MAINTENANCE

To ensure the longevity and appearance of your Iwell Storage Cabinet, follow these maintenance guidelines:

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or polishes that may damage the finish.
- **Spills:** Promptly clean any spills to prevent staining or moisture damage to the wood material.
- **Fasteners:** Periodically check all screws, bolts, and cam locks to ensure they remain tight. Re-tighten if necessary to maintain stability.
- **Placement:** Avoid placing the cabinet in direct sunlight or near heat sources, as this can cause fading or warping.

TROUBLESHOOTING

If you encounter any issues with your Iwell Storage Cabinet, refer to the following common troubleshooting tips:

- **Cabinet Wobbles After Assembly:**

Ensure all screws and cam locks are fully tightened. Verify that the cabinet is placed on a level surface. If wobbling persists, re-check assembly steps for any missed or incorrectly installed components. Always use the anti-tipping device to secure the cabinet to the wall.

- **Drawers Do Not Slide Smoothly:**
Check that the drawer slides are correctly installed and aligned. Ensure no debris is obstructing the tracks. Lubricate slides with a silicone-based lubricant if necessary.
- **Doors Do Not Close Properly:**
Verify that hinges are securely attached and aligned. Adjust hinges if needed to ensure doors close flush with the cabinet frame.
- **Missing Parts:**
If any parts are missing from the hardware bag or panels, please contact Iwell customer support with your purchase details.
