

Roinvou 2+64G

Roinvou Car Radio for Honda Fit 2008-2013 (Model: 2+64G)

Instruction Manual

1. INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your Roinvou 10.1-inch Android 13 IPS Touch Screen Car Stereo. This unit is specifically designed for Honda Fit (Jazz) models manufactured between 2008 and 2013 (Left-Hand Drive versions). Please read this manual thoroughly before installation and use to ensure proper function and safety.

2. IMPORTANT SAFETY INFORMATION

- **Professional Installation Recommended:** Due to the complexity of car electrical systems, professional installation is highly recommended.
- **Vehicle Compatibility:** This unit is compatible only with Honda Fit (Jazz) 2008-2013 Left-Hand Drive models. Verify your vehicle's compatibility before proceeding.
- **Power Cable Selection:** Two power cables are included. Select the one that matches your original car's power port. Incorrect connection can cause damage.
- **Reverse Camera Cable:** The reverse input cable must be connected even if a reverse camera is not used, as it can affect Bluetooth and Wi-Fi signal reception.
- **Driving Safety:** Do not operate complex functions or watch videos while driving. Always prioritize road safety.

3. SETUP AND INSTALLATION

3.1 Package Contents

Verify that all components are present in the package:

- Roinvou Car Stereo for Honda Fit Jazz (LHD)
- Dual Power Cable (2 options provided)
- RCA Cable
- GPS Antenna
- AHD Backup Camera

- External Microphone
- Rear Camera Input Cable
- Dual USB Cable
- Installation Tool

Steering Wheel Control

Without CANBUS Decoder:

Please connect the plugs or the steering wheel control wires(Key1/Key2) in the power cable to the corresponding port or wire of your original car, and then go to "SteeringWheelKey" manual match to activate the button function.

Contain CANBUS Decoder:

Please connect the canbus before powering on the machine, and then follow this path (Apps - Settings - Factory Settings(1234) - CAN Settings) to make SWC work properly. First select the brand of the canbus decoder, then select the matching model and year according to the actual situation.

3.2 Pre-Installation Check

Before beginning installation, ensure your vehicle is a Honda Fit (Jazz) from 2008-2013 and is a Left-Hand Drive model. Compare the provided power cables with your vehicle's original wiring harness to select the correct one.

3.3 Installation Overview

The Roinvou car radio is designed as a direct fit replacement for the original Honda Fit stereo. The process generally involves removing the old unit, connecting the new wiring harness, and securing the new head unit.

FM RDS Radio

Bluetooth Call / Music

DSP Sound

3.4 Backup Camera Connection

Connect the backup camera according to the diagram below. Ensure the reverse input cable is connected to the main unit, even if the camera is not in use, to prevent interference with Bluetooth and Wi-Fi signals.

Package List

Image: Backup Camera Wiring Diagram - Illustrates how to correctly connect the AHD backup camera to the Roinvou car stereo system.

3.5 Steering Wheel Control (SWC)

The unit supports steering wheel controls for convenient operation.

- **Without CANBUS Decoder:** Connect the Key1/Key2 wires from the power cable to the corresponding port on your original car's wiring. Then, access the 'SteeringWheelKey' manual match function in the unit's settings to program the buttons.
- **With CANBUS Decoder:** Connect the CANBUS decoder before powering on the unit. Navigate to **Apps > Settings > Factory Settings (1234) > CAN Settings**. Select the brand of the CANBUS decoder and then the matching model and year of your vehicle to enable SWC functionality.

4.2 Wireless/Wired CarPlay & Android Auto

Connect your smartphone for seamless integration of navigation, music, calls, and voice control.

- **Wireless Connection:** Pair your phone via Bluetooth to enable wireless CarPlay or Android Auto.
- **Wired Connection:** Connect your phone using an original USB data cable to activate wired CarPlay or Android Auto.
- **Voice Control:** Utilize Siri (for CarPlay) or Google Assistant (for Android Auto) for hands-free operation, including making calls, playing music, and setting navigation destinations.

Image: Voice Assistant, CarPlay & Android Auto - Demonstrates voice command capabilities and smartphone integration options.

4.3 Bluetooth Connectivity

The built-in Bluetooth module allows for hands-free calling and audio streaming.

- **Hands-Free Calls:** Pair your phone to make and receive calls directly through the car stereo.
- **Phone Book Synchronization:** Access your phone's contacts on the stereo display.
- **Music Streaming:** Play audio from your paired device wirelessly.

Image: FM RDS Radio, Bluetooth Call/Music, DSP Sound - Highlights audio features including radio, hands-free calling, and sound customization.

4.4 Mirror Link

Synchronize your Android or iOS smartphone screen to the car stereo display.

- **Android & iOS Support:** Compatible with both Android and iOS devices.
- **Content Display:** View multimedia content, navigation, and applications from your phone on the larger car stereo screen.

GPS Navigation

Built-in GPS navigation, you can download offline navigation directly from the Play Store.

WiFi Connection

Supports connecting WiFi and most apps can be downloaded, such as Youtube/Facebook

Image: Mirror Link for Android/iOS - Visual representation of mirroring a smartphone screen to the car stereo.

4.5 GPS Navigation & Wi-Fi

The unit features built-in GPS and Wi-Fi connectivity for navigation and online services.

- **GPS Navigation:** Download offline navigation maps from the Play Store. Online maps are also supported when connected to Wi-Fi.
- **Wi-Fi Connection:** Connect to a Wi-Fi hotspot to access online music, video streaming (e.g., YouTube), and download various applications from the Play Store.

28 Desktop Themes

Equipped with 28 UI themes, multiple choices as you like, brings you a brilliant experience.

Image: GPS Navigation & WiFi Connection - Displays navigation features and the ability to connect to Wi-Fi for app downloads and online content.

4.6 DSP (Digital Sound Processor)

The integrated DSP allows for advanced audio customization, including various EQ settings and sound modes, to optimize your listening experience.

5. MAINTENANCE

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touch screen. Avoid abrasive cleaners or harsh chemicals.
- **Software Updates:** Periodically check for software updates through the unit's settings or the manufacturer's website to ensure optimal performance and access to new features.
- **Cable Connections:** Ensure all cables remain securely connected to prevent intermittent issues.

6. TROUBLESHOOTING

- **No Power:** Check all power cable connections. Ensure the correct power cable for your vehicle has been used. Verify vehicle's fuse box.
- **No Sound:** Check speaker connections. Ensure volume is not muted or set to minimum. Verify audio output settings.
- **Bluetooth/Wi-Fi Issues:** Ensure the reverse input cable is connected, even if no camera is used, as it impacts signal reception. Restart the unit and your connected device.
- **CarPlay/Android Auto Not Connecting:** Ensure your phone's Bluetooth is on for wireless connection. For wired connection, use an original USB data cable and ensure it is securely plugged into the correct USB port.
- **GPS Signal Weak/Lost:** Ensure the GPS antenna is properly installed and has a clear view of the sky.
- **Screen Unresponsive:** Try restarting the unit. If the issue persists, contact customer support.
