Outvita 8/10 Person Camping Tent Instruction Manual

Model: B0C6XYPKMY

PRODUCT OVERVIEW

The Outvita 8/10 Person Camping Tent is designed for family and group camping, offering a spacious and comfortable outdoor shelter. This tent features a large interior with a high center height, allowing most individuals to stand upright. It includes a removable divider curtain to create two private rooms, each with its own access door. Constructed with durable, weatherproof materials, it provides protection against various outdoor elements while ensuring good ventilation.

PACKAGE CONTENTS

Verify that all components are present in your package:

- Camping Tent
- Easy Setup Poles (Fiberglass)
- Carry Bag
- 8 x Wind Ropes
- 12 x Metal Stakes

SETUP INSTRUCTIONS

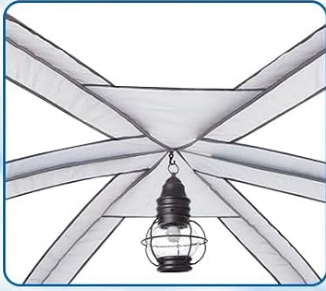

This tent is designed for a straightforward setup. Follow these steps for proper assembly.

Step-by-Step Assembly

1. **Unpack and Lay Out:** Remove the tent and all components from the carry bag. Lay the tent body flat on your chosen campsite, ensuring the floor is spread evenly.
2. **Assemble Poles:** Connect the fiberglass pole sections. The tent typically uses two main poles.
3. **Insert Poles:** Slide the assembled poles through the sleeves on the tent body. Ensure the poles are fully inserted and seated correctly at each corner.
4. **Raise the Tent:** Lift the tent structure by bending the poles, forming the cabin shape. Secure the pole ends into the pins at the tent base.
5. **Attach Tent to Poles:** Use the clips or hooks on the tent body to attach it to the pole structure. This provides tension and stability.
6. **Position Rainfly:** Drape the rainfly over the tent body, aligning it with the doors and windows. Secure the rainfly to the tent poles or base using the attached buckles or straps.
7. **Stake Down the Tent:** Use the provided metal stakes to secure the tent corners and guylines (wind ropes) to the ground. This is crucial for stability, especially in windy conditions.
8. **Adjust Guylines:** Adjust the tension of the wind ropes to ensure the tent is taut and stable.

OPERATING THE TENT

Ventilation

The tent features 6 mesh windows and an open mesh roof area to promote airflow and reduce condensation. Keep windows open when weather permits to ensure optimal ventilation. The mesh also helps keep insects out.

VENTILATION & BREATHABLE

Image: Illustration showing airflow through the tent's mesh windows and roof for enhanced ventilation.

Privacy Features

A removable divider curtain can be hung from the ceiling to create two separate rooms, each with its own zippered door for independent access. This allows for increased privacy when sharing the tent.

Weather Protection

The tent body is constructed from 210D oxford floor and 190T polyester with a PU3000mm waterproof rating, providing excellent resistance against rain, UV rays, and wind. Ensure the rainfly is properly installed and all zippers are closed during inclement weather to maintain a dry interior.

WATERPROOF FABRIC & SEALED SEAMS

Image: Illustration highlighting the waterproof properties of the tent fabric, showing water beading on the surface.

MAINTENANCE AND CARE

Cleaning

To clean the tent, use a soft cloth with mild soap and lukewarm water. **Hand wash only.** Do not use harsh detergents, bleach, or machine wash, as this can damage the waterproof coating and fabric integrity. Rinse thoroughly and allow the tent to air dry completely before packing.

Storage

Ensure the tent is completely dry before folding and storing it in the carry bag. Storing a damp tent can lead to mildew and fabric degradation. Store in a cool, dry place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

- **Tent not standing upright:** Ensure all poles are fully assembled and correctly inserted into their designated sleeves and pins. Check that the tent body is clipped securely to the poles and guylines are properly staked and tensioned.
- **Water leakage:** Verify that the rainfly is correctly positioned and fully covers the tent. Ensure all zippers are completely closed. The tent's PU3000mm waterproof rating and sealed seams are designed to prevent leaks under normal rain conditions. If leakage persists, inspect for any fabric damage or seam issues.
- **Poor ventilation/condensation:** Open mesh windows and the roof vent to maximize airflow. Condensation is natural in certain conditions; proper ventilation helps minimize it.
- **Difficulty packing:** Ensure all air is expelled from the tent before folding. Fold the tent neatly to match the dimensions of the carry bag.

SPECIFICATIONS

Brand	Outvita
Model	B0C6XYPKMY
Product Dimensions	160"L x 120"W x 79"H (13'x10'x6.5')
Item Weight	32 Pounds
Occupancy	8-10 Person (as per product title)
Number of Rooms	2 (with divider)
Material Type	190T Polyester, 210D Oxford Floor
Water Resistance Level	PU3000mm (Water Resistant)
UV Protection	Yes
Number of Windows	6
Assembly Time	Approximately 10 Minutes
