AVI-8 AV-4094-01

AVI-8 Mens 43mm Hawker Hurricane Kent Automatic Pilot Watch User Manual

Brand: AVI-8 | Model: AV-4094-01

INTRODUCTION

This manual provides essential information for the operation and care of your AVI-8 Hawker Hurricane Kent Automatic Pilot Watch. Please read it thoroughly to ensure proper use and longevity of your timepiece.

The AVI-8 Hawker Hurricane Kent Automatic Pilot Watch is an automatic timepiece, designed with details drawn from the iconic Hawker Hurricane and 303 Squadron, honoring their achievements during the Battle of Britain. It features a Japanese automatic 3-hand movement with date function, a durable stainless steel case, a sapphire lens with anti-reflective coating, and a comfortable genuine leather strap.

PRODUCT OVERVIEW

Front view of the AVI-8 Hawker Hurricane Kent Automatic Pilot Watch, showcasing the white dial, black numerals, and brown

leather strap.

Rear view of the watch, showing the engraved case back and the attachment of the leather strap.

SETUP

Initial Winding and Time Setting

Your AVI-8 automatic watch is powered by the motion of your wrist. If the watch has stopped or is running low on power, it may require initial manual winding.

- 1. Manual Winding:** To initiate power, turn the crown (located on the side of the watch) clockwise approximately 20-30 times. This will provide enough power for the watch to start running.
- 2. Setting the Time:**
 - Pull the crown out to the second click position.
 - Turn the crown to set the hour and minute hands to the desired time.
 - Push the crown back to the normal position.
- 3. Setting the Date:**

- Pull the crown out to the first click position.
- Turn the crown clockwise or counter-clockwise (depending on the movement) to set the date. Avoid setting the date between 9 PM and 3 AM, as this can damage the movement.
- Push the crown back to the normal position.

For optimal performance, wear your watch regularly. Daily wear will keep the mainspring wound and the watch running accurately.

OPERATING INSTRUCTIONS

Automatic Movement

The AVI-8 Hawker Hurricane Kent Automatic Pilot Watch features a Japanese automatic 3-hand movement. This movement is self-winding, meaning it gains power from the natural motion of your arm as you wear the watch. No battery replacement is required.

Water Resistance

This watch has a water resistance rating of 50 meters (5 ATM). This means it is suitable for short periods of recreational swimming, but not for diving or prolonged submersion. Avoid operating the crown or pushers when the watch is wet to prevent water ingress.

- **50m (5 ATM):** Suitable for everyday use and short periods of recreational swimming. Not suitable for showering, bathing, diving, or snorkeling.
- Always ensure the crown is fully pushed in before exposing the watch to water.

MAINTENANCE AND CARE

Proper care will ensure the longevity and performance of your AVI-8 timepiece.

- **Cleaning:** Wipe the watch case and sapphire lens with a soft, dry cloth. For the leather strap, avoid excessive moisture and harsh chemicals.
- **Temperature Extremes:** Avoid exposing your watch to extreme temperatures (above 60°C / 140°F or below 0°C / 32°F) or sudden temperature changes.
- **Magnetic Fields:** Keep the watch away from strong magnetic fields (e.g., speakers, refrigerators, mobile phones) as these can affect the accuracy of the automatic movement.
- **Leather Strap Care:** Genuine leather straps can be affected by sweat, water, and direct sunlight. Clean with a damp cloth and allow to air dry. Avoid prolonged exposure to water.
- **Servicing:** It is recommended to have your automatic watch serviced by a qualified watchmaker every 3-5 years to ensure optimal performance and water resistance.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch has stopped or is running slow.	Insufficient power reserve.	Manually wind the watch by turning the crown clockwise 20-30 times. Wear the watch regularly to keep it wound.
Date changes at noon instead of midnight.	AM/PM setting is incorrect.	Advance the time by 12 hours.

Problem	Possible Cause	Solution
Watch is running too fast or too slow.	Exposed to strong magnetic fields or requires regulation.	Keep away from magnetic sources. If problem persists, consult a qualified watchmaker for regulation.
Condensation under the crystal.	Water ingress or sudden temperature change.	Immediately take the watch to a qualified watchmaker for inspection and repair to prevent damage to the movement.

SPECIFICATIONS

Feature	Detail
Model Number	AV-4094-01
Movement	Japanese Automatic 3 Hands with Date
Case Material	Stainless Steel
Case Diameter	43mm
Lens	Sapphire with Anti-Reflective Coating
Strap Material	Genuine Leather (22mm)

Product Dimensions	1.69 x 0.83 x 0.43 inches; 4.23 ounces

WARRANTY INFORMATION

Your AVI-8 watch is covered by a **Two (2) Year International Warranty** from the date of purchase. This warranty covers manufacturing defects under normal use.

The warranty does not cover:

- Damage resulting from improper handling, lack of care, accidents, or normal wear and tear.
- Water damage if the watch was not used according to its water resistance rating or if the crown was not properly secured.
- Damage to the strap, crystal, or case due to misuse.
- Unauthorized repairs or modifications.

For warranty claims, please retain your proof of purchase and contact AVI-8 customer support or an authorized service center.
