4. Setup

Follow these steps to set up your landline phone:

1. **Connect the Handset:** Plug one end of the coiled handset cord into the port on the side of the phone base and the other end into the handset.
2. **Connect the Telephone Line:** Plug one end of the telephone line cord into the 'LINE' port on the back of the phone base and the other end into your wall telephone jack.
3. **Connect Power (if applicable):** If your model requires external power, plug the power adapter into the designated port on the phone base and then into a standard electrical outlet. This phone typically operates without external power, drawing power directly from the telephone line.
4. **Test the Connection:** Lift the handset. You should hear a dial tone. If not, recheck all connections.

5. Operating Instructions

5.1 Making a Call

1. Lift the handset.
2. Listen for a dial tone.
3. Dial the desired phone number using the large numeric keypad.
4. Wait for the call to connect.
5. To end the call, place the handset back on the base.

5.2 Receiving a Call

1. When the phone rings, lift the handset to answer.
2. To end the call, place the handset back on the base.

5.3 Adjusting Volume

The phone features adjustable ringer and handset volumes:

- **Ringer Volume:** A switch on the side or back of the phone base allows you to adjust the ringer volume (e.g., High/Low/Off).
- **Handset Volume:** During a call, press the dedicated volume button (often marked with a speaker icon) to cycle through available handset volume levels.

5.4 Speed Dial / Picture Buttons

This phone includes configurable picture buttons for quick dialing of frequently called numbers:

1. **Programming:** Refer to the specific instructions provided with your phone for programming these buttons. Typically, you will enter a programming mode, dial the number, and then press the desired picture button to save it.
2. **Using:** To dial a stored number, simply lift the handset and press the corresponding picture button.

Image 5.2: Close-up view of the customizable picture buttons for speed dialing.

5.5 SOS Emergency Dialing

The phone features a dedicated SOS button for emergency situations:

1. **Programming:** Ensure an emergency contact number (e.g., 911 or a family member) is programmed into the SOS button. Consult your phone's specific programming instructions.
2. **Using:** In an emergency, lift the handset and press the 'SOS' button. The phone will automatically dial the pre-programmed emergency number.

5.6 Redial Function

To redial the last number called:

1. Lift the handset.
2. Press the 'REDIAL' button. The phone will automatically dial the last outgoing number.

6. Maintenance

- **Cleaning:** Wipe the phone's surface with a soft, dry, lint-free cloth. Do not use abrasive cleaners or solvents.
- **Storage:** If storing the phone for an extended period, disconnect it from the telephone line and power outlet (if

applicable) and store it in a cool, dry place.

7. Troubleshooting

Problem	Possible Cause	Solution
No dial tone	Telephone line not connected properly or line issue.	Check all telephone line connections. Test with another phone if possible.
Phone not ringing	Ringer volume set to 'Off' or 'Low'.	Adjust the ringer volume switch on the phone base.
Cannot hear caller / Caller cannot hear me	Handset volume too low or handset cord loose.	Adjust handset volume during a call. Ensure handset cord is securely connected.
Speed dial buttons not working	Numbers not programmed correctly.	Re-program the speed dial buttons according to the programming instructions.
