Generic Mobile Broom and Mop Holder Cart (Model 2USAG1012L) Instruction Manual

Your guide to assembly, operation, and maintenance.

1. INTRODUCTION

Thank you for choosing the Generic Mobile Broom and Mop Holder Cart. This organizer is designed to provide a convenient and efficient solution for storing your cleaning tools. Its mobile design, durable construction, and integrated water collection feature aim to enhance your cleaning routine and maintain an organized space.

This manual provides detailed instructions for the proper assembly, operation, and maintenance of your new cleaning cart. Please read it thoroughly before use and retain it for future reference.

2. SAFETY INFORMATION

To ensure safe operation and prevent damage to the product or injury, please observe the following safety guidelines:

- Do not exceed the maximum weight capacity of 154.3 lbs for the overall rack and 16.5 lbs per hook.
- Ensure all components are securely fastened before placing tools on the cart or moving it.
- Always engage the wheel locks when the cart is stationary to prevent unintended movement.
- Keep hands and fingers clear of moving parts, especially during assembly and when adjusting tools.
- Do not allow children to play with or climb on the cart.
- Use the cart on level surfaces to prevent tipping.
- Regularly inspect the cart for any signs of wear or damage. Discontinue use if damage is found and contact support.

3. PACKAGE CONTENTS

Please verify that all components are present before beginning assembly:

- Aluminum Frame Components (various poles and connectors)
- Base Tray with Water Collection Feature
- Mop and Broom Gripper Holders
- 4 x 1.5-inch Swivel Casters (wheels)
- Assembly Hardware (screws, bolts, etc. - typically pre-installed or integrated)

Figure 1: Exploded view of cart components and dimensions.

4. ASSEMBLY INSTRUCTIONS

Follow these steps to assemble your mobile broom and mop holder cart. No special tools are typically required, but a rubber mallet or a small amount of lubricant (like WD-40) may assist with caster installation if they are tight.

- 1. Attach Casters:** Carefully insert the four swivel casters into the designated holes on the underside of the base tray. Apply firm pressure. If resistance is met, a small amount of lubricant on the caster stem can aid insertion. Ensure all casters are fully seated and secure.
- 2. Assemble Vertical Frame:** Connect the vertical aluminum poles to the corners of the base tray. Ensure they click into place or are secured with provided fasteners.
- 3. Install Horizontal Support Bar:** Attach the middle horizontal support bar between the vertical poles at the appropriate height.
- 4. Attach Top Frame and Gripper Holders:** Secure the top horizontal frame piece to the vertical poles. Then, slide or attach the mop and broom gripper holders onto the top horizontal bar. Ensure they are evenly spaced and firmly

attached.

5. **Final Check:** Verify that all connections are secure and the cart is stable before loading any tools.

Figure 2: Fully assembled cart with cleaning tools.

5. OPERATING INSTRUCTIONS

This section details how to effectively use your mobile cleaning tool organizer.

- **Storing Tools:** The gripper holders are designed for long-handled tools such as brooms, mops, and dusters. Simply push the handle into the gripper mechanism until it is securely held. Smaller tools like brushes or rags can be hung from the integrated hooks or placed on the base tray.
- **Mobility:** To move the cart, disengage the wheel locks on the casters. The smooth-rolling wheels allow you to effortlessly transport your cleaning supplies to any area of your home or workplace. Re-engage the wheel locks once the cart is in its desired stationary position.
- **Water Collection Tray:** The base tray is designed to collect dripping water from wet mops or cloths, preventing

splashes and keeping your floors dry. Ensure the tray is emptied regularly to prevent overflow.

**Improves Cleaning Efficiency And
Reduces Labour Intensity**

6. MAINTENANCE

Proper maintenance will extend the life of your cleaning cart:

- **Cleaning the Frame and Base:** Wipe down the aluminum frame and plastic base with a damp cloth and mild detergent as needed. Avoid abrasive cleaners that could damage the finish.
- **Emptying Water Tray:** Regularly empty the water collection tray to prevent stagnant water and potential odors. The base may feature a water outlet for easy drainage.
- **Caster Care:** Keep the casters free of debris (hair, lint, etc.) to ensure smooth rolling. If casters become stiff, a small amount of silicone spray lubricant can be applied to the axle.
- **Gripper Holders:** Periodically check the gripper mechanisms for proper function. Clean any residue that might affect their grip.

7. TROUBLESHOOTING

If you encounter any issues with your cleaning cart, refer to the following common problems and solutions:

- **Cart not rolling smoothly:**
 - Ensure wheel locks are disengaged.
 - Check casters for trapped debris (e.g., hair, lint) and remove if present.
 - Lubricate caster axles if they feel stiff.
- **Tools not staying in holders:**
 - Ensure the tool handle is fully inserted into the gripper mechanism.
 - Verify the tool handle diameter is within the specified range (0.63-1.41 inches).
 - Clean any residue from the gripper mechanism that might reduce friction.
- **Water overflowing from the base tray:**
 - Empty the water collection tray more frequently.
 - Ensure the water outlet (if present) is not blocked.
- **Cart feels unstable:**
 - Re-check all assembly connections to ensure they are tight and secure.
 - Ensure the weight distribution of tools is balanced.
 - Do not exceed the maximum weight capacity.

8. SPECIFICATIONS

Product Dimensions (D x W x H)	15.68" x 23.6" x 44.1"
Material	Aluminum (Frame), Plastic (Base)
Item Weight	11 pounds
Overall Load Capacity	154.3 lbs
Hook Load Capacity	16.5 lbs
Number of Wheels	4
Caster Type	Swivel, 1.5 inch
Hanging Diameter Range	0.63 - 1.41 inches
Model Number	2USAG1012L
UPC	791783451287
