ASSEMBLY INSTRUCTIONS

Assembly typically takes approximately one hour for one person. Having an additional person may simplify the process. Most bolts are pre-installed; simply loosen, align, and tighten.

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out and identify each part using the included hardware list. Some parts may not be explicitly labeled but can be identified by their appearance in the diagrams.
2. **Assemble the Headboard:** Attach the wingback sides to the main headboard panel. Ensure the integrated shelf is correctly oriented.
3. **Connect Side Rails:** Attach the side rails to the assembled headboard. Ensure a secure connection.
4. **Install Center Support:** Assemble and install the central cross support structure. This provides crucial stability for the bed frame.
5. **Attach Bed Legs:** Securely attach the bold bed legs to the frame. Ensure they are tightened to prevent wobbling.
6. **Place Wood Slats:** Lay the solid wood slats across the frame. The slats are equipped with Velcro and EVA mute bars to prevent friction and noise. Press them firmly onto the Velcro strips on the frame.
