GE UltraPro Adapt 10-Outlet Surge Protector

MODEL 73775

Product Overview

The GE UltraPro Adapt 10-Outlet Surge Protector provides reliable power distribution and surge protection for your electronic devices. It features 10 adapter-spaced, three-prong AC outlets and two USB-A charging ports, designed to create a centralized powering station. Its unique angular design accommodates bulky plugs, and the 4ft braided cord with a flat plug allows for flexible placement in various environments.

Figure 1: Overall view of the GE UltraPro Adapt 10-Outlet Surge Protector.

- **10 Grounded AC Outlets:** Provides ample power connections for multiple devices.
- **2 USB-A Charging Ports:** Delivers 2.4A/12W for convenient charging of mobile devices.
- **3,540 Joules Surge Protection:** Safeguards connected electronics from power surges.
- **Integrated Circuit Breaker:** Protects against voltage overloads.
- **Protected Indicator Light:** Visually confirms active surge protection.
- **Grounded Indicator Light:** Confirms proper grounding of the unit.
- **4ft Braided Cord:** Durable and flexible cord for extended reach.
- **Space-Saving Flat Plug:** Allows placement behind furniture without blocking other outlets.
- **Unique Angular Design:** Accommodates bulky power adapters without obstructing adjacent outlets.
- **Rotating Safety Covers:** Protects unused AC outlets from dust and accidental contact.

Setup Instructions

1. **Unpack the Surge Protector:** Carefully remove the surge protector from its packaging.
2. **Position the Unit:** Place the surge protector in a desired location, ensuring the 4ft braided cord can reach a wall outlet. The flat plug design allows for placement behind furniture.

