber Mop Pads, 3 Dust Bags)
