Key Features:

- **Multiple Access Modes:** Fingerprint, PIN code, physical key, guest code, and one-touch locking.
- **Smart Features:** Voice guidance system and auto-lock functionality.
- **Long Battery Life:** Extended operation time with low battery alerts.
- **Easy Installation:** Designed for DIY installation with included hardware.
- **Durable Design:** Metal construction with backlit keypad and fingerprint scanner.

2. SETUP AND INSTALLATION

Follow these steps to install your BULIST UD01F Smart Deadbolt Lock. Ensure you have all components as listed in the product manual before beginning.

Installation Guidance Video:

Step-by-Step Installation:

1. **Prepare the Door:** Ensure your door meets the required dimensions. The lock is suitable for 2-1/8 inch (54mm) door holes.

2. **Install the Latch:** Adjust the latch length if necessary (60mm or 70mm) and insert it into the door edge. Secure with screws.

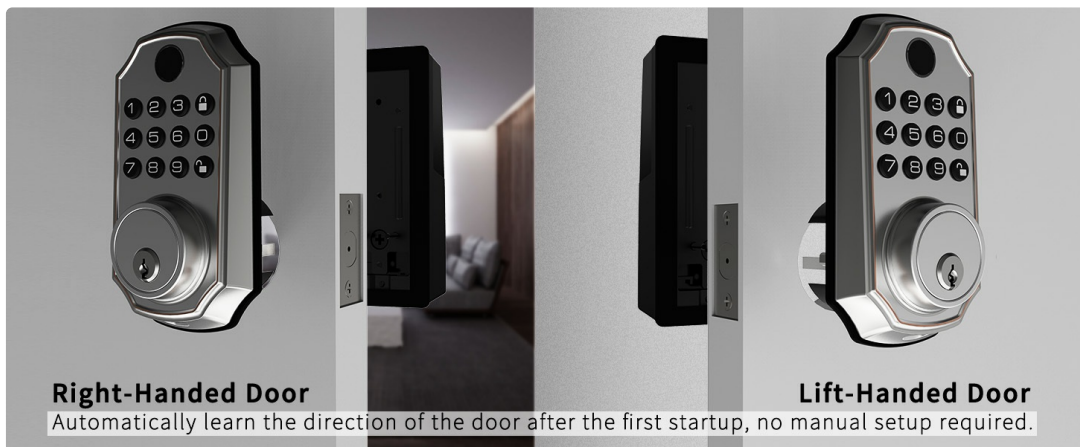

Image: Door thickness measurement guide for selecting appropriate mounting screws.

3. **Install Exterior Assembly:** Connect the cable from the exterior unit to the interior mounting plate. Ensure the spindle is correctly aligned with the latch mechanism.

4. **Install Mounting Plate:** Route the cable through the mounting plate and secure the plate to the door using the appropriate mounting screws based on your door's thickness.

5. **Install Interior Assembly:** Connect the cable from the exterior unit to the interior assembly. Ensure the thumb turn spindle is correctly engaged. Secure the interior assembly to the mounting plate with screws.

6. **Install Batteries:** Insert 4 AA batteries into the battery compartment of the interior assembly.

7. **Test Operation:** After installation, test all functions (keypad, fingerprint, key) to ensure proper operation.

3. OPERATING INSTRUCTIONS

The BULIST UD01F Smart Deadbolt Lock offers various methods for secure access.

Multiple Access Modes:

- **Fingerprint Unlock:** Up to 50 unique fingerprints can be stored. The lock features 360° recognition and a 0.3-second unlock time with 99.9% accuracy.
- **PIN Code Unlock:** Up to 50 user codes can be programmed.
- **One-Time Code Unlock:** Generate up to 10 temporary codes for guests or deliveries, which automatically delete after use.
- **Mechanical Key:** Two physical keys are provided for traditional access or emergency override.

- **One-Touch Lock:** Simply press the lock button to secure the deadbolt.

Video: Instructions on how to add a new user code to the smart deadbolt lock.

1. Press and hold the unlock key for 2 seconds.
2. Input the existing user code or fingerprint to authorize.
3. Press '1' to add a normal user code.
4. Input a 4-8 digit code and press the unlock key to confirm.
5. Input the same user code again and press the unlock key to confirm.
6. Press the lock key to exit setting mode.

Adding a Fingerprint:

Your browser does not support the video tag.

Video: Instructions on how to add a new fingerprint to the smart deadbolt lock.

1. Press and hold the unlock key for 2 seconds.
2. Input the existing user code or fingerprint to authorize.
3. Press '3' to add a fingerprint.
4. Perform five consecutive fingerprint scans on the sensor.
5. Press the lock key to exit setting mode.

Auto-Lock Functionality:

The lock can be configured to automatically lock after a set period. This feature can be enabled or disabled based on your preference.

Anti-Peeping Code:

To prevent others from guessing your PIN code, you can enter random digits before or after your

actual code. The lock will still recognize the correct sequence within the longer input.

4. MAINTENANCE

Battery Life and Emergency Power:

The BULIST UD01F Smart Deadbolt Lock is powered by 4 AA batteries (not included). It provides long-lasting operation and will alert you when the battery level is low. In case of complete battery depletion, an emergency USB-C port is available on the exterior unit to provide temporary power for access.

Long Battery Life & Emergency Charge
Ensuring uninterrupted security

5. TROUBLESHOOTING

Restoring Factory Settings:

If you encounter issues or wish to reset all programmed settings, you can restore the lock to its factory default state.

Your browser does not support the video tag.

Video: Instructions on how to restore the smart deadbolt lock to factory settings.

1. Press and hold the indoor unlock/lock key for 5 seconds.
2. Press the unlock key on the exterior keypad to confirm the operation.
3. The lock will indicate "Operation succeeded" upon successful reset.

Common Issues:

- **Fingerprint Recognition:** If fingerprint recognition is inconsistent, ensure the sensor is clean and your finger is placed correctly. Some users with very light fingerprints may experience issues.
- **Low Volume Voice Guidance:** The voice guidance volume can be adjusted. Refer to the full product manual for specific steps to adjust volume settings.
- **Lock Not Responding:** Check battery levels. If batteries are depleted, use the emergency USB-C port or physical key for access.