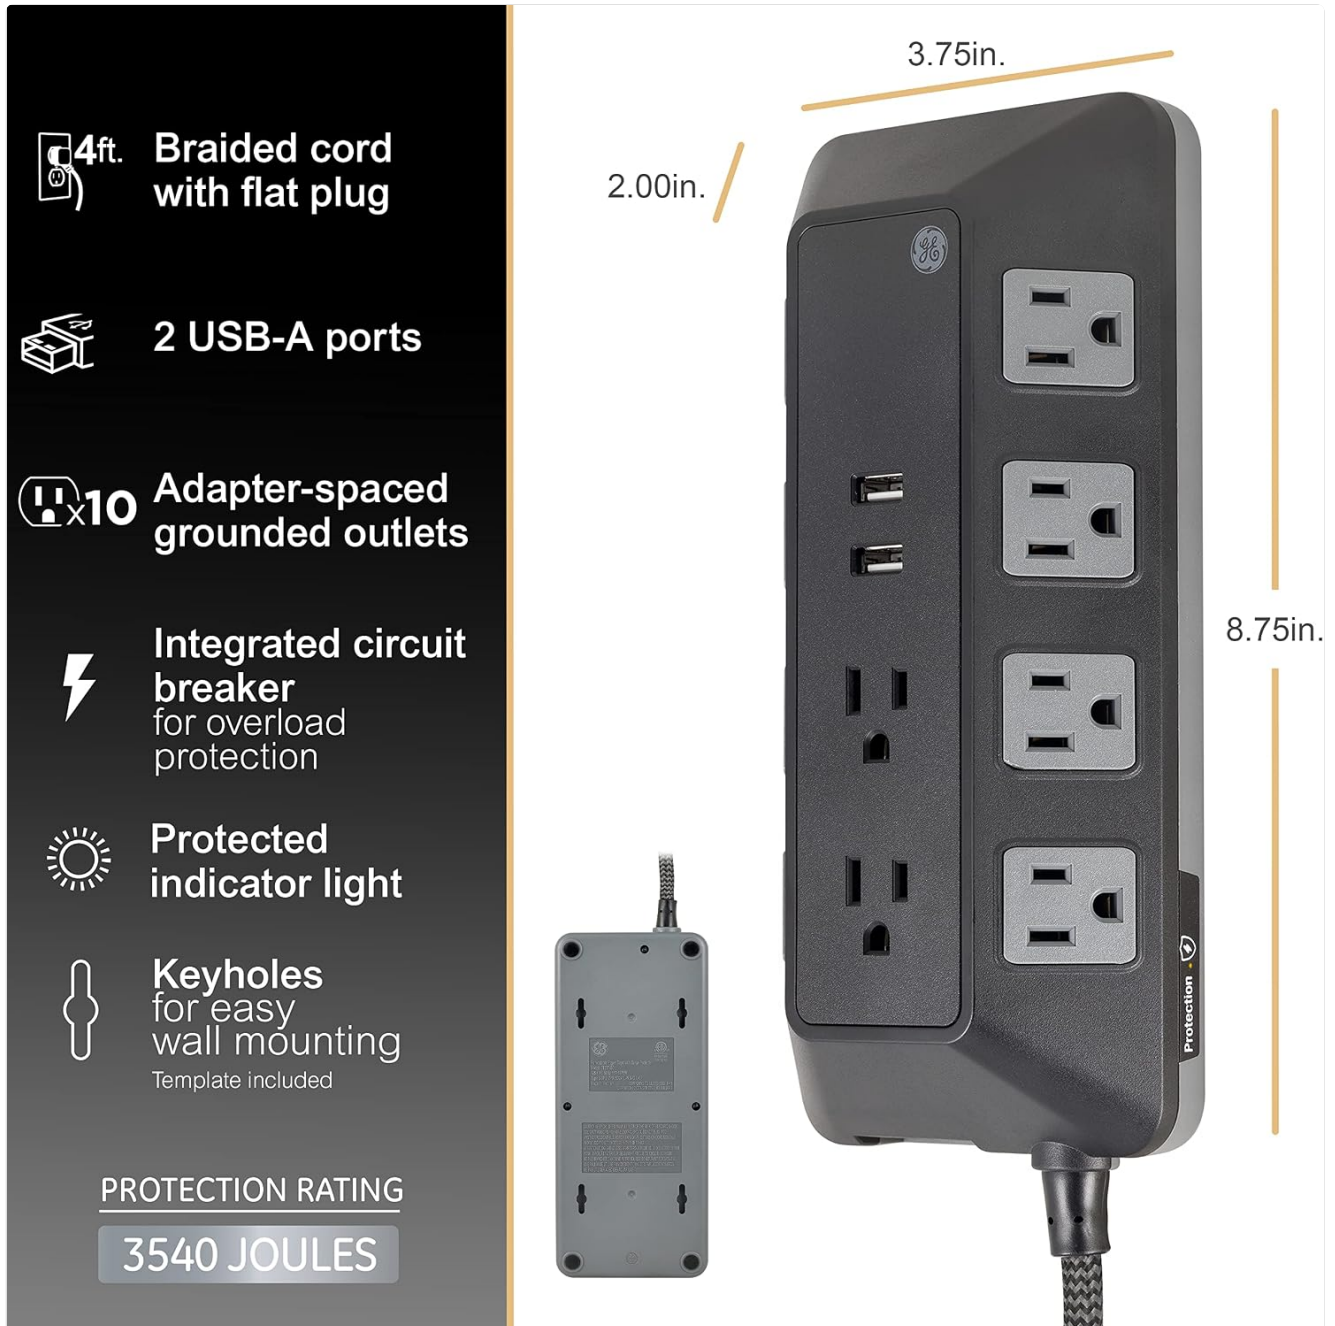

Figure 2: The flat plug design saves space and allows for discreet placement.

3. **Plug into Wall Outlet:** Ensure the surge protector's power switch is in the 'OFF' position. Plug the surge protector's flat plug into a standard, grounded 3-prong wall outlet.
4. **Verify Indicator Lights:** Once plugged in, turn the power switch to 'ON'. The 'Protected' (blue) and 'Grounded' (green) indicator lights should illuminate. If the 'Protected' light is off, the surge protection is no longer active, and the unit should be replaced. If the 'Grounded' light is off, the wall outlet may not be properly grounded.

Unique Design

The convenient angular design supports various bulky plugs at the same time.

Figure 3: Illuminated 'Protected' and 'Grounded' lights indicate proper function.

5. **Connect Devices:** Plug your electronic devices into the AC outlets and USB ports. The angular design allows for easy connection of multiple bulky adapters.

Figure 4: The angular design provides convenient access for various plugs.

6. **Wall Mounting (Optional):** The surge protector includes keyholes on the back for wall mounting. A template is provided to assist with installation. Ensure mounting screws are securely fastened into a stud or appropriate anchor.

Fabric Braided Cord

Resist damage and tangling
while complementing your style.

Figure 5: Keyholes on the back allow for wall mounting.

Operating Instructions

Using AC Outlets

The surge protector features 10 grounded AC outlets. To use an outlet, rotate the safety cover until the prongs are visible, then firmly insert your device's plug. When an outlet is not in use, rotate the safety cover back to the closed position to prevent dust accumulation and accidental contact.

Using USB Charging Ports

Two USB-A ports are available for charging mobile devices. Simply connect your device's USB charging cable to one of the ports. The ports provide 2.4A/12W of power, suitable for smartphones, tablets, and other USB-powered accessories.

Maintenance

The GE UltraPro Adapt Surge Protector requires minimal maintenance. Regularly inspect the unit and its cord for any signs of damage. Keep the surge protector clean by wiping it with a dry, soft cloth. Do not use liquid cleaners or immerse the unit in water. Periodically check the 'Protected' and 'Grounded' indicator lights to ensure the unit is functioning correctly.

Troubleshooting

'Protected' Indicator Light is Off

If the blue 'Protected' indicator light is off, it means the surge protection components have been consumed, and the unit can no longer protect your devices from surges. The surge protector will continue to function as a power strip, but without surge protection. It is recommended to replace the unit to maintain full protection for your electronics.

'Grounded' Indicator Light is Off

If the green 'Grounded' indicator light is off, it indicates that the wall outlet is not properly grounded. Consult a qualified electrician to inspect and correct the wiring of your wall outlet. The surge protector will not provide optimal protection if not properly grounded.

Devices Not Receiving Power

- Ensure the surge protector's power switch is in the 'ON' position.
- Verify that the surge protector is securely plugged into a functioning wall outlet.
- Check if the circuit breaker on the surge protector has tripped. If so, reset it by pressing the button.
- Confirm that the device itself is properly connected and powered on.

Specifications

Feature	Specification
Brand	GE
Model Number	73775-RF1
Total Power Outlets	10
Total USB Ports	2 (USB-A)
USB Output	2.4 Amps / 12 Watts
Surge Protection Rating	3540 Joules
Voltage	240 Volts
Amperage	12 Amps
Cord Length	4 ft (Braided)
Plug Type	Type B - 3 pin (North American)
Color	Black
Material	Plastic, Rubber
Special Features	Mountable, On And Off Switch, Surge Protection, USB Slot

Warranty and Support

This GE UltraPro Adapt Surge Protector is backed by a **Limited-Lifetime Replacement Plan**. Additionally, it includes a

\$350,000 Connected Equipment Policy, providing peace of mind for your connected devices.
