BENKS MP07

BENKS Magnetic Power Bank User Manual

Model: MP07

INTRODUCTION

Thank you for choosing the BENKS Magnetic Power Bank. This 10000mAh wireless portable charger is designed for seamless compatibility with MagSafe-enabled devices, offering both wireless and wired charging options. It features a powerful magnetic connection and two-way 20W USB-C ports, making it an ideal companion for your iPhone 15/14/13/12 Series and other compatible devices. This manual provides essential information on how to set up, operate, maintain, and troubleshoot your power bank to ensure optimal performance and longevity.

PACKAGE CONTENTS

- 1x BENKS 10000mAh Magnetic Power Bank
- 1x 11.8-inch USB-C to USB-C Cable

SETUP

Charging the Power Bank

Before first use, fully charge your BENKS Magnetic Power Bank. Connect the included USB-C to USB-C cable to the power bank's USB-C port and the other end to a compatible USB-C power adapter (not included). The LED indicator lights on the power bank will show the charging status. All four lights will illuminate steadily when fully charged.

Pass-through Charging

Initial Connection

For magnetic wireless charging, ensure your device is compatible with MagSafe (iPhone 12 series and above). Simply align the power bank with the back of your iPhone; the magnets will snap it into place. For wired charging, use the appropriate cable to connect your device to the power bank's USB-C port.

OPERATING INSTRUCTIONS

Wireless Charging (MagSafe)

For optimal wireless charging, ensure your iPhone (12 series or newer) is placed directly onto the magnetic surface of the power bank. The power bank supports up to 15W wireless charging. Note that it will not magnetically attach or work with normal non-

MagSafe cases.

Wired Charging

Utilize the USB-C port for wired charging. This port supports PD 20W fast charging and is compatible with a wide range of devices, including iPhones, Android phones, tablets, and headphones. Simply connect your device using a compatible USB-C cable.

Compatible with Multiple Devices

Charging for Android/Airpods/iPhone 12 Series and above,
3 devices can be charged at once

To ensure the longevity and optimal performance of your BENKS Magnetic Power Bank, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the surface of the power bank. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the power bank in a cool, dry place away from direct sunlight, extreme temperatures, and humidity.
- **Battery Care:** For best battery health, avoid fully discharging the power bank regularly. Recharge it when the battery level is low. If storing for extended periods, charge it to about 50-70% every three months.
- **Avoid Physical Damage:** Protect the power bank from drops, impacts, and excessive pressure.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Power bank not charging wirelessly.	Device not MagSafe compatible; non-MagSafe case; improper alignment.	Ensure device is MagSafe compatible (iPhone 12 series or newer). Use a MagSafe-compatible case or no case. Realign the power bank for proper magnetic connection.
Slow charging speed.	Using a non-fast charging adapter/cable; device not supporting fast charging.	Use a PD 20W compatible wall adapter and the included USB-C cable for optimal wired charging. Ensure your device supports the advertised charging speeds.
Power bank or phone gets warm during charging.	Normal operation; poor ventilation; intensive phone use during charging.	Some warmth is normal. Ensure adequate ventilation around the power bank and phone. Avoid using the phone for demanding tasks while charging. The power bank features intelligent temperature control to prevent overheating.
Power bank does not hold charge or dies quickly.	Battery degradation over time; not fully charged.	Ensure the power bank is fully charged before use. If the issue persists after extended use, the battery may be degrading. Contact customer support if within warranty.
