SYNCWIRE SW-RH810

SYNCWIRE Magnetic Phone Ring Holder for MagSafe - Instruction Manual

Model: SW-RH810

INTRODUCTION

The SYNCWIRE Magnetic Phone Ring Holder for MagSafe is a versatile accessory designed to enhance the usability of your smartphone. It provides a secure grip, functions as a kickstand, and offers strong magnetic attachment for various uses. This manual will guide you through its features, setup, and proper usage.

WHAT'S IN THE BOX

- Magnetic Phone Ring Holder for MagSafe x1
- Metal Ring x2 (Black & White)
- Positioner x1
- User Guide x1

SETUP AND INSTALLATION

The SYNCWIRE Magnetic Phone Ring Holder is designed for easy attachment and removal. Follow these steps for optimal use:

For MagSafe Compatible Phones/Cases:

1. Ensure your phone or phone case is MagSafe compatible.
2. Simply align the Magnetic Phone Ring Holder with the MagSafe area on your device. The strong N55 magnets will securely attach it.

For Non-MagSafe Phones/Cases:

1. Select one of the provided metal rings (Black or White) that best matches your phone or case.
2. Use the included positioner to accurately place the metal ring on the back of your phone or case. Ensure the surface is clean and dry before application.
3. Peel off the adhesive backing from the metal ring and firmly press it onto the designated area using the positioner. Apply pressure for 1 hour before use.
4. Once the metal ring is securely attached, you can then attach the Magnetic Phone Ring Holder to it.

Note : check if the METAL RING fits your phone case

FEATURES AND OPERATING INSTRUCTIONS

Strong Magnetic Force

The ring holder is crafted with N55 NdFeB magnets, providing exceptional magnetic pull. It can securely hold your phone with a force of 2.6-3 lbs, which is enhanced to 10 lbs when used with the provided metal rings. This ensures a firm hold that resists shaking or movement.

Strong Magnetic Force

The magnetic strength is up to 50N with metal ring adapter

360° Rotation and 90° Flip

The ring offers multi-angle adjustment with a 360° rotation and a 90° flip capability. This allows for a flexible and comfortable hand grip, as well as excellent viewing angles for media consumption. It has been tested to withstand over 6000 folds without loosening, ensuring durability.

Flexible 360° Rotation & 90° Flip

Image: A smartphone with the Syncwire ring holder demonstrating its flexible 360° rotation and 90° flip capabilities, along with a 'Decompression Clicking Sound' feature.

Two-Sided Magnetic Design

Featuring a unique two-sided magnetic design, this holder can attach to MagSafe car mounts without needing to remove the ring. It also securely attaches to any magnetic metal surface, such as fitness equipment or refrigerators, providing hands-free convenience.

Two-sided Magnet Structure

Perfectly Compatible with Your
Magsafe Car Phone Holder

Free your hands when
doing sports

Image: Two scenarios illustrating the two-sided magnetic structure: one showing a phone attached to a MagSafe car mount, and another showing a phone attached to gym equipment, allowing for hands-free use.

Unique Decompression Design Ring

The patented structure combines gears with spring plates for enhanced stability. Rotating the ring produces a satisfying clicking sound, offering an effective method for stress relief.

User-Friendly Design

The ring incorporates a flat bottom design, providing enhanced stability and preventing wobbling when your phone is placed horizontally or vertically. An inner groove shape allows for effortless pulling of the ring.

Multi-angle Adjustable

Image: A smartphone is shown with the ring holder extended, functioning as a stable kickstand for both horizontal and vertical viewing on a desk.

Wireless Charging Compatibility

The MagSafe phone ring grip can be effortlessly removed for wireless charging without leaving any sticky residue, unlike traditional phone grips.

Simply Remove the Ring for Wireless Charging

Different from other rings cannot be removed , when need wireless charging , you can just swapping it and charge
