4. SETUP

Follow these steps to set up your UpBright AC/DC Adapter:

1. **Verify Compatibility:** Ensure your device (e.g., Snailax SL-591, SL-591B, SL-591G Foot Massager) requires a 24V DC power input. Check your device's specifications or original adapter.
2. **Connect to Device:** Locate the power input port on your Snailax foot massager. Insert the barrel connector of the UpBright adapter's DC output cable firmly into this port.
3. **Connect to Power Outlet:** Plug the AC prongs of the UpBright adapter into a standard 100-240VAC 50/60Hz wall power outlet.
4. **Power On Device:** Once connected, your device should be ready to receive power. Refer to your device's instruction manual for specific power-on procedures.

5. OPERATING INSTRUCTIONS

The UpBright 24V AC/DC Adapter operates automatically once connected to a power source and a compatible device. It provides a stable 24V DC output to power your Snailax foot massager.

- No user interaction is required for the adapter itself once plugged in.
- The adapter is designed for continuous operation within its specified voltage and current limits.
- Always ensure the adapter is not covered or placed in an enclosed space during operation to allow for proper heat dissipation.

6. MAINTENANCE

Proper care and maintenance will extend the life of your adapter:

- **Cleaning:** Disconnect the adapter from the power outlet and the device before cleaning. Use a soft, dry cloth to wipe the surface. Do not use liquid cleaners or aerosols.
- **Storage:** When not in use, store the adapter in a cool, dry place, away from direct sunlight and extreme temperatures. Avoid tightly coiling the cable to prevent damage.
- **Inspection:** Periodically inspect the adapter and its cable for any signs of damage, such as cuts, fraying, or bent prongs. If damage is found, discontinue use and replace the adapter.

7. TROUBLESHOOTING

If you encounter issues with your UpBright AC/DC Adapter, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device not powering on.	Adapter not properly plugged in. Power outlet is not active. Device power switch is off. Adapter or device is faulty.	Ensure adapter is fully inserted into both the wall outlet and the device. Test the outlet with another appliance. Check the power switch on your Snailax massager. If issues persist, contact support or consider replacement.
Adapter feels excessively hot.	Poor ventilation. Overload (using with incompatible device). Internal fault.	Ensure adapter is in an open area with good airflow. Verify the device's power requirements match the adapter's output. Immediately unplug and discontinue use if overheating persists.
Loose connection.	Worn connector or port.	Ensure the barrel connector is fully inserted. If it remains loose, the connector or device port may be damaged.

If troubleshooting steps do not resolve the issue, please refer to the Warranty and Support section.
