5. SETUP AND INSTALLATION

Follow these steps to install your components into the DARKROCK MH200 case. For detailed visual instructions, please refer to the official [Installation Manual \(PDF\)](#).

1. **Prepare the Case:** Carefully remove the side panels and front panel by gently pulling them away from the chassis. The mesh panels are designed for easy removal.
2. **Install Motherboard:** Secure your Micro ATX or Mini ITX motherboard onto the pre-installed standoffs using the appropriate screws from the accessory box.
3. **Install Power Supply (PSU):** Mount your power supply unit in the bottom rear compartment of the case. Ensure proper orientation for cable management.

4. **Install Storage Drives:** Install 2.5" SSDs behind the motherboard tray and 3.5" HDDs in the removable drive cage located at the bottom front.
5. **Install Graphics Card (GPU):** Insert your graphics card into the appropriate PCIe slot on your motherboard. Ensure it is securely fastened. The case supports GPUs up to 330mm in length.
6. **Install CPU Cooler:** Mount your CPU cooler. The case supports coolers up to 165mm in height.
7. **Install Additional Fans/Radiators:** Install any additional cooling fans or liquid radiators as desired. Refer to the specifications section for supported sizes and locations.
8. **Cable Management:** Route all necessary cables through the cutouts and tie-down points behind the motherboard tray for a clean build and improved airflow.
9. **Reattach Panels:** Once all components are installed and cables are managed, carefully reattach the front and side mesh panels.

6. OPERATION

The DARKROCK MH200 case features a convenient top I/O panel for easy access to essential ports and controls.

- **Power Button:** Press to turn your computer on or off.
- **Reset Button:** Press to restart your computer.
- **USB 3.0 Ports:** Connect high-speed USB devices such as external hard drives, flash drives, or peripherals.
- **Type-C Port:** Connect modern USB Type-C devices for fast data transfer.
- **Audio Jacks:** Connect headphones, microphones, or speakers.
- **LED Button:** Control the lighting effects of the pre-installed ARGB fan and any other compatible ARGB components connected to the case's controller (if applicable).

7. MAINTENANCE

Regular maintenance helps ensure optimal performance and extends the lifespan of your PC components.

- **Dust Filter Cleaning:** The top and bottom panels are equipped with magnetic dust filters. Gently remove them and clean with water or a soft brush. Ensure they are completely dry before reattaching.
- **Case Cleaning:** Use a soft, damp cloth to wipe down the exterior of the case. Avoid abrasive cleaners or solvents.
- **Internal Dust Removal:** Periodically use compressed air to clear dust from internal components and fans. Ensure the system is powered off and unplugged before performing internal cleaning.

8. TROUBLESHOOTING

If you encounter issues with your DARKROCK MH200 case, refer to the common problems and solutions below:

- **No Power:**

Solution: Ensure the power supply is properly connected to the wall outlet and the motherboard. Check all front panel header connections (Power SW, Reset SW) to the motherboard.

- **Fans Not Spinning / ARGB Not Lighting Up:**

Solution: Verify that the fan power cables are securely connected to the motherboard or fan controller. Check ARGB connections to the motherboard's ARGB header or dedicated controller. Ensure the LED button on the I/O panel is functioning.

- **USB Ports Not Working:**

Solution: Confirm that the USB 3.0 and Type-C headers from the case are correctly plugged into the corresponding ports on your motherboard.

- **Audio Jacks Not Working:**

Solution: Ensure the HD Audio cable from the case is properly connected to the audio header on your motherboard.

- **Excessive Dust Buildup:**

Solution: Regularly clean the magnetic dust filters on the top and bottom panels. Consider increasing fan airflow or adjusting fan curves if temperatures are high due to dust.
