## 5. SETUP AND INSTALLATION

Installation is designed to be straightforward. Ensure you have an electrical outlet near your toilet. If not, professional installation of an outlet may be required.

- 1. Prepare the Toilet:** Turn off the water supply to your toilet. Flush the toilet to drain the tank.
- 2. Remove Existing Seat:** Detach your current toilet seat.
- 3. Install Mounting Plate:** Place the mounting plate on the toilet bowl, aligning it with the bolt holes. Secure it using the provided bolts and nuts. Ensure the rubber nuts are slightly wet before insertion for easier installation and a tight fit.
- 4. Connect T-Valve:** Disconnect the existing water supply hose from the toilet tank. Install the provided T-valve between the toilet tank and the water supply hose.
- 5. Connect Bidet Water Hose:** Attach one end of the provided PE pipe (water supply hose for the bidet) to the T-valve. Connect the other end to the water inlet on the side of the bidet toilet seat.

6. **Slide Bidet Seat into Place:** Carefully slide the bidet toilet seat onto the installed mounting plate until it clicks securely into position.
7. **Restore Water and Power:** Turn the water supply back on and check for leaks. Plug the bidet seat into a grounded electrical outlet.

## 7. MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and hygienic operation of your bidet seat.

- **Nozzle Cleaning:** The stainless steel nozzle has a self-cleaning feature. Activate it regularly via the remote control. For manual cleaning, gently wipe the nozzle with a soft cloth and mild, non-abrasive cleaner.
- **Exterior Cleaning:** Wipe the exterior surfaces of the bidet seat with a soft, damp cloth and a mild detergent. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Filter Cleaning:** Periodically check and clean the water inlet filter to prevent blockages and maintain optimal water pressure. Refer to the detailed manual for specific instructions on accessing and cleaning the filter.
- **Winterization (if applicable):** If the bidet seat will be exposed to freezing temperatures, ensure all water is drained from the unit to prevent damage.

## 8. TROUBLESHOOTING

If you encounter any issues, refer to the following common troubleshooting tips:

Problem	Possible Cause	Solution
No power/Unit not turning on	Not plugged in; power outage; circuit breaker tripped.	Ensure unit is securely plugged in. Check power supply and circuit breaker.
No water spray/Low pressure	Water supply valve closed; clogged filter; low household water pressure.	Open water supply valve. Clean the water inlet filter. Check household water pressure.

Problem	Possible Cause	Solution
Water temperature inconsistent	Water heater setting too low/high; external water temperature fluctuations.	Adjust water temperature setting on remote. Allow time for water to heat up.
Heated seat not working	Seat temperature setting too low; power-saving mode active.	Adjust seat temperature setting. Deactivate power-saving mode if desired.
